Getting Rid of Sparrow Pest.

Nowhere in the English province included among the birds protected by law, and as individuals and flocks have an extremely narrow range, each flock occupying one locality to which its activities are chiefly confined, they are easily exterminated. When a place has once been cleared of them it will be some time before it is reoccupied.

Where's the Wheels?

Two-year-old Harry had never seen a live lamb, his only knowledge of that animal being derived from a toy one on wheels. While visiting grandfather on the farm he was taken to the sheep pen to see the lambs. After looking at them for a few minutes he looked up at his grandfather with a puzzled expression, and asked: "Where's the wheels?"

Trapping Sparrows.

In England sparrows are trapped with a sieve, one end held up by a short stake to which a long string is tied. The trap is baited with bread crumbs, oats or wheat. The birds are permitted to eat the bait until a number have gathered under the sieve, when the cord is pulled, removing the stake and allowing the trap to fall over the birds gathered under the sieve.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

JUDGE HAS NARROW ESCAPE

Dumb-Bell Exercises Arouse Suspicion That He Is Communicating With Enemy.

London.—An English judge had a narrow escape from arrest on the ground of signaling to the enemy. He was taking a short holiday on the East coast, and, as is customary with him, was indulging in a little dumb bell exercise before retiring to rest. The movements of his arms behind the red blind of his bedroom attracted the attention of the sentries on the cliffs. They thought someone was signaling and hastened to the hotel to capture the culprit. For some time they refused to believe the judge's explanations, and it was only on being shown the visitors' book that they

Earl Escapes Germans.

London.—Disguised as a Belgian refugee, the earl of Leven and Melville, wounded in the thigh, escaped from a German hospital through the German lines, crossed Holland without a passport, and reached London.

NOTICE OF SALE.

Under and by virtue of the power of sale contained in a certain deed of trust, executed to Edward L. Stewart, Trustee, by J. C. Cayton, and Lorena Cayton, his wife, and W. H. Prescott, and Fannie Prescott, his wife, which said Deed of Trust is dated January 21st, 1914, and is duly recorde in Book 179, page 332, Beaufort county records, and is hereby referred to, the undersigned Trustee, will, on Monday, the first day of March, 1915, at 12 o'clock noon, at the Courthouse door of Beaufort county, offer for sale, to the highest bidder for cash, the following described real and personal property, to-wit:

That certain tract or parcel of land, lying and being in the county of Beaufort, State of North Carolina, Richland township, beginning at G. W. Lee's corner in the Hollis line, and running with said Lee's line S. 87 1-2 East, Fifty feet; thence S. 2 1-2 W. Twenty-five feet; thence N. 87 1-2 W. Fifty feet to the Hollis East line; thence with said line N. 2 1-2 E. to the beginning, containing 138 square yards, and well known as the E. C. Cayton store site, which said site was conveyed to E. C. Cayton by Will Dunn a little over three years ago.

Also that certain stock of goods, wares, merchandise, fixtures and book accounts located in the store building hereinbefore described, and being the only stock of goods, wares and merchandise fixtures and book accounts owned by parties of FIRST PART.

Demand having been made on me by the holders of the notes secured by said Deed of Trust, this sale is held to satisfy said indebtedness.

This 27th day Jan. 1915.

EDWARD L. STEWART,
Trustee

1-29-4wa.

NOTICE OF SALE.

Under and by virtue of the power of sale contained in a mortgage deed executed by Thomas Crawford and wife, dated April 24th, 1914, and duly recorded in the office of the Register of Deeds of Beaufort county in Book 177, page 439, which is hereby referred to, the undersigned will on the 22nd day of February, 1915, at 12 o'clock noon, at the Courthouse door in Beaufort county offer for sale to the highest bidder for cash, the following described real estate, to-wit:

Beginning at James Smith's corner, and running with his line to a gum in Brown's run; thence to the Crawford ditch; thence with said ditch to the old road to the beginning, containing eleven and three quarter acres, more or less.

This 20th day of Jan. 1915.

EDWARD L. STEWART,
Mortgagee.

COOKED FEED FOR THE HOGS

Practice Has Been Largely Abandoned Because Digestibility Has Been Reduced—Potato Is Exception.

(By G. R. SAMPSON, Oregon Agricultural College.)

Cooking feed for swine has been largely abandoned, since the digestibility of most feeds is diminished by cooking. The potato seems to be an exception to this rule. When cheap enough to be fed to pigs, potatoes will stand the expense of cooking and pay a profit if installing equipment does not make too large a proportion of the feed cost. At the present time one hardly seems justified in installing an expensive cooker for potatoes, since ordinarily potatoes are more valuable for human than for pig feed. Other crops also usually furnish more nutrients at less cost per acre than potatoes. Steaming is more desirable than boiling potatoes, since the purpose of cooking is to decrease the water content and burst the starch cells. If potatoes are boiled the water should be drawn off and the potatoes left over the fire long enough to give them a dry and mealy appearance when they split open.

GROUND WIRES SAVE STOCK

Gives Considerable Protection From Lightning and Is Profitable Investment for Farmers.

(By FRANK M. WHITE, Wisconsin Agricultural College.)

Grounding fence wires affords considerable protection from lightning and is a worth while investment for farmers.

As hundreds of valuable animals are struck by lightning in this state every summer, many of the casualties being directly due to currents carried along pasture fences, such advice is particularly timely.

To secure the best results ground wires ought to be placed about one hundred feet apart and closely stapled to the post, so as form a contact with every one of the fence wires. The ground wires should also extend slightly above the fence post, and, like a lightning rod, should penetrate the soil far enough to reach moist earth. No. 8 or 9 wire is most satisfactory for this purpose.

Makes $16,000 on Seed Wheat.

Atchison, Kan.—Henry Merwick, an Atchison traveling man, whose territory includes several western Kansas counties, says many merchants in that section made money this year by staking farmers to seed wheat last fall, to be repaid on a basis of one-fourth the crop. The expense of seeding is about two hundred dollars a quarter section. One merchant in his territory made $16,000 this year.

A PERSONAL STATEMENT.

There are so-called "honey and tar" preparations that cost 25 cents or half as much but sell at the same price as the original and genuine Foley's Honey and Tar Compound. We never offer these imitations and substitutes. We know you will buy Foley's whenever you need a cough syrup, if you have ever used it. People come long distances for the true FOLEY'S—now thirty years the leading remedy for coughs, colds, croup, whooping-cough, bronchial and la grippe coughs. For sale at Davenport's Pharmacy.

Experiments With Shelled Corn and Alfalfa Hay Furnish Valuable Comparison for Breeder.

W. C. Coffey, chief in sheep husbandry at the University of Illinois, has completed his experiments on the proportion of shelled corn and alfalfa hay for fattening Western lambs. The experiment also furnishes a valuable comparison of the feeding and market qualities of wether and ewe lambs and shows the effects of early and late shearing on the feeding operations as a whole.

Western lambs which had been purchased on the Chicago market about a year ago were used in the experiment. These were divided into two main lots. Group one was fed the largest quantity of corn that it was possible to get the lambs to consume, with just enough hay to keep them healthy and thriving. Group two was fed a large amount of hay, with just enough corn to put them in choice market condition.

In experiment or group one, four lots of wether lambs were fed as nearly as possible like two of the lots of wether lambs. In experiment No. 2 three lots of lambs were sheared early and three were sheared late.

In each experiment the lambs receiving the largest proportion of corn made the largest gains. The difference between wether and ewe lambs in feeding and market qualities were slight. Shorn lambs ate more feed than unshorn lambs in warm weather, but there was little difference between them in gains and no difference in market quality. Lambs left in the fleece until the end of the experiment sheared from 2 to 2.75 pounds per head more than early-shorn lambs, and on this account returned more profit.

COW IS USUALLY UNDERFED

Idle Animal of Any Sort Will Not Pay for Extra Feed—Feed According to Accomplishments.

A man is generally paid according to what he earns. Why not apply the same rule to the dairy cow? The good cow is usually underfed, while the poor one is given more than she deserves or can pay for. Feed the live stock according to what they do and what is expected of them. The idle animal of any sort or a dairy cow that will not pay for extra feed, should only receive as much feed as is necessary to maintain it in the condition desired. The young animal should usually be kept growing, while the good dairy cow should have her feed increased, over and above that given others, so long as she will continue to pay an increased net profit.

NOTICE OF SALE.

Under and by virtue of the power of sale contained in a Mortgage from Jarvis Pierce, Isaiah Pierce and Mary Pierce, dated November 28th, 1913, and recorded in the Register's office of Beaufort county, North Carolina, in Book 158, page 273, the undersigned will sell at public auction for cash before the Courthouse door of said county on the 8th day of March, 1915, at 12 o'clock noon, the following described real estate, to-wit:

Beginning at a short leaf pine, corner of the Roy and Bryan Patrick land, crossed public road running thence South 20 1-2 West 31 poles to a stake, thence South 5 East 110 poles to a post Oak; thence North 66 East 89 poles to a corner in the fork of the public county road in the aforesaid Roy and Patrick line; thence with the main public road to the beginning, containing by estimation 22 3-4 acres more or less, the same was conveyed by Benj. Patrick by deed recorded in the Register's office of Beaufort county, Book 90, pages 190-191 to Linsy Ann Pierce and others, said deed is herein referred to for a fuller description of said land. It is the purpose of this mortgage deed to convey all the right, title and interest of the parties of the first part, in the above described land which is undivided.

This 6th day of Feb. 1915.

FARM ANIMALS

BIG POLAND CHINAS POPULAR

Chief Characteristics Are Early Maturity and Rapidity of Fattening —Also Good Rustlers.

For many years Poland China hogs were the leaders in the corn belt. Originating in Ohio in 1872, their good points were rapidly appreciated, and before many years Poland Chinas were established in every section where hogs were raised for market in a large way. The early Poland Chinas had much to commend them. Their chief characteristics were early maturity and rapidity of fattening. The combination of the various strains of blood Big China, Poland, Byfield, Berkshire, Irish Grazier on common stock resulting in this breed, was such that a hog could be matured much earlier, and much cheaper than was formerly the case. Moreover, they were good rustlers, did not require pampering, and, as a matter of fact, were practically frost proof. So it came about that in a marvelously short time the praises of Poland Chinas were sung on every hand and the demand as breeders was practically unlimited.

They were of good size (sows 500 pounds, boars, 600 pounds and over), smooth, with moderate bone, large ham and shoulder, producing a high percentage of the highest grade of lard and edible meat of remarkably good flavor and quality. They dressed out well and consequently were popular with packers. Poland China raising became a fad. The sows were prolific, not unusual for average litters to contain six or eight pigs, in individual cases run up to 10, 12 and 14. The pigs were active from the

Fine Specimen of Poland China Breed.

beginning, began to eat feeds quickly, grew with remarkable rapidity, so that by the time they were eight or nine months old they were ready for home butchering or for sending to the market. This was an eye-opener. The older and well-known breeds required much longer time for maturity.

COW'S SKELETON SAVED HIM

Arkansas Youth Had Been Convicted in Court of Stealing Animal.

Little Rock, Ark.—The finding of the skeleton of a cow in a woods in Howard county saved William Kennedy, twenty-four, from entering the penitentiary. Kennedy had been convicted of stealing the cow, and sentenced to one year.

He was allowed to come to Little Rock alone, and was about to go to the penitentiary to surrender, when a delegation of friends brought him the good news.

FRANCE HAS NEW AIR BOMB

Liquid Missile Can Be Used Three Hours After Filling—Guarded With Secrecy.

Paris.—A liquid air bomb has been perfected which can be used in three hours after it has been filled. Considerable secrecy has been observed in regard to the bomb, which M. Paulley, the academician, made practical from the inventor's design.

Feed for Weaning Colt.

Often the pastures are short and dry when the young colt is weaned. There is no food so nourishing to the foal as is green grass. If a late pasture is available, the foal should have free access to it. If the late pasture is not at hand, wheat bran should be fed twice each day, with good clover hay.

NOTICE OF SALE.

By virtue of the power of sale contained in a mortgage deed executed by Benj. Singletary and wife to the undersigned, dated November 29, 1904, and recorded in Book 152, page 203 Register's office of Beaufort county, and herein referred to, I will offer for sale to the highest bidder for cash, at the Courthouse door of Beaufort county on Tuesday the 2nd day of March, 1915, at 12 o'clock noon, the following described land conveyed in the said mortgage deed, to-wit:

A certain tract of land situated in Washington township, Beaufort county, North Carolina, and adjoining the lands of W. R. Ellis and other and others and being the identical two tracts of land conveyed to said Singletary by W. R. Ellis, by deed dated November 29th, 1904, and recorded in said Register's office, and the said deed is herein referred to for a full and complete description of the said two tracts of land.

This Jan. 29th, 1915.

WOUNDED WANT LOVE TALES

German Hospital Inmates Are Tired of Reading Literature About War.

Amsterdam.—"What kind of books shall we send to the hospitals?" was the question dispatched by a Berlin charitable organization to the head of one of the German field-hospital divisions.

The answer came back promptly: "Whatever you send, don't send war literature. The wounded like best of all a good love story. The young men, especially, are rather tired of hearing about the war."

"It is better for them, too, that they should have a rest from that sort of thing."

LEAP RESTORES MAN'S MIND

Insane Prisoner Jumps From Third Floor, and Shock Cures Him.

Superior, Wis.—When John Anderson, a laborer, leaped from the third floor of a local hospital recently he was a lunatic.

When he got up, carefully brushed the snow from his clothes, and sauntered back into the hospital, uninjured, he was sane.

Anderson was being detained in the state hospital for the insane. He worked his way out of a straitjacket before he made the leap.

The shock restored him to normal mental condition.

NOTICE OF SALE.

Under and by virtue of a Mortgage dated September 17, 1914, from Daisy A. Wall to the undersigned F. T. Woolard, which is recorded in the Register's office of Beaufort county, North Carolina in Book 179 page 16, the undersigned will sell at public auction for cash before the Courthouse door of Beaufort county N. C., on the 12 day of March, 1915, at 12 o'clock noon, the following described real estate, to-wit:

A certain piece or tract of land lying and being in Chocowinity, township, Beaufort county, State of North Carolina, and described and defined as follows, to-wit:

That certain piece or parcel of land on which Daisy A. Wall now resides lying and being in the town of Chocowinity, N. C., the same being composed of four lots, from what is known as the Perry Place; two of the said lots having been conveyed to her by W. E. P. Patrick and the other two lots having been conveyed to her by Hill and Jones, both the said deeds being recorded in the Register's office of Beaufort county, and are herein referred to and made a part of this conveyance.

This 11th day of Feb. 1915.

F. T. WOOLARD,
Mortgagee.

NOTICE OF SALE UNDER DEED OF TRUST.

Under and by virtue of the power of sale contained in a certain deed of trust executed on February 8th, 1909, by J. H. Grider to W. T. Rudnell, Trustee for Lena B. Rudnell, which said deed of trust is recorded in Book 154, page 583, of the Beaufort county records, which is hereby referred to for particulars, default having been made in the payment of the debt secured by said instrument, the undersigned mortgagee will, on Friday, the 12th day of March, 1915, at 12 o'clock noon, offer for sale to the highest bidder for cash at the Courthouse door in Beaufort county, the following described tract of land:

A certain tract of land lying and being in Richland township, Beaufort county, beginning on the Sandy Landing road at Wm. Mourning's corner, thence N. 2 1-2 E. 5.39 poles to said Mourning's corner, thence N. 86 E. 89.55 poles to a sweet gum, T. D. Midyette's corner, thence along said Midyette's Roberson's and Mooney's line N. 42 1-4 W. 226.40 poles to a corner in the Savannah, thence with Roberson's, Bonner's and A. D. Peacham's line to a large pine in the head of Second Cut, A. B. Beacham's corner, thence S. 20 1-2 W. 10.36 poles to the Hickory Point road, thence with said road S. 42 W. 101.24 poles to a corner in D. V. Warren's line, thence with said line N. 75 1-4 E. 26 poles to another corner of said D. V. Warren's corners, thence parallel with the west ditch of the Savannah field S. 10 1-4 W. 100 poles to the Sandy Landing Road, then with the Sandy Landing road to the beginning, containing 285 acres.

It being the same land conveyed by deed to J. H. Grider by Mrs. Lena B. Rudnell on February 9th, 1909.

This Feb. 6th, 1915.

IMMENSE DAMAGE TO COTTON

Nearly 10,000,000 Bushels of Entire Territory Infested During 1914 by the Boll Weevil.

The boll weevil did about thirty million dollars' worth of damage to the cotton crop in 1914, as estimated in the new report of the entomologist. Nearly eighteen thousand square miles of new territory became infested during the year. Every effort is being made to control these depredations, particularly by the use of powdered calcium arsenate of lead, but the dusting of cotton squares and bolls in Arkansas of lead was tried with varying results and the economy of the process under practical plantation conditions today remains undecided.

HOW TO PLANT SUDAN GRASS

While Seed Is Scarce Best Plan Is to Plant in Rows—Experiment at College Station.

As long as the supply of sudan grass seed is limited, experts declare it is best to plant it in rows three to four inches apart so that it can be cultivated. If planted in this manner, from two to three pounds of seed are required per acre. In western Texas, where the moisture supply is limited, sudan grass should always be planted in this way, as without cultivation it cannot be expected to make a heavy yield. In that section throughout the humid section of the South, sudan grass may be sown broadcast at the rate of fifteen to twenty pounds to the acre or with a grain drills, an ordinary grain drill being used, at the rate of from ten to twelve pounds an acre. One of the most successful experiments this year at College Station, Tex., was made with three-fourths of a pound of seed planted in rows thirty-six inches apart. It yielded four tons per acre. It was cultivated in the same manner as corn. In this respect sudan grass differs from kafir and milo, which are cultivated in much the same manner as sorghum. It is distributed. It was cultivated in like sorghum or kafir.

This seeding forces sudan grass plants to sucker heavily and thus make a tremendous growth of stalks. There are instances where one plant and as high as 600 stalks all having grown from one seed. In this respect no other forage plant can be compared with sudan grass.

Skim Milk for Pigs.

It is usually estimated that 100 pounds of skim milk are worth as much as a half bushel of corn for feeding purposes; that is, if corn is 60 cents a bushel, 100 pounds of skim milk are worth 30 cents. In feeding pigs give three pounds of skim milk to one pound of grain. Skim milk contains 3.9 per cent protein, 5.2 per cent carbohydrates and about 91 per cent of it is available nourishment.

Feeding Silage to Cows.

Feeding the silage tends to relax the cow's system, like grass in the summer time, therefore, she is more susceptible to extremes of heat and cold than the cows that are kept exclusively on dry fodder and they should not be exposed to chilly winds but kept warm and comfortable.

NOTICE OF SALE

Under and by virtue of the power of sale contained in a certain mortgage deed executed to the undersigned by R. H. Reaves, which said mortgage is duly recorded in the office of the Register of Deeds for Beaufort county in Book 183, at page 10, and is dated the 3rd day of September, 1914, and is hereby referred to, the undersigned will on the 22nd day of February, 1915, at 12 o'clock noon, offer for sale at the Courthouse door in Beaufort county, to the highest bidder for cash, the following real estate, to-wit:

Being lot No. 2 as laid off by W. F. Baugham which was as follows: Lot No. 60 McNair town, was laid off into 6 lots of 35 feet front, by 95 ft. deep (15 feet being for the alley to be used in common by those who sold the six lots to, or to their heirs and assigns) and this lot No. 2 lies between the corner lot deeded to R. M. Hodges and the third lot sold to Blount Gordon. The lot No. 60 was by John H. Staton sold to Baugham & Bragaw, by deed dated 10th day of November, 1892, and recorded in Book 82, page 162, Beaufort county records, and Wm. Bragaw conveyed his one-half interest to Wm. F. Baugham by deed dated January 3, 1895, and recorded in Book 89, page 110.

This 22nd day of Jan. 1915.
