Washington, Nov. 22 .- Member of Congress who have already reached Washington have passed the word around that there is going to be a very hard light among the house leaders before Congress ever submits to the President's billion dollar national defense program. Not only will the administration be forced to ask the help and cooperation of Republican l'aders but it would not be surprising to many men here if Mr. Wilson is forced to accept a compromise, one entirely pleasing to ing the Minority Leader Jim Mann and his following

Probably the biggest setback that has b'en given the proposed plans as outlided by Mr. Wi'son was dealt last night when Speaker Champ Clark emerged from the White House and told newspaper men that he did not know what position he was go ing to take. He gave not the slight-est intimation that he would support the President's plan, and, according to those close to him, he said that there was no cause for any one to "get excited" over the war situation

Clark has been touted from the Atlantic to the Pacific by Republi can newspapers as being heartily in favor of the plans as outlined by the President: It has been stated by men who ought to have known bet ter that Clark was going to leave the speaker's rostrum and take per sonal charge of the President's fight ongine floor of the house. Another story freely circulated was to the effect that Clark was going to resign as appeaker and go out in the country and make speeches for the na tional defense propaganda. "Tommy rot," was the way the speaker an-awered these questions when questioned about them today.

Clark is not going to take the President's fight to the floor nor is he going to make speeches through-out the country in favor of the plan. He may vote for the measure after it has been trimmed down to a level where he can consistently support '1t.
