TIME FOR PATRIOTISM IN ITS BROADEST SENSE AS TO PRESENT CONDITIONS

CELEBRATION IS POSTPONED

PEACE PACT IS DELAYED DUE TO THE PRESENT WAR IN EUROPE—PRESIDENT STATES POSITION.

(By the United Press.)

Washington, D. C., Sept. 10.—President Wilson in announcing his position on the war revenue tax favors a tax on all commercial papers.

The war bill, as agreed upon, will include the special tax on three per cent of the value of freight shipped: wine 29 cents per gallon, beer 59 per cent more than now. There will be no other taxes in this connection.

The centennial celebration of the peace pact between the United States and England is to be postponed on account of the present European war.

The Simonds Manufacturing Co., of Fitchburg, Mass., has the following to say of business conditions in the United States:

We believe in our country. We have faith that the United States of America will continue to be the most prosperous nation in the world. Although panicky people pinch tight the might dollar, fearing disaster for this country on account of the European war, our crops are the most bountiful in years. These crops must be harvested. The mills will grind the wheat and corn; the railroads will transport the flour and meal; starving nations will find some way of getting these and the wealth received in return will be spent at home.

As 5 per cent of our country's products are all that are exported, we are likely to suffer a great deal more from the abnormal tightening up of the purse strings of our merchants, our manufacturers, and our consumers, than from loss of European business.

Let us all have faith in our country. Let us go on in a normal way. We are confident of peace in our States. We are practically sure of a larger market from outside that we have ever had before. If we can supply the wants of South America at this crisis in European conditions then we have built a new outlet for our products. A market hitherto European and one estimated at one billion dollars a year in volume will be ours. It is an opportunity; moment try to take advantage of this market and to send their real men to make business connections, establish agencies and acquaint their houses with the wants of South America. Their orders should be filled understandingly in accordance with South American ideas, with the intention of pleasing the trade heretofore going to European nations.

We believe that now is the time for patriotism in its broadest sense—that is, to take advantage of present conditions by pushing ahead everything American, demanding American made goods for ourselves and offering them to meet the requirements of our South American friends in such a way as to supply their needs from their own hemisphere.

Let us all work together in a natural, normal, and sensible way. Then we have faith to believe that in six months from now the wheels of industry will all be moving and this country will be on the eve of a period of prosperity the like of which few Americans have ever seen.
