DEMOCRATS SAVED BY WILSON.

The havoc wrought by the Republicans of many States in the Democratic representation in Congress was very great. A majority in the House of about 145 has been reduced to a margin large enough for all practical purposes, but so narrow as to compel the most serious reflection.

FOR GOOD MEN AND WISE MEASURES.

Thoughtful Democrats will welcome, rather than regret, the evidence afforded by Tuesday's election that Maryland is no longer a one-party State, and that the country is in no danger of becoming a one-party country.

ECONOMY DUTY OF CONGRESS.

The Hamilton Herald offers this timely suggestion to President Wilson, though we have no doubt as to his willingness to heed it.

WHY CABBAGES COST SO MUCH.

Some of the causes which may be responsible for a large part of the high cost of living are revealed by tracing the steps in the progress of a head of cabbage from the farm where it is grown to the dinner table of a wage earner, where it is finally eaten.

The cabbage is raised by a farmer in Connecticut. A comparatively small farmer will send 1,500 to 2,000 such heads of cabbage to New York. For one head he receives 1 1/2 cents.

Then the head goes to the commission merchant. He lives on Riverside Drive, pays \$2,000 a year for his apartments and keeps an automobile. He spends \$1,000 a year to live.

Next the cabbage is sent to the wholesaler. He lives on West End Avenue, pays \$1,500 for his apartment and keeps an automobile. His living expenses are \$4,000 per year.

Finally the cabbage goes to the consumer. He lives in an apartment for which he pays \$10 a month; he rides in the trolley car or the subway; he spends all he can make or a little more to live and he pays 13 cents for the head of cabbage which brought the farmer who raised it 1 1/2 cents.

FEED DRY GRAIN TO CALVES

Digestive Organ of Young Animals is Small and Frquent Feedings of Small Amounts is Best.

In feeding grain-milk calves the grain needed to supply the missing fat may be corn, barley, oats, or a mixture. Occasionally a feed lot is allowed alfalfa or clover hay on hand, and to these he adds instead meal, cooked meal of gluten feed. These are all high in protein, and when any one of them is combined with protein, milk and alfalfa—both high in protein—an unbalanced ration results and causes other digestive troubles follow.

- Feed approximately one pound of grain for every three pounds of milk produced per day.
- Give the cows as much feed as they will consume without gaining weight.
- Feed some succulent feed, such as corn silage or roots, to make the ration more palatable.
- Be prepared to supplement the pasture by feeding silage when the dry cow returns.
