WASHINGTON N. C MONDAY A

Washington, D. C., Feb. washington D. C. Peb. 1.—The results of a government investigation into the measures required to prevent the introduction of the pink bolk worm into the coston States indicate that it will be necessary to adopt the restrictions which were proposed and diphused at a public hearing heid at the Department of Agriculture in Washington on May 15, 1914. In brief, the measures then proposed were: (1) An order placing similar restrictions on the importation of lint cotton to those which now apply to nursery atook, to that the entry of such cotton may be limited to the northern. on may be limited to the northern A quarantine states. (2.) A quarkytine order regulating the movement of import-ed lint cutton from the northern to the cotton growing states. (8.) A quarantine order restricting the order quarantine order restricting the novement of Hawaiian cotton) After the hearing action

be obtained in regard . Abn could ration of foreign lint there mills. It w e the utilito test the effica-& also desired from this oot . of the picker waste of certain ship and to make test done of disinfecting bal which have been suggestcom the reports received by Department of Agriculture

that weither disinfection of burning can be relied upon to prevent the introduction of the peer in the burning of the picker where siderable larity was forbd. In many cases the enforcement of this requirments was enfrusted to subordinates who were either indiffer ent to or ignorant of the danger from aegligence. In the opinion of the department, therefore, 1, 16 thoroughly unsafe to rely up in the all owners to have sr ch, material destroyed. Even if the case, however the the danger there would still be the danger dat the pink boll worm might excare from seeds adples who hear the surface of the

sog time. There is an ever er flanger in cotton which has been opened and put through the bale breaker and then left to condition for several days befor being cleaned.

Disinfection of the bales of line as found to be equally unsatisfactory. Fumigation in fact had to be thandoned on account of the ex-Injuring the fiber. It was found the center of the very dense Egyptian bales was a practical im-ossibility. The destruction of the usect by heat is not believed to be dvicable on account of the incre if danger or fire in storage ware-

ms, therefore, that if the ink ball worm is to be excluded rom the Diffied States the mean ed at the public houring res proposed at the public houring I May 15th must now be adopted dese measures will place no seri-or handicap on the importation and illigation of foreign cotions tanufacturing districts north he cotton growing states. The ad-The adotton under permit will proceed a present but will be limited to relude New York, Boston, and San he United States

The purpose of the second m re now proposed is to regulate the overest of the imported cotton ito the cotton growing states after

has been admitted intothis outhern mills it will be require or 24 months, a period which wi inects which may have been con that in the seeds have all perial d. This means, for example, the he Egiptian crop of 1914 would ot be available for southern mills util October 1916.

"The necessity for this long period of alorage arises from the fact that operiments have shown that not it of the larvae of the pink bot your transform entring the first minute following harrest, and a prain percentage one continue ar
