Where She Minded It.

When illicit distilling was common in the Highlands there was an old man who went about the country repairing whisky-pots. The saucer next him one day, and, furlining, that he had been doing repairs at no great distance, asked what he would take to reform him (the gauger) where he had repaired the last whisky-pot. "Oh," said the old man, "he'll shut his half a crown." "Done," retorted the gauger. "Here is four money, but be careful to tell me correctly." "Och, the'd no tell the gentleman a lee. I must mended the last whisky-pot where the hole was."

The United States is proving to the world how inconsequential are those things which have been felt to be paramount in the building up of a nation, such as military power, and throwing forth nations along the border, for business is something that concerns individuals and the home welfare, and requires no industry, which is another name for "Americanization."--New York Times.
