The apparent case with which the erman resistance collapsed at alepval yesterday, following the putre of Combles, surprised military observers here and has led them predict a guida allied victory in a precise against Peronne and Baymune.

The Smal dash against Combies weekept Jones at the most synams thing of the whole war. The Germans were caught in the southwesters again to the village. They stuck to their machine guns bravely and many died at their posts. The British and Fresch, charging in opposite Brections, met near the heart of the ewn shortly atter dawn. They exhanged greetings amid the din of attle. The British tought their way prough the wood in the southwesters outsitrat of the city, beating lown stubborn resistance, but once arough, they entered Combles without strong opposition. The French, approaching from the southwest, had to fight their way through several ows of trenches and fortified refounds in the last two lays, shelling and underground caverns. Combles is filled with the Germans who were wounded in the last two lays, sightling and who were unable a scape, due to the allied noose. were church members; we attended services; we paid our money to the schurch."

Dr. Anderson mentioned three classes of people who will be disappointed at heaven's gates. The first fectass are those who say, "We will risk it." We are a race of gamblers and will take chances. Ever since expected a chance in the Garden of Eden men have been taking chances. The gambling instinct is in the human heart and men will gamble on their soul's salvation.

The second class of people who will be disappointed at heaven's gates, said Dr. Anderson, are those who believe that everybody is going to be sayed. There are many people in the world who have an idea that God is not going to save some wasted out the contrast between standard God is not going to save some wasted out the contrast between the two could not be in heaven at the same time.

The next class of people mentioned by the speaker was the class of people who call themselves moralists—those who are depending upon their morality to take them to heaven. Dr. Anderson pointed out the difference between chrustianity and morality. Morality makes a man care for this Mersitty takes a man to hell; christianity takes him to heaven."

London, Sept. 27.—Wholesale desertion from the Greek army is reported in Athens dispatches and hint that a deciaration of war may be expected at any time. Practically every garrison in old Greece has joined the revolutionary movement. The soldiers have also left. Rumors that the entire cabinet will resign followed the long conference on the situation which was created by the abrupt departure of Venizelos for Crete.

The entire nation is in a 'muddle.' Critical action is expected at any day and it is believed that the only step that will again unite the country will be the taking up of arms on the side of the allies.

A wireless from Rome reports that the Greek capingt, has decided to resign. The King will issue a prociamation immediately afterward. This report, although confirmed, is accepted as further indication of an early declaration of war. -Wholesale de
