MONDAY, JUNE 30, 1913.

GOTHAM NEWS AND GOSSIP.

New York, June 28.—With the close of the race next week at Belmont Park, many New Yorkers will leave the city for their summer vacation. Enough politicians will remain, however, to keep the mayoral campaign going. Leaders of the various parties are already beginning to figure on the control of the city committees, which are to designate party candidates for city offices in the coming campaign. Under the new law these committee meetings must be held in the week of August 19, because of growing political independence, even in organization circles, the control of the leaders is harder to maintain than in past years. For some time it has been predicted that eventually Brooklyn Borough would be the controlling factor in city politics. The year for the first time Brooklyn will have control of the city committee of the Republican organization, having 502 members, or against 385 for Manhattan. In the Democratic organization, however, Manhattan will still control.

After a year of the closing of the public schools this week it is noted that more and more are school girls making their graduation dresses, and in contrast to the expensive affairs of years ago, calculated to excite envy and admiration, this year's frocks have not, in most instances exceeded \$10. In Brooklyn in 1905 just one hundred children made their graduation finery. The first half of 1913 about year just ended 4,610 little girls pricked their fingers over the frocks they were to wear on commencement day. And Miss Hutchinson thinks that when she has her records for the whole year it will run the number up to nearly ten thousand.

In the year 1908-19 about eleven hundred graduation dresses were made in Brooklyn schools. In the year 1911-12 it jumped to 3,055. And this year 10,000. In Manhattan the increase has been great or even greater.

The question of what the public wants in the matter of one-act plays in schools has of late come to be a matter requiring a great deal of study and discrimination on the part of the managers of our large variety houses, for the present invasion of the theater by plays dealing bluntly with social evils is a far more complex one to them.

This situation is interesting, in that it appears to disprove the old time theory that a vaudeville audience will "stand for" anything that is served up to it, and supports the vaudeville managers' contention that the public plus the vaudeville writers make the entertainment what it is. All the managers can do is to watch the barometer of public opinion.

The Union School of Religion is the name of a children's Sunday school. It doesn't sound like it, does it? It is under the direction of the Union Theological School.

It aims to teach the spirit of Christian living and worship. It teaches the Bible according to modern interpretations by means of the best methods of secular teaching.

It charges a fee of \$1 for materials, pays its teachers and doesn't try to impart and dogma.

Its students are graded just as they are in day school, from kindergarten to high school. It is strictly undenominational. It is Christian.

The school originated in the minds of Mr. and Mrs. W. M. Kingsley about ten years ago.

From Edgewater.

Cofonel Wiley C. Rodman and family have moved back to the city from "Edgewater" their summer home until after the encampment of the Second Infantry North Carolina National Guard at Morehead City which is to begin July 8th.

Different. "She—it seems strange that you don't remember my face and yet you remember my name." "He—(awkwardly)—Well, you know, you have an attractive set of name. Vonkers Stalman."

For a Hundred Years to Come

You will be able to get lots of lots from the river (from one-half to a mile) at a low price, there are thousands upon thousands of such, who the entire population of Beaufort county could be housed within a mile of the water front of Washington.

How about lots within two or three blocks from the river shore? The supply is very limited, isn't it? Only a few can be had. They are worth big money and their owners are not going to let them go for a few hundred dollars.

Therefore, those who buy Washington Park lots are bound to make money on their investments, yes, lots of it, and at the same time secure a home-site unsurpassed in Eastern North Carolina.

See me and secure your lot at once.

BEAUTIFUL THE CITY

BOYS AND GIRLS LEND HELP IN BEAUTIFYING CLEVELAND

Gardens Cared For by Boys and Girls Decrease Disease and Crime.

Fully 5,000 public school children of Cleveland, O., gave their help in the city beautiful movement there according to the school director. Under their system it is possible to show in definite terms the results obtained by the young gardeners, the efficiency of the work done, the results obtained and the amount of good accomplished. Statistics and data have been collected showing the decrease in flies and disease where gardens are planted and the decrease in the number of juvenile offenders in neighborhoods well sprinkled with gardens.

Both the boys and girls take an active interest in these gardens and immediately after school is out in the afternoon the children gather for work. In Cleveland a temporary building was erected for the storing of the tools. Every Saturday morning during the summer the gardeners hold a flower and vegetable market when they sell their produce. The flowers and vegetables grown are the property of

YOUTHFUL AMERICAN GARDENER

The children and they may either spill them or take them home. Records are kept of skill in planting, cultivation, weeding and products. Courses in nature study regarding life processes of plants, insect pests and how to combat them, plant diseases and how to combat them are given in Cleveland and make the garden work of real value to the children.

The large gardens are radiating centers for the neighborhoods in which they are located. They make possible greater efficiency, intelligence and self-reliance in the home gardens.

Interest in garden work is cumulative. When the children are properly directed their ambition is stimulated, and year after year they will extend their activities and acquire greater success.

Beauty Your Back Yard. It is a shame that the words "back yard" should so often call up a dismal picture of dilapidated fence, coal ashes, old furniture and garbage tins. Begin now to interest yourself and your children in the improvement of your back yard. Spend a dollar on tools and the same on flower seeds and make pleasant, healthful occupation for many summer hours. There are a number of hardy annuals that flower profusely and require no scientific care to give good results. Perennials sown at the proper time will give cut flowers every year after the first. It may be pleasant next July or August to sleep in your back yard than in your house under these conditions; also you will find that if the people living in a block get interested in gardening they will not tolerate a lot of useless cats and dogs about, whereby the peace of the neighborhood may be enhanced.

"Who loves a garden still his Eden keeps."—Texas Farm and Ranch.

Uses of Lime.

Lime is seldom if ever applied to soils by reason of its value as a direct fertilizer. Its chief value lies in its unlocking, unavailable nitrogen, phosphoric acid and potash. We usually apply it to gardens in one of three forms—viz, quicklime, gypsum or land plaster and wood ashes. We would not advise applying it in any form to soil for lawn purposes. Better far to use it on the grass when it shows need of food. It is very beneficial to Kentucky blue grass.

How It Was.

"Alice is telling her girl friends that she could have got Jack if she'd only said 'Yes.'"

"That's what Jack thought, so he never gave her a chance to say 'No.'"
