TRY TO DISSATISFY FARMERS.

It was learned this morning that there were present at the opening sale of the tobacco market, several persons from other cities, who attempted to dissatisfy the farmers with local conditions.

The object of these men was to make the farmers leave the local market and bring their tobacco to other markets. Their little plot was discovered on the floor of the warehouses yesterday and for a few moments it looked as if they would be forcibly expelled.

We do not know the names of the men who attempted to pass off this rather shady piece of business, and we do not know the names of the men they represented. They can easily be found out however, and if they try to repeat their trick there is liable to be just the least bit of a scene at the warehouses.

Washington has entered the tobacco field TO STAY. She will not be shoved to one side in order that other markets may increase in size by handling the crops of the Beaufort County farmers.

EDITORIAL.

It is reported that several of the farmers felt slightly offended yesterday, because they were ordered to stand back while the tobacco was being sold. Those who were present at the sale will recollect the large crowd that surrounded the auctioneer.

Daredevil Photography.

A naval photographer gets many trickies and, after a time, takes them as a matter of course. Being thrown into the sea isn't considered by him at all a serious event.

What Makes Flowers Blue?

Of all the many substances that are combined to make a flower, what is the particular one to which is due the blue red or yellow color? Why, for example, are peonies blue and roses red, and why has no one ever seen a red peony or a blue rose?

Caring For His Health.

Not many people guard their health so carefully as Sir Tatton Sykes, who in winter wore five or six coats when out riding and shed some of them as he became warmer.

Moon Blunders.

The moon, it seems, is responsible for more authors "howlers" even than nightingales. Baroness Orczy in "Pellucid Government" draws a beautiful picture of a crescent moon rising over the treetops in the far eastern sky at 11 o'clock on a June evening.

Little Economies.

A postage stamp will purchase you the use of a dollar for 122 days. Three stamps equal the interest on a dollar for one whole year.

Effect of an Explosion.

It seems incredible that an explosion could be of such force as to cause an ordinary steel rail to wrap itself twice round the trunk of a large tree, yet there was just such a result from the discharge of gelignite at Nanaimo, B. C.

Involuntary Fasting.

A remarkable feat of involuntary fasting was performed twelve years ago by a corporal in a regiment of French colonial infantry. On his way to work one morning a man heard cries proceeding from a disused mine near Brest.

Smallest Deer In the World.

The "monseeder" of India and Africa is the chevrotin, one of the smallest hoofed animals. It stands less than twelve inches in height at the shoulder.

The bath as a tonic. The bath, recommended by Uncle Sam to the army boys, as a means of invigorating tired nerves and muscles and promoting an appetite for a hard day's drill immediately suggests itself as the very thing for women.

Along with the new keenness over social and economic reform England has developed a number of other virtues in the past score of years.

Practical Courses Coming. "Father," asked the girl who was going to marry a poor man, "do you think I ought to take a course in household economics?"
