WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes anyone look and feel clean, sweet and refreshed.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, liver, kidneys and bowels; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, salivary compulsion, others who have bilious attacks, acid stomach or constipation are assured of pronounced improvement in both health and appearance shortly.

TEACHERS MUST REPORT ALTHOUGH NO SCHOOLS

(By United Press)

New York, Sept. 8.—Thousands of men and women teachers in schools in New York had to report for duty and go to work today even though there is no school, on account of the infantile paralysis epidemic. The time of the teachers will be taken up by conferences and lectures on several new laws and systems of teaching that go into effect in New York schools this year. Many of the teachers have an indefinite idea of their new duties.

could not find her was forced to acknowledge her sex before the army medical board today.

Unhappily married six years ago, and her two babies dead, this woman left her husband and, so she could get work, masqueraded as a man and "married" her boarding house keeper's daughter.

The circumstance of the marriage were astounding. Having a real man sweetheart who had betrayed and deserted her, the landlady's daughter faced real trouble. She told the man-woman who had confessed the disguise to her and her mother. So they were married and took a cottage in London. When the baby was born none of the neighbors suspected but that the "husband" was its father. The family lived this way for four years and had it not been for the conscription act, the ruse might never have been discovered. Her plea for exemption from service on the ground of "indispensability," having failed and, facing a medical examination by the officials, she con-
