Schedule for typhoid clinics to be conducted in Shallotte has been drafted by Lou H. Smith, county nurse, and the first of the three vaccinations will be given on Tuesday, August 13.

The next two doses of the typhoid vaccine will be administered on the two following Tuesdays and citizens of that section are requested to report at the place at the same hour except those that are included in the following schedule: Shallotte, 8 o'clock; Shallotte church, 9:30 o'clock; Shallotte Point, 10:30 o'clock; Mr. Todd's, 11:30 o'clock; Gore Land, 12:30 o'clock; Gause Land, 1:30 o'clock; Sea Side, 2:30 o'clock; Number 5 filling station, 3 o'clock; Hickman's Cross, 4:30 o'clock.

### Whiteville Mart Opens Tomorrow

Tobacco Has Been Coming All Week And It Is Likely That Two Million Pounds Will Be Offered Thursday

With tobacco dribbling in all last week and beginning Monday, coming in steadily, it is the opinion of many of Whiteville's tobaccoists that there will be nearly two million pounds of the leaf on the floors of the six warehouses of this tobacco marketing city as sales start tomorrow Thursday morning.

It truly looks as if this is the beginning of the greatest season ever experienced by this market. While it will be necessary to sell nearly two million pounds of tobacco Thursday and Friday before the floors will be clean, Whiteville's warehouses are confident this can be accomplished and that they will be cleared for another big sale Monday.

With three sets of buyers on the market near a million pounds can be handled daily without overtaxing the buyers.

Since sales do not begin until tomorrow one can only guess as to what prices will be on the various markets of the border belt when they open. Reports from the Georgia Belt, which opened last Thursday, have been very encouraging to the tobacco growers of this state. However, the average price paid on the Georgia markets cannot be used as a comparison for the prices that will be paid in the Border Belt opening week. Georgia has a very fine crop of the weed, according to reports, and it is further reported that the best of this crop is being marketed early.

Contrary to this, the tobacco growers of the border belt are bringing in their sand lugs, and nondescript grades to market this week, with a sprinkling of the better types.

During the week 42 examinations were given—32 white and 10 colored. Forty children were tuberculin tested. One of these showed a positive reaction but an x-ray examination failed to show any trouble from his lungs.

Five doubtful cases, 3 white and 2 colored, were also found among the adults. Four were advised to have their sputum examined and six others examined by Dr. Eason were referred to their family physician for special treatment.

Those wishing to make arrangements for this clinic should get in touch with Mrs. Smith at once in order that final plans can be made and a definite date set. There will be a reduction in the regular price for the operation to those who take advantage of this clinic.

### Weather This Summer Has Gone From One Extreme To Another

An official summary of the weather for this section during the month of July and the current heat wave further emphasize the fact that nature has truly been in a capricious mood this summer.

Following May and June, two of the driest months on record, July apparently attempted to make up for the dry spell. There was some rainfall on 17 days during the month and the total precipitation for the 31-day period was 11.47.

There were mild thunder storms on the 10th, 15th and 18th of the month. There was a torrential downpour over a limited area of the county on the night of July 15th, this being the rain that resulted in the road wash-

outs and crop damage.

During the month there were 9 cloudy days, 12 partly cloudy and 10 clear days. The prevailing wind was from the southwest.

Maximum temperature for July was attained on the first day when the mercury soared to 96.

August is off to a fine start toward establishing something of a heat record. Older citizens of the town declare the present heat wave to be the most intense, drawn out spell in their memory. The thermometer hovers around in the nineties during the greater part of the day and, since last Thursday, hasn't dropped below 80 at night.

The Revs. R. N. Pitts and A. Huggins appeared before the commissioners and asked that an investigation be conducted to determine whether beer is being sold within an illegal distance of the Shallotte Methodist church. Members of the board promised to conduct this investigation.
