Fort Worth, Tex., Sept. 8.—With representation from more than two-thirds of the States in the Union, the eleventh annual meeting of the Farmers' Educational and Co-Operative Union of America came to a close in this city today, after a three days' session. The keynote of the convention was the action of the body in voting to ask direct aid from the government in the present crisis which confronts the American farmer as a result of the titanic struggle across the water. A plan was formulated whereby the Federal government will be asked to tide the farmers over the emergency, and a committee was appointed to go to Washington to consult with Federal authorities relative to the situation.

A high tribute was paid to the work of Peter Radford by national president, C. S. Barrett, in his opening address to the convention, who declared that it was the Radford type of men which keep one's faith sound, his courage high and renews his faith in humanity. He stated that Mr. Radford had been of invaluable assistance to him in his work and that his wise counsel and suggestions had materially assisted him in the solution of problems confronting the national work.

ABILITY, NOT QUANTITY, PAYS IN FARMING.

No farmer gets rich by the quantity of production. It is the price he gets for his products and economy and business judgment displayed in management that makes the farmer wealthy.

We cannot pass a law that will increase the price of products or reduce the cost of plowing the land and marketing the crops. We must depend upon factories and transportation facilities for marketing our products and upon improved mechanical appliances and the business ability of the farmer to raise the cost of production, and to more intelligently market his products.

London, Sept. 8.—British newspapers date on giving advice to the public in times of stress. Here is a sample, prominently displayed "boxed" in one of the London afternoon sheets: Don't hoard gold; don't hoard provisions; don't waste either; don't economize at the expense of your staff either; and poorer neighbors; don't restrict credit; don't be panicky about disasters, inevitable in a great war; don't be cook-a-hoo about successes; don't be rude to German residents; don't believe panicky headlines; but instead—help your country by enlisting, by enrolling as special policemen, by giving all the work you can, by help to feed the poor.
