WASHINGTON, NORTH CAROLINA, MAY 9, 1916.

We note, with a sense of pain and unfeigned surprise that the New Bern Sun-Journal publishes the statement of one of its banks under the heading "The National Bank of New Berne." If one of the leading business institutions spells it that way, it is probably correct.

Next week will be the big week for Washington. The B. P. O. F. -which is supposed to stand for "Benevolent and Protective Order] of Elks, "but which really means "The Best People On Earth-are coming here, many hundred strong. Alright, you decorators! Get busy and let's have the entire city in holiday attire before the first out-of-town visitor gets here.

TRUE FRIENDSHIP.

Dr. Melton Clark, who delivered the baceaulaureate sermon at the high school auditorium Sunday night, took as the theme of his dis-course, "friendship." During the course of his remarks, Dr. Clark made the statement that many persons, when speaking of their friends. made the assertion that they "had dozens of friends; friends all over the State." He went on to show how little was taken into considera-tion when the word "friend" was mentioned and added that true and trusted friends were few.

In this assertion, there is no question but that Dr. Clark was right. A man is fortunate if he possesses three or four friends. Few men possess more than five or six. The majority cannot boast of more than two or three after they have theroughly gone over their list of

MEMORIAL DAY.

Tomorrow will be observed in Washington, with appropriate ex-Knowledge First. To know what should be defended is the first condition of successful de (ense.-Lowell ercises, as Confederate Memorial Day. It is a day which means much to the aged survivor- of the war between the States and the people of both city and country owe it to the defenders of the South to attend the exercises at the New Theatre and to cheer the greyheaded men whose ranks are growing thinner with each Memorial day.

These men represent the true spirit of the South and every true Southerner should consider it his duty to honor the few who are left of the many thousands already in their graves. They stand for Valor, Love of Home, and willingness to sacrifice themselves in order that their families might live in peace and contentment. They fought for the rights of the South and for the honor of the South. Do they then not deserve the love, the honor and the respect of all our citizens, whether Southerners or Northerners? And what better method is there of paying the old soldiers tribute than in being present at the exercises tomorrow and cheering them as they assemble in the ball and pass through the streets?

Why is man and woman, half the time, feeling nervous, despondent, worried; some days really incapaci-tated by lineas. If we all would practice inside-bata-ing, what a gratifying change would take place. Instead of thousands of half-side, anaemic-looking soula with pasty, muddy complexions we should take place. Instead of thousands of half-side, anaemic-looking soula with pasty, muddy complexions we should not be the source of the source see crowds of happy, healthy, rosy-checked people everywhere. The rea-son is that the human system does not rid likel each day of all the waste which it accumulates under our pres-cant mode of living. For every ounce of food and drike taken into the system nearly an ounce of waste material must be carried out, else it forments and forms ptoranne-like pplesons which are absorbed into the blood. And when you see them tomorrow, forget their appearance and try to imagine them as they wer- 55 years ago. These eyes, now almost worn out, were then steady and keen as they sighted along rifle barrel; those shoulders, now har with age and toll, were then throws back with pride and defiance; that slow and halting step was once the rapid and sure charge against an overwhelming number of the enemy. They were our here's then; they should be our heroes now. We owe much to their bravery and the least we can do is to be present at their annual meeting, when they pay tributs to the memory of their dead comrades.

VS It is impossible for both the Carranza and the American forers to guard discentize boundary and it is the casiest thing in the world for a small party of raiders to cross the river at some point that is not guarded, raid whatever town they wish, and make their return to the practically impregnable mesquite forests before pursuit can be started.

A States

The mere fact that border raids are being guarded against can never prevent these raids from taking place. The only effective method—and the method that will have to be employed in the end— is for the complete extermination of every one of the outlaw bands. They must all be captured or broken up. Otherwise the American residents along the frontier can never be sure of their safety.
