

WASHINGTON HIGHS DOWN RALEIGH TEAM BY SCORE OF 13 TO 12

Played at Fleming Park Thanksgiving Day. Was One of the Hardest Fought Games Ever Witnessed Here.

In the hardest fought game of football ever witnessed in Washington between two high school teams, Washington came out winner over the larger team from Raleigh Thanksgiving afternoon by the small margin of one point, the score being 13 to 12. The game started by Raleigh receiving the kickoff. By line plunges they carried the ball to Washington's twenty yard line when Washington tightened up and held for downs. The ball wavered back and forth across the field in this manner during all the first half neither side being able to get in striking distance of the other sides goal.

The third quarter started with Washington receiving the ball. By line plunges and short end runs they carried the ball to Raleigh's forty-five yard line when by the help of their shift play Jim Weston got away for a thirty-five yard run which carried the ball to Raleigh's ten-yard line when by a series of line plunges J. Weston carried it over to the first touchdown of the game. Raleigh then received the ball from kickoff and by forward passes mostly which they had down to perfection they carried the ball to Washington's five yard line when some line holding that is not to be surpassed anywhere was done by Washington, it taking Raleigh three touchdowns to make their necessary five yards, and it was then made by an end run.

Washington now received the kickoff and again by use of their shift play got Elbert Weston off for a sixty-yard run and a touch down which made the score 13 to 5 in favor of Washington. Raleigh again received the kickoff and by gaining a thirty yards on a well executed forward pass were in striking distance of the Washington goal and by hard line plunging which was well met by the Washington line who were at a disadvantage on account of weight, carried the ball over for the second touch down for Raleigh who failed to kick goal, making the score 13 to 12 in favor of Washington. Washington now received the kickoff but were soon forced to punt giving the ball to Raleigh. Taylor now intercepted a forward pass attempted by Raleigh again, giving the ball to Washington. Washington carried the ball to Raleigh's thirty yard line when the whistle was blown for time with the ball in Washington's possession.

These are the two teams as evenly matched as any two teams that will play for the state championship at Chapel Hill a week from next Saturday. The Washington line composed of Moore, Jones, Hudnell, Wilkinson, Howard, Harris and Smith are very strong as was shown by the goal was in danger, they holding the heavy backfield of Raleigh for three downs at a time and not allowing them to make an inch. Taylor was there as usual at line plunging and made his gain whenever he was called upon and getting anything that happened to get through the line when the other side had the ball. The sixty yard and the thirty yard run of Elbert and Jim Weston's were the features of the game. Chas. Meekins at quarter-back played a good game always calling the right play at the right time, showing that he knows how to control the team when in a tight place.

The Washington team made a very good showing and owing to the fact that Raleigh has so many more boys to select from it being so much larger than Washington) the people of this town have indeed a team they should be proud of. Mills was the star player for Raleigh while Whitaker also played a good game. There was a good crowd in attendance and much enthusiasm was shown. Newbern, Kinston and Aurora were well represented. Mr. Maxwell, Mr. Bland and Mr. Guy Weston sold tickets.

Following was the line-up for the game:

Washington	Position	Raleigh
Wilkinson	C	Tyree
Howard	L. G.	Parhoen
Moore	L. E.	Smith
Hudnell	R. G.	Cruikly
Harris	L. T.	Westers
Jones	R. T.	Whitaker
Smith	R. E.	Cruikly
J. Weston	L. H.	McDonald
Meekins	Q.	Champion
E. Weston	R. H.	Mills
Taylor	F. B.	Bowen
Umpire	Head Lineman	Walter Morgan
Timekeeper	Buckman	Whiting

Referee, Harry Kear, John Smith. Subj: Washington, Bowen, Charles and Harris, Raleigh, Koonce, Arthur, Coley and Betts. Coach, Phillips. Time of quarters, 12 minutes. It now seems that the way is open for a championship team as this is the only one that has caused Washington any worry and that is over with now.

LOCAL COMPANY G. INSPECTED ON FRIDAY NIGHT

Col. W. C. Rodman Entertained at Late Supper Complimentary to Capt. Langdon, the Inspecting Officer.

Company G, Second Infantry, N. C. N. G., held its special inspection Friday night, November 29th; at their armory. The inspecting officer was Capt. Russel C. Langdon, U. S. A. Inspector-general to North Carolina by the war department. The boys were put through the many different maneuvers so important to the maintenance of and the uplift of the National Guard. Besides the manual of arms, close and extended order, the company was drilled in the setting-up exercises and bayonet drill, both the most important factors in the make-up of a true and trusty soldier. The setting of exercises develop a man physically, the bayonet drill teaches him to defend himself against his enemies. Capt. Langdon, who has been attached to the militia of this state for only little more than a year, has endeared himself to every soldier, commissioned as well as the enlisted in the entire guard, because of his untiring efforts to make the North Carolina National Guard one of, if not the best in the country. The boys showed a great improvement over last inspection, and we believe that under the instructions of Capt. O. B. Wynne, and his subalterns, especially strict discipline that Capt. Wynne is Company G will forge in the front and become one of the best companies in the Guard. The company justly deserves the support of every citizen in Beaufort county, for having been organized under the late Chief Justice James E. Shepherd in 1877, the company has always responded promptly to the call of the sheriff or mayor in quieting disorders and maintaining peace. After the inspection Colonel W. C. Rodman entertained at a late supper complimentary to Capt. Langdon. The following guests were present: Capt. R. C. Langdon, Capt. O. B. Wynne, Capt. A. K. Taylor, Lieut. Com. C. L. Morton, Lieut. W. B. Rodman, Lieut. R. R. Handy, Lieut. E. R. Lewis and Regimental Color Sergeant J. K. Hatton. As usual, when Col. Rodman is the host, no effort was spared to make the affair a most enjoyable one. Mrs. Rodman, the genial wife of the colonel, was very artistic in carrying out the color scheme which was so appropriate to the occasion. As each guest entered the magnificent and palatial dining room their eyes fell upon a table dressed in the stars and stripes so dear to the heart of every true American, flags adorning each course. After the supper, the guest retired to the comfortable drawing room, where during the smoking of genuine Havana cigars, military was thoroughly discussed, and much valuable advice was received from Capt. Langdon. After having spent a pleasant evening, the guest drank a toast to the host and his guest, Capt. Langdon and to the success of the North Carolina National Guard, using the "American Beverage," "grape juice."

One of the greatest motion pictures in the country is billed for the New Theater tonight being Victory in 5 reels containing 6,000 thousand feet. This picture is produced by permission of the U. S. Navy and such noted men as Secretary of Navy Daniels, Admiral Badger and Captain Benson will be seen. This is a stupendous production in five acts. Victory is one of the world's greatest spectacular war dramas and should be seen by a large audience. It will stir the patriotism of every American. See this marvelous picture without fail. It will be worth while.

VICTORY TONIGHT.

OUR FLOWER POTS HAVE come. We now have any size you want. E. K. Willis. 11-18-13

You Can Help!
You Can Help!
You Can Help!

Every lady in Washington and the men too, are cordially invited to be present at the residence of Major F. C. Kugler, corner of Main and Bonner streets, Tuesday afternoon at 4 o'clock to discuss ways and means looking to the sale of the Red Cross Seals in this city and county. There are 20,000 seals in Washington for sale and it behooves everyone interested in this great cause to assist in the work. Everyone can help to fight tuberculosis with the Red Cross seal and it is up to every citizen of Washington to do his or her share now. Remember the meeting tomorrow afternoon and be on hand.

TO EXAMINE APPLICANTS POSTOFFICE

The United States Civil Service Commission announces that an examination will be held at Jessama, N. C., this county, on January 10 to fill a contemplated vacancy in the postoffice at that point. The compensation of the postmaster at Jessama is \$199.00, being the sum he received during the last fiscal year. All applicants must reside in the territory. The examination is open to all citizens, who can comply with the requirements and they must be 21 years of age. Applications should be properly executed and filed with the commission in Washington City at least three days before the date of the examination. Mr. F. M. Hodges, of the city postoffice is the clerk of the commission in this city.

Dr. D. T. Taylor has returned from Richmond, Va.

R. H. Broom Closes Third Year As Pastor M. E. Church Here

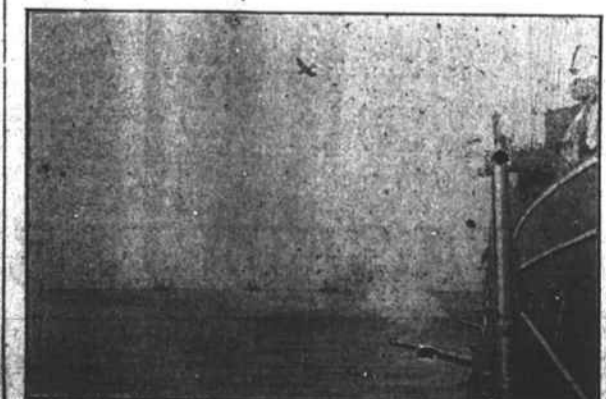

REV. R. H. BROOM

Rev. Robert Houston Broom on yesterday closed his third year of industrious service as pastor of the First Methodist Church here and left this morning for Oxford, N. C., to attend the annual conference which convenes next Wednesday with Bishop James McCoy, of Birmingham, Ala., presiding. Mr. Broom was sent to this station by Bishop E. R. Hendrix and has been returned by Bishops Hoss and Denny, respectively. Mr. Broom is no sensationalist but is a sincere, diligent worker. Under his administration as pastor of the church in Washington there has been steady, substantial progress along all lines. The church register has been treated to needed revision, the monthly church conference has been held, the emotional interests of the church have been magnified, pastoral visitation has been emphasized, the poorest and most destitute not being neglected, and uniform fraternity has been shown to the other churches of the city. As a member of the Minister's Union, Mr. Broom has advocated a greater frequency of union services. The officers of the church have stood nobly by the material claims

and all financial obligations have been fully met. The following statistics as to the years' work will doubtless prove interesting to the members of that congregation:

- Names added to the roll this year, 103.
- Couples married, 24.
- Infants baptized, 63.
- Increase in advocate subscribers, 54.
- Pastoral visits for 1913, 817.
- The 11 o'clock service yesterday was the last for the year and the pastor left for the annual conference this morning. He is chairman of the committee of admission on trial and will have to work hard all of tomorrow.
- The session of the conference in Oxford will be the 77th. The last session held in Oxford was in November, 1849—64 years ago, when Bishop James O. Andrew presided and Dr. Charles F. Deems acted as there are approximately 200,000 white Methodists in the state; now secretary. There were only 21,258 Dr. A. D. Betts is said to be the only surviving member of the conference of 1849. The session beginning Wednesday morning at 9:30 o'clock will probably adjourn by noon Monday.

VICTORY-NEW THEATER

Shown in New York at Price of 25c to \$1.00

LIEUT. THOS. MALLISON MEMBER COMMISSION ORDERED TO PARIS

Aim is to Establish Longitude Between Washington City and Paris. This is a High Honor for One so Young in U. S. Navy.

Comparison of time by means of radio signals dispatched via the Arlington radio station, the tallest in this country, and the Eiffel Tower station, France, has been the subject of experiments since last April, and for three weeks signals have been regularly exchanged between Washington and Paris.

The purpose of the comparison is to determine the difference of longitude between the two places and to measure the velocity of propagation of radio signals through space. During most of the year atmospheric conditions are such that much interference is met with in transmissions, but the season is now approaching when these conditions are most favorable, and the success achieved recently makes it probable that the work planned between French and American scientists to carry this comparison to a point where accurate determinations are obtainable will be successfully completed.

First Time With Signals. The Washington Naval Observatory was the first institution to employ radio telegraphy for the transmission of its time signals to ships at sea to permit them to check their chronometers with that of the observatory and to more accurately determine their longitude. It also transmitted such signals to surveying parties under the hydrographic office to enable them to determine the longitude of points used as bases for surveys.

In such transmissions, however, there was the loss of a fraction of a second in sending a signal on its journey and on receiving it. It was therefore necessary to eliminate this allowance. This was first accomplished by the French scientists through what is known as the method of "coincidences." The superintendent of the naval observatory then suggested that comparisons be carried on between Paris and Washington in order to solve the problem of measuring losses.

GOOD WORK OF THE ITALIA. The French government went further than to accede to the request of the naval observatory that American experts be permitted to take observations of scientists to cooperate with an American commission in conducting the test.

Commissions Divide Labor. This dual commission commenced work last April. One-half of the American members were stationed in Paris and one-half in Washington and the Frenchmen on the commis-

sion divided in the same manner. At the end of half the time, during which the comparisons are to be made the commissions in Washington and Paris will exchange stations, taking with them all of their instruments. The comparisons would then be repeated. This is to be done to eliminate the personal equation from the results. The American commissioners work side by side but independent of their French colleagues. The tests are carried on in specially constructed instrument houses, of which four have been built, two in Washington and two in Paris. The American and French commissioners are separately housed. Special telescopes have been built in order to further reduce the possibility of error through instrumental imperfections and personal calculations. Four radio experts were detached from duty with the Atlantic fleet to secure the experience necessary to conduct the tests.

Sent to the West Indies. The Arlington station will transmit these same time signals to hydrographic surveying parties in the West Indies and Central America and fifteen observatories, from Maine to California, have requested the signals to determine longitude. Now the naval observatory has the idea of sending such time signals from the powerful radio station which is to be built on the Canal Zone to points in South America and many of the islands of the Atlantic and Pacific and possibly to some of the western European countries so that longitudinal determinations will be carried out over a large portion of the globe through accurate comparisons.

The French experts now in this city are Prof. M. Simonin, of the Paris observatory; Capt. A. Carrier, of the French army, and Prof. H. Abraham, of the faculty of sciences of the University of Paris.

The American experts in Paris are G. A. Hill, of the naval observatory; Lieut. R. B. Giffman and C. W. Magruder, and Ensign G. S. Gillespie, U. S. N. The American experts here are Prof. F. B. Littell, U. S. N.; Lieut. W. T. Mallison, and Ensigns H. E. Saunders and R. A. Lavender.

Lieutenant Mallison is a Washington boy, being the son of the late W. C. Mallison and brother to Messrs. Fred Edward and Samuel Mallison. This is quite an honor to him and his many friends in the town of his birth extend congratulations.

THE ADDISCO BOOK CLUB ENTERTAINED

The Addisco Club held its Thanksgiving meeting on Friday instead of Thursday afternoon with Mrs. S. C. Bragaw and in spite of the inclement weather, most of the ladies were present. The meeting was called to order by the vice-president, Mrs. F. H. Rollins, in the absence of Mrs. B. G. Moss. The items, given in response to roll call, were full of interest and arranging them was an account of the beautiful rugs and curtains woven by the women in our North Carolina mountains, told by one of the club members who has been in Blowing Rock for some weeks. As the papers for the afternoon were on Women of Philanthropy and Mercy, a short sketch of Miss Barton was read by request. This seems particularly appropriate just now as it is hoped our citizens will take an interest in the national fight against the great white plague now being waged under the leadership of the noble Red Cross workers. Mrs. Rollins then read sketches of three great women—Jane Addams, Elizabeth Frye and Miss Helen Gould, all of whom have written their names indelibly on the heart of the world. Refreshments were then served so lavishly that each guest was given a whole Thanksgiving turkey to carry home. The club adjourned "till we meet again" with many thanks to the generous hostess for another very delightful meeting.

Messrs. Burton Winstead and T. S. Payne, of Winsteadville, are registered at Hotel Louise.

LOW PLACES AT WASHINGTON PARK ARE TO BE FILLED

The contract has just been let to the French Dredging Company of Norfolk, Va., to fill in the low places now at Washington Park. Work is expected to begin on this much needed improvement to this suburban spot within the next week or ten days. But for an accident to one of the dredges the work now would have been under way. The low spot leading from the bridge to the park is to be filled in as well as the low place beyond the residence of Mr. Harry McMullen. The dirt used for this purpose will be sucked up from the bottom of the river and carried inland at least 1,000 feet. This is a decided improvement to this already attractive spot and when they are finished the park will be still more attractive. The owners of the park are to be congratulated in this their latest move. As a residential site Washington Park is not surpassed anywhere. It is a credit to growing Washington.

AUTOMOBILE PARTY.

S. V. Price, Allie James, Jodie Taylor, S. C. Peel, Roland Moore, E. O. Whitehurst, Ebbie Williams and Alice James, of Everetts, N. C., were Washington visitors yesterday. They motored from their home to this city.

JUST RECEIVED AT THE BAZAAR, on Market street, a full line of ladies and misses' sample suits, latest styles and colors; will be sold cheap while they last. 11-22-13
