WEDNESDAY, JULY 2, 1913.

CONGRATULATIONS.

We hasten to extend congratulations to our neighbor, The New Bern Daily Sun. This enterprising newspaper celebrated its sixth birthday on June 26. The Sun is one of the brightest and newsiest sheets that visit our exchange table.

LABOR NEWS AND NOTES.

Molders of Hoopston, Ill., earn \$3.75 daily.

Milwaukee carpenters gets \$4.00 a day.

There are 79,300 union bricklayers.

Chicago street cleaners are being taught the one correct way of steen different ways of handling a broom.

Fifteen hundred Buffalo teamsters won a strike. The new scale, \$13 for singles, \$15 for doubles and \$17 for triples and drivers of automobile trucks.

Machinists of the Aultman & Taylor Machinery Company, the largest industry in Mansfield, Ohio, struck when a premium system became effective.

Laborers in Trinidad that it does not pay to buy lawn mowers as coolies will cut the grass with a small sickle or knife at a trifling cost.

Janitors of public buildings and caretakers of public playgrounds in Philadelphia have organized a union with the hope of securing an eight-hour day and an increase in their salaries.

The International of Carpenters and Joiners of America reports that the progress in the campaign to organize the workmen in the box-making industry in Iowa, Illinois, Wisconsin and Minnesota.

Southampton, Eng., ship painters have accepted an advance of 24 cents for general ship work, with an additional 24 cents for yacht work, making the per rate \$8.24 and \$8.48 respectively.

Different.

She—it seems strange that you do not remember my face and yet you remembered my name.

He awkwardly—Well, you know, you have an attractive sort of name—Yonkers Statesman.

Against His Principle.

"My grocer won't sue me if I don't pay him!"
"How's that?"
"His never adopts legal measures."—Judge.

A Logical Cure.

The remedy of bees is now employed as a cure for ophthalmia. Nothing really opens a fellow's eyes like being well stung.—Washington Post.

Doubly Proven

Washington Readers Can no Longer Doubt the Evidence.

This grateful citizen testified long ago.

The facts are now confirmed.

Such testimony is complete—the evidence conclusive.

It forms convincing proof of merit. Mrs. C. Pennington, 27 E. Front St., New Bern, N. C., says: "I suffered intensely from backache and sharp, shooting pains across my loins. Often I was so lame that I could hardly straighten after stooping. I knew that my kidneys were disordered for the kidney secretions were unnatural. I used just one box of Doan's Kidney Pills and this was sufficient to dispose of my aches and pains." (Statement given January 24, 1908.)

RE-ENDORSEMENT.

Mrs. Pennington was interviewed on November 28, 1910, and she said: "I can still recommend Doan's Kidney Pills, for they gave me permanent relief."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

For a Hundred Years to Come

You will be able to get lots inland from the river (from one-half to a mile) at a low figure, there are thousands upon thousands of acres, why the entire population of Beaufort county could be housed within a mile of the water front of Washington.

Now about lots within two or three blocks from the river shore. The supply is very limited, isn't it? Only a few can be had. They are worth big money and their owners are not going to let them go for a few hundred dollars.

Therefore, those who buy Washington Park lots are bound to make money on their investments, yes, lots of it, and at the same time secure a homestead unsurpassed in Eastern North Carolina.

See me and secure your lot at once.

CLARY, Ticket Agent, Washington, N. C. T. C. WHITE, Gen'l Pass. Agent, Wilmington, N. C. 5-29-10-9-13 FLY FACTS. I wish to call your notice to the statement in my last week's remarks in regard to the distribution of typhoid germs by flies. For the benefit of those who might entertain the idea, that typhoid is wholly caused in this way, I will say, that not all typhoid is brought about in this manner. In some instances impure drinking water is responsible for typhoid. It is safe to infer, however, that typhoid germs are largely, if not entirely, conveyed to the system in food and drink that is lacking in purity. Evidently the fly is a promoter of this disease because it is his business to make things impure. Nor is typhoid the only disease flies give us. They often deposit germs in our food that develop into plain cases of dysentery, tuberculosis, hookworm, and even smallpox, besides others. Thus we note at once, that the fly is the most active, persistent and annoying of Disease's Representatives. In summing up facts regarding flies and their relation to health, it will be seen 1st. That the eggs can hatch and thrive in any place that is filthy. 2nd. That the generation of flies is very rapid. From May 1st to September 1st one female fly can produce 24,000,000 others. 3rd. That the thousands of flies, which crowd into the dining-room, have all come from some manure-pile, and that they convey innumerable germs to the food. 4th. That people eat these germs which may result in a serious affection. 5th. That many deaths are caused

In North Carolina by eating food which has been poisoned by flies. The ill manners of flies killed about 1,500 babies in this State last year, by careful estimate, caused 100,000 days of sickness with an estimated monetary loss of \$2,500,000. It can now be seen that this fly problem is not so insignificant after all. It is far more than a mere trifle. Flies are killing people in North Carolina at the rate of 4 a day. So it becomes prominently necessary to remove the cause of these deaths as thoroughly as possible. This can be done only when the flies are driven from the home. They must not be allowed any access to our dining-room if we are not to become infected with their poisonous germs. The various doctors and health boards of the State, are making great strides in the abolishment of disease. Their able and well centered attacks upon the army of germs have cut the death rate in two. But, as a matter of fact this restoration and promotion of health by official sources is scarcely noticeable in rural sections. The cities and towns, as a rule, have been benefited by this effort—not the country. The fly can be fought more effectively in the city and there are more people there to fight him. City people are more fully informed as to the hazards they are subjected to if they let flies live with them. This is why flies are comparatively few in town and city. This is why the damage, sickness and death caused by flies is hardly perceptible in populated centers. 'Tis the country people that flies are killing. Yes, flies are killing 20 people in the country to one person in town. Why? Because the fly is harder to fight in the rural section, and there are fewer people to fight him, and again, because 80 per cent of the flies produced are around rural homes and among uninformed people regarding the question under discussion. Naturally enough then, rural people, as a whole, have not realized the importance of fly-killing. Therefore a lack of effort to destroy them is the result. The object of these few remarks is to inform, in a degree, those rural people who, in a sense, have hitherto been neglected. The State Board of Health will gladly send you matter regarding this subject that will inform you fully. Get it. Study it. Wake up! and let every member of the family be a welder of the sword in the battle against flies. Methods of capture next week. (To Be Continued.) VICTOR G. WILLIAMS.

BULL MOOSE RALLY. Newport, R. I., July 2.—Bull Moose leaders from all parts of the United States are here attending a nation-wide Progressive meeting which began today in the new convention hall on the beach and will continue throughout tomorrow. The program for today includes an address on "The American Navy," by Colonel Roosevelt, which will be non-political and non-partisan. This will be followed by a Rhode Island clambake, at which 4,000 persons can be seated and fed and which will be addressed by the leading Progressives of the United States on purely political subjects. The second day will be devoted to a national Progressive conference and addresses. In the evening a reception will be held. RESIDENCE PURCHASED. Dr. H. W. Carter has purchased the residence of Mr. Dempsey Gimes on Harvey street, where he and his family have recently moved from East Main street. Miss Lida T. Rodman left for Morehead this afternoon.

Food Needs For Summer Call for easily digested cereals, fruits, etc., and less of the heavy, hard-to-digest kind. But the nourishment must be there! Probably the most nourishing, most easily digested cereal food known is Grape-Nuts Made from prime wheat and malted barley, it is ready to eat direct from the package; digests generally in about one hour; and contains the true brain and muscle building materials placed in the field grains by Nature for man's use. Grape-Nuts food has delicious taste; and is pure, wholesome and a "builder" in the truest sense of the word—an ideal summer dish that does not overheat the body. "There's a Reason" for Grape-Nuts
