Yesterday's Game Interesting

R is understood always that the rise shall be asmed in honor of the bend of the soverniment in the coun-try where the races are sailed. A Gel the affect is called the Emperor-"A strict interpretation of the rules, would mean that Anrora for-feited the game to Washington and the final acors was 5-6. I under-stand that here was no agreement between the two taxes which would permit one isam to have before the game own completed. However, I think it would be best to call it a Sell he prize is called the Emperor's up, and on this side there have been he President Racewell cup, the President Tatl cup, and now therr ull be the President Wilson cup The second prize will be named for

permit ene team to leave before the game was completed. However, I think it would be best to call it a draw game, location I do not belleve that Jy ashington without be take ad-vantage of a forfeited game." The above statement was Riven out by Mayor Kagler last hight, rela-tive to the result of yesterday's con-test between Washington and Au-tors. SINGING GLASS SEPT. 17 The Singing Class. from the, Odd

MAYOR RUGLER SAYS STRICT IN

ATION OF BULKS

NURGHA LEFT NING, WITH SI FAVOR, WA

Pellows' Home, which was scheduled to be at the High School Auditorium tonight, has been postponent ontil Soptember 17th. This is due to the fact that the Christian Church is holding its revival meeting this work. rora. The game ended in the seventh with the more 6-4 in favor of Aurera. Washington was at bat and had three men on the bases and only one down when the Aureras ran from the field is get their train. Washington had three new men in transfer in the mer train without veek.

wasnington and three doe and in yesterday's line-up from Wilson. They sere Hackney, Kinesid and Wingtesd, who played second, pitch-er and first, respectively. Joiner was shifted to short and played one of TAMMANY SAYS LET the best games in that position that has ever been seen here.

ors of the various districts for the mayorally campaign, also to name candidates. The trend of events during the past six days has been so arrequous that it is difficult to pre-dict who will be the nominees. It has been decided, however, to give the people a chance to any what they want and what they do not want in the way of city government. Al-though feeders have been sent out to has ever been seen here. The score really should have been in favor of Washington when the prime terminated. Autors scored one run in the first when Kinesid let B B. Thompsen's grounder so through him. Again, in the fourth, the local team went up about three miles in the air. With two men down, and an Aurora player on second, the Washington men proceeded to show that they haven't forgotten avery-thing in the error line. Hacknow though leaders have been sent out to apread this impression as extensively is possible, those in a position to know declare that the adoption of thing in the error line. Hackney muffed R. A. Thompson's fly, Taylor made a botch of Lanler's high drive platform, naming of candidates and everything else will be disposed of and Winstead let Joiner's throw get sway from him, although the per in less than an hour.

away from him, although the pea-wasn't estim good at that. When the smoke had cleared away, the vis-itors had scored four tallies. Washington scored there runs in the first. Davanport singled, Hack-ney sacrificed and reached his base on Bland's error. Winstead struck out flarver got we and whansed out on Biand a error. Windlead struck out, Carrow got up and whanged out a coreauting two bagger over the third base sack, Kincaid struck out and Floyd got thrown out on what and Floyd got thrown out on what ought to have been a hit to right field. The locals scored another in the third. Hackney walked Win-mand and Carrow sacrificed and Kin-cald came across with a two-bagger scoring Hackney. In the seventh Poss Brown singled, Joiner flew out to centre field, Davenport walked and Hackney singled. Then as Winstead wrolled up to the bat, the Aurors baan gathered up their bats and pro-ceeded to best it for their-train. With ordinarily good support. Kin-made about have won his same with use. The score shows he was touch-ed for seven hits. One of these, Car-row failed to get under and the other, with a fast fielder after it would also probably have been nab-bed.

The raised to get dinder and the other, with a fast fielder atter it would also probably have been nab bed. Joiner played a ratiling good frame at short and nabbed everything that came his way. He made a mis fake at bat in the seventh, when with Poss Senera on base, he tried to Kill the ball, instead of laying it down and advancing Brown.

WEATHER PAIR TONIORY and Ton

A must inter sting and instrucive Metare on "the causes and pre-cention" of malaria" was given by Dr. Henry Carter, sealor surgeon of Public Health Service, at the City Hall last hight: A fairly large number of represen-

tative chippes of Washington attend-ed the lecture and listened attentive.

PEOPLE RULE. narks, stated that inslarial conditions in this state had decreased male cannot fly more than about one greatly from what they were 30 and third this distance." New York, Aug. 23 .--- Tamman; Hall meets today to adopt a brass-bound platform prepared by the lead-ers of the various districts for the

o years ago. of the price of quining." The question as to how malaria is conveyed is an all important one man is bitten by a mosquito which has become infected by having fed or a patient having or having had malarial fever in his blood. This is ab-solutely the only way that the disease can be conveyed from one per-con to another."

"There are many different families thrive." of mosquitoes, but the majority of them are not dangerous. The class known as Anopheles are the oner which carry the malarial germs. It is only the female which is danger-WASHINGTON ous. The male cannot harm you. This again carries out the theory that "the female of the specie is more deadly than the male.' The mosquito is very shy* and is easily frightened. They very seldom bits during the day and a person has to be absolutely quiet before they will go near him. As a result, it is the person who is asleep who has to take care of himself."

"I would also like to say a few words regarding the breading places of the moscuito. They do not breed in rain barrels or dirty pools of wa-ter or deep water or in the hot sun. They prefer a shallow clear pool of unclean appearance is free from mos-

"There are three ways for man to protect himself from the monquito: to similar the monquito, to prevent it from having access to man and to put in such a position that if the managing bits them, they do not be

me infected with the malarial

The famile State Committee meeting here today. ganization in this State is the women's organization which is headed by eration of Women's Clubs, Many absolutely daugerless. The female Dr. Carter. in his opening re-arks, stated that insintial condi-hundred yards at a stretch, but the other widely known club women are aiding in the organization of the wo

The main sections of Washington "There are two causes for this de rease," he said, "and they are in reased prosperity and the lowering Bridge street, another on Washington and a third on Market street where I have found mutarial bearing mosquitces and these places should In brief, it is as follows: A well be attended to. The brush should be cut away, tile put in instead of a ditch or the entire ditch filled up. If you do leave a ditch, see that it is straight. There is nothing better for breeding mosquitoes than a crooked ditch, where little pools form and where the larvae may grow and

> "Screens and mosquito bars are good means for preventing the in sects from reaching you. The former is the best. I find that the 12 inch

screen is used the most in Eastern North Carolina for windows and doors. This is too large, and a 16 inch screen should be used. If you have the 12 inch screen, cover it with a coat of green pant, which will reduce the size of the holes in it." "Quinine is an excellent preven tion of malara. A small dose, of from three to five grains daily will work wonders in offsetting the bite of

the Anopheles. This method of taking daily, is especially good for people living in the country, where draining and screening are impossible. After the close of Dr. Carter's les

ture, he displayed the different types and families of mosquitoes on a water, sheltered from the sun. Any screen and explained their various place which smells badly or has an parts. A number of questions were asked him after the close of the meeting, which he answered.

The lecture was most interesting The secture was most interesting from start to failsh. The people of Washington extend their sincere thanks to Dr. Carter for his address. His suggestions for benchting local conditions were valuable and will without doubt, be carried out. We treat the set be set trust that he will be with us again.
