"JUST THE THING."

A tailor's work is sedentary. That is why most tailors suffer from constipation. G. W. Robinson, Wichita Falls, Tex., says: "I find Foley Cathartic Tablets the most delightful, cleansing cathartic I have ever taken. They are just the thing. They keep the stomach sweet and the liver active, drive away headache, dizziness, tired feeling, biliousness, bloated and other results of clogged bowels. Prompt and effective, without griping or pain. Most people praise them for the light, free feeling they give." Davanport Pharmacy.

Greenville—When Greenbaum & Co., Greenville tailors, suddenly closed their place, Snyder Evans, a young white man, was left wondering when he could get a suit he had left with them. Greenbaum is said to have been in partnership with a tailor of Kinston. Several people had trouble in getting deposits on suits back.

**My Name Is Coffee I Fool the People**

All the people can't be fooled all the time, but I've been pretty successful in fooling part of them, although more and more, I am sorry to say, they are getting wise to my pretensions.

How do I fool them? I'll tell you.

When scientists say I am not a food, I tell the people that coffee "is a food," and when drunk "with hot milk—a meal in itself, we may say."

Then when the court says, "coffee is not a food," I trim my sails to the breeze and tell the people "there is no reason for supposing that coffee possesses any value as a food."

Nevertheless, to keep them coming, I tell them it is a "half food," "an encouraging contribution to human efficiency." And the people—some of them—fall for it.

When noted authorities say the caffeine in coffee is a poisonous drug and hinders digestion, I bring forward some chaps who say it "is not a poison;" "It is an aid, not a hindrance to digestion." This fools some.

But, there's been such a stir against me, especially by Postum, that I am hard put for arguments, so one of the latest things I am telling is:

"Beware of taking coffee with a lot of cream in it." It is the cream, I try to make it appear, and not the drug, caffeine, that makes a combination that "will in time lead to chronic indigestion and stomach, heart, and liver troubles." And some believe me—I hope.

But I whisper on the side to people who like cream in their coffee. "Coffee is always improved when cream is added to it." You see, I get them coming and going.

There's one safe way with coffee. Quit it, and for a pleasant, delicious, wholesome, nourishing beverage, use
