TUESDAY, DECEMBER 15, 1914. THE PREFERENTIAL PRIMARY.

Washington had its first experience yesterday with the preferential primary and we are of the opinion that if the citizens can have their choice it will never have another like experience.

Republicans and non-residents were voted to the number of about 290. We do not believe this was done with the knowledge of the pollholders.

The rules which had been laid down to avert the primary were broken and we believe that the candidates were justified in bringing them to the absolutely real situation.

The vote was the heaviest Democratic vote polled in this district since 1902. We did not examine the records prior to that date.

The Democratic vote in the district, including the whole of the town and Wauwatomo in 1908 was 329.

The vote was 329, or 150 more than in the Democratic vote cast in the three figures would indicate that a number of people voted who were not entitled to do so.

Primary, as conducted in the district have proved to be more and have operated mainly to the benefit of the Democratic party.

There must be some good reason why a Congressman from the district should be elected a primary.

It is not possible to draw a line of demarcation between the two parties. There is no law regarding such primary, therefore the expense would be heavy upon each candidate.

Results fourth, he did not care to promote strife in the community by voting such a candidate both in the district and as the representative.

It is in his responsibility rests upon him to make a recommendation he will make a recommendation which he hopes will be acceptable to the department as reasonably satisfactory to the public.

of the office, while he does not hope to satisfy every one, he will recommend a man who will make an excellent postmaster at the capital of the State.

In our opinion Congressman Poy has adopted the proper course and should receive the commendation of his constituents in adhering to such a policy, because if those who have spent both their time and money in laboring for the success of the party are not to be rewarded when the party has something to offer, then what encouragement is there for us to enter the party service.

TO HAVE PART. That North Carolina shall have a part in the government health exhibit at the Panama-Pacific Exposition next year at San Francisco.

the request from the Children's Bureau of the United States Department of Labor. The State Board of Health has been called on to contribute a model village, a part of the better health exhibit, as a representative feature of its better health work.

This village, in which the number of births in the homes is shown by lighted windows and the number of baby deaths by the lights going out at the windows, was brought to the notice of the children's bureau through North Carolina's recent health exhibit at the American Public Health Association at Jacksonville, Florida.

The model, that has not failed to attract national attention, is originally with the State Board of Health, being the exclusive work of that board.

TEA TAKES WINE'S PLACE. Champagne's Vintages Exhausted, French Soldier Writes—Slaughter by Bomb.

Paris.—The Temps has received the following letter, written in pencil, from the front:

"I have been running across fields from one destroyed village to another in the midst of the odor of corpses which persists owing to the fact that the graves of those killed in battle were not dug sufficiently deep."

"Yesterday we took three villages with the bayonet."

"The German companies now average only 35, notwithstanding the reinforcements which they have received. They are dying of hunger. Ten-day bombs fall on them daily. On an average four persons are killed by each bomb. Where our 75 millimeter shells are well placed they are estimated to account for 30 dead per shell."

"All the wine in Champagne has been drunk and we are now reduced to tea. I sleep here and there, wherever I am, and would find it disagreeable to sleep in bed. We eat well and the food is excellent. We are all in the best of spirits."

In Training While at War. London.—Soldiers at the front may be qualifying for civilian employment later on in ways that little dream of. According to Lord Granville, the duke of Wellington "had great confidence in the capacity of an old soldier to turn his hand to anything."

Mr. Arbuthnot informed Lord Granville that he had taken as gardener a color-sergeant of the Coldstreamers. Lord Granville said he supposed he knew something of gardening.

"Oh, yes, he robbed several orchards in France."

GERMANY IS ALWAYS READY. Chicago Man Relates an Incident Illustrating Germany's Preparedness for War.

Chicago.—Much has been said about the preparedness of the Germans for war. A Chicago man relates this incident.

More than two years ago a suburban German officer of the army was showing an American some things about the German way of being always ready to mobilize.

They camped an army wagon fully loaded with harnesses were dangling from its rear.

"Where are your horses?" asked the American.

"For this particular wagon," replied the German, "one of the horses is at John Smith's farm, the other at the farm of John Jones. The shoes that you see here have been fitted to those two horses."

Bar White Horses. New Orleans.—The color line has been drawn on the American white horse by the French government.

According to officers of the British steamer Anglo-Bolivia, which has just sailed from here with a cargo of 1,048 horses and mules for the French army.

The horses included in the shipment were exclusively bays and blacks. It is said that white horses afford good targets for the marksmen.

Censor Leaves Headlines. Paris.—After passing through the censor's hands, the intrinsically appeared recently with headlines in the first column of an article on German trade-marks.

The signature of the writer, Leon Bailly, also appeared, but the entire text of the story was missing. The column was simply blank.

GENERAL FARM NOTES. A garden must be rich, mellow and kept clean.

Gauge your herd by the roughage and feed you can produce on your farm.

It will not pay you with the average cows to buy over 10 per cent of your feed.

You can cultivate your grass crops only by preparing the soil well before sowing the seed.

ANIMAL FOOD FOR POULTRY. Chicks, Ducklings, Poultis and Goslings Must Have Meat of Some Kind to Thrive Well.

Perhaps you have never paid much attention to the natural appetites of fowls. No matter whether it be chicks, ducklings, poultis or goslings, they have a strong natural appetite for animal food.

In fact, all nestlings of all birds we can now think of prefer insect or animal food. The tendency to feed on grains, seeds and fruits develops later in life.

Experiment stations have demonstrated that a chick or duckling will not thrive and develop on grain alone—no matter how well balanced the ration—as upon grain and meat in some form.
