WHOSOEVER ASKETH.

The suggestion thrown out to the ladies Priday last to lend their aid in the fight for a Union station, was not intended to convey the idea that not going to join forces with them; but so admirably have the ladies of Washington acquitted themselves in their undertakings that we would like to see them start the movematernalise the Union Station project, prepare a petition setting forth the needs of a Union Station and under the auspices of the Womans Betterment Association, Womans Christian Temperarice Union, Ladies' Aid Societies, Daughters of Rebecc and daughters of what not, circulate it and obtain the signature of every ledy in the city. Then as a solid and with the said W. B. Windley' phalanx call on the Board of Aldermee, Chamber of Commerce, Merchants' Association and any other orconveyed to John B. Killingsworth ganisation of the city to join you in by W. B. Rodman, Mortgaged, on presenting the matter to the Commerce Commission, and, we are in a position to state authentically that at least one of these organisations.

It is one need upon which we are all agreed; it is a common right vest.

It is one need upon which we are all agreed; it is a common right vested in the citizens that is premised and usurped by the railroads.

The Interstate Commerce Commis ion is a board to whom we can appeal for the restoration of our rights and if presented as the facts exist, will be restored to us.

This is an opportunity that re-quries very little effort to accomplish wooderfully great results. "Who-ever asketh" of the Commission, with the preponderance of evidence of the righteousness of the cause that Washington could present, "receiv-

Hydrated Lime Is The True Fertilizer

The United States Bureau of Soils Studied 220 different soils from all parts of the country under uniform canditions in wire baskets. Different commercial fertilizers with and without hime were used. As an average of all tests it was found that barnyard manure and cow-pea vines with lime tied for first rank, liming generally increasing the efficiency of complete fertilizer, and lime alone ranked next to nitrate when single elements were used. This is of extreme importance to every user of fertilizer in any form, and it proves that ONLY THE HIGHEST EFFICIENCY IS REACHED WHEN LIME IS FICIENCY IS REACHED WHEN LIME IS USED

Tidewater Hydrated Lime is the most eco-nomical and effective substance thus far used for counteracting the sour or acid soil

Only one kind of lime can be used advan-tageously for fertilizer; that is High Calcium and the most profitable is in hydrated form

Lime should be applied judiciously and never depend upon lime alone to maintain the fertili-ty of the soil, as all the ingredients which plants needs must be present in the soil to insure the profitable production of crops

Let us give you the pames of several successful farmers of this section who are using Hydrated Lime
