immediate attention. It is our desire
to please you.

MONDAY, AUGUST 1, 1919.

Parties leaving town should not fall to let the News follow them daily with the news of Washington fresh and crisp. It will prove a valuable companion, reading to you like a letter from home. Those at the seasone or mountains will find The News a most welcome and interesting visitor.

All articles sent to The News for publication must be signed by the writer, otherwise they will not be published.

treated. Four different brands or the commercial ilme-sulphur solution and a similar home prepared solution were tested at various strengths. The commercial brands registered from 31 to 33 degrees on the hydrometer scale.

Mistaken Beliefs About Manure. Mistaken Beliefs About Manure. It is argued by some farmers that bauling manure out on the field every month in the year is a mistake and that if spread out in midsummer the sun will scorch it to a tinder and burn out all the good. The Maryingd experiment station some years ago determined to test this theory, with the result that its experiments have exploded two very common beliefs, the ploded two very common beliefs, the summer burning theory being one of

been preved wrong is that it is better to plow manure under in the fall than to leave it exposed on the land's sur-face during the winter and then plow face during the winter and then plow it under in the spring. In the dist instance manure spread in July and allowed to stand until the following spring gave better results than that spread in October and still better re-sults than that spread in the following spring just before plowing. In the second experiment better yields were secured after allowing the manure to lie on top of the land all winter and plowing it under in the spring than were obtained from plowing it under in the fall.

Multiplication of Weeds.

To give some idea of how weeds multiply it may be stated that a single plant of pepper grass will produce 18.000 seeds; dandellon, 12.000; shepherd's purse, 37,000; wheat thief, 7,000; common thistle, 65,000; camomile, 16,000; ragweed, 5,000; purslaine, 375,000; plantain, 47,000, and burdock, 43,000.

The importance of not allowing a single weed to produce seed cannot be gle weed to produce seed cannot be urged too frequently. A single hour's work in destroying weeds may save weeks of labor next senson.

She Though Right."

Mrs. Young—I want to get a divorce from my husband. Lawyer—Well, what are your charges? Mrs. Young—My charges? Mercy! I thought I'd have to pay you.—Boston Transcript.

A Duke's Maxim.

It was a maxim of the first Duke of a Portland, who was a great lover of race horses, that there were only two places where all men are equal—on the turf and under the turf.

Sir Walter's Knock

"Ruff on the coult," retainted Sir Waiter Ruleigh as he spread down his velvet garment before Queen Elizabeth. He could not resist giving her the little wron. this little wrap.

Just the Contrary.
"I suppose you're one of those idiots that touch wet paint to see if it's dry."
"No, I'm not. I touch it to see if it's wet."—London Punch.

A straight line is shortest in morals well as in geometry.—Rabel.

Lotteries.
Lotteries are almost as old as history itself. It is certain that they were known to the Greeks and Romans, and the custom descended, Italy, to n Italian republics of the sixteenth cen-tury the lottery principle was applied tury the lottery principle was applied to encourage the sale of merchandise, the lotto of Florence and that of Venice being well known. The first lotteries in France were licensed in 1656 by Francis I. In England the earliest lotteries annetioned by the government were for such purposes as the repair of harbors and docks, about 1560. By the Virginia company of 1612 the lottery was brought to America.—New York American.

Pales For Climbing Plants.

Poles For Climbing Plants.

Poles for climbing plants should always be set before the plants are transplanted or the seeds put in the ground, because the thrusting of the pole in the ground is apt to destroy some of the roots.

Planting Asparagus.
It requires three or four years from
the planting of asparagus seed to the
time when the plant produces about
suitable for earing, and for this reason
two-year-old abouts are desirable.

Musically Speaking.
"Bay, dad, what happens when the bases are full?" asked the son.
"A discord," answered his father.

Did Well Canaldaring.

A landling doctor to a pig vesture of pass a shad at indian blood in him and is very prone of it. While walking within friend one day he said: "I have just found a book about a chief who was one of my ancestors. He was a great ann. He was a warring, a man of mighty provess in battle. Why I hearm from that book that he personally killed scores of his foss He killed nearly a hundred persons thusself."

"Well," said the friend, "he hasn't got anything on yon."

"Perhaps not," replied the doctor thoughtfully, "but we must give him credit just the same. You see, he never had any opportunities,"—Philandar age that it is donbtful if the use of his size.

Laughter.

These is many the first of the Wilde of the most desperate and may the sperapas as dangeron at they he is perhaps as dangeron at my reactine of his size.

"He's a minor of his first.

These is marked by the man by the control of the most desperate and may the principle the doctor of the most desperate and the principle that the doctor of the most desperate and they have been perhaps as dangeron at the principle to the arm the first of the world not one my many occasions as rule to keep out of trouble the man the perhaps as dangeron at the perhaps as dangeron at the perhaps are desperated to the most desperate and the perhaps as dangeron at the perhaps are desperated to the most desperate and the perhaps are desperated to the most desperate and the perhaps are desperated to the most desperate and the perhaps are desperated to the most desperate and the perhaps are desperated to the perhaps are
