### Bleese Beaten For U. S. Senate

#### LATE RETURNS INDICATE THAT A SECOND PRIMARY WILL NOT BE NECESSARY IN SOUTH CAROLINA.

Columbia, S. C., Aug. 27.—Additional but yet incomplete returns from all counties of the balloting for United States Senator in the first Democratic primary of this State gave Governor Cole L. Bleese 48,000 and Senator E. D. Smith 65,000 out of 117,000 votes reported. The returns received showed Senator Smith maintaining his majority rolled up by the returns last night, which is now sufficient to renounce him over his three opponents without the holding of a second primary. Approximately 25,000 votes are yet to be returned.

Senator Smith received heavy votes in counties which two years ago went largely for Bleese and in only three of the nine counties returning completed counts did the governor receive majorities. Each of those counties polled a relatively small vote.

In the race for Governor, Robert A. Cooper held a majority of about 8,000 votes over Richard I. Manning and John G. Richards, his nearest opponents, each of whom had received 19,500 at an early hour. Maintaining his safe majority, it appeared that Cooper would enter the second primary. The other eight candidates for Governor appeared hopelessly out-distanced.

One of the most remarkable surgical operations ever performed in Washington took place at the Fowle Memorial Hospital Tuesday by Dr. H. W. Carter, of this city.

Last Friday the 13-months-old child of Addie Collins, colored, of Hyde county, swallowed a coffee bean which lodged in the child's windpipe and subsequently went down as far as the entrance to the lungs. From Friday until Tuesday the child suffered immensely and would have died within a short time if it had not been removed. Immediately after the child was brought to this city and examined by Dr. Carter he was immediately carried to the hospital and the coffee bean removed. The surgeon made an incision in the throat and removed the cause of the trouble. The bean was a whole one and when removed was intact.

The little sufferer is now getting along nicely and strong hopes are entertained for his recovery. This is a rare operation and shows Dr. Carter's skill as a surgeon.
