What The BANK Does With **DEPOSITS**

Money put in a bank is the property of the individuals who deposit it. The bank agrees to return it on demand.

But since not all depositors want all their money at the same time, there will always be funds available for the bank to lend in safe ways to local farmers, business men and wage-earners, able to repay the money within a short time.

The bank, of course, never lends all of its deposits. Enough is kept in its vaults to meet all demands. Part is invested in highclass bonds, government securities, etc. Part, then, is loaned to reliable borrowers. This helps business, circulates money, aids employment and community progress as a whole.

WACCAMAW BANK & TRUST CO.

ORE than 1,500,000 horsepower has been developed in the Carolinas and there is in excess of 2,000,000 potential horsepower 50 per cent of the time awaiting development.

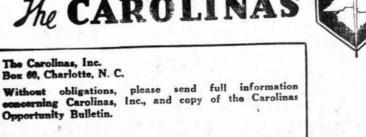

Turbulent rivers and numerous natural and man made lakes develop this power or are available for development.

Many huge dams impound this vast source of "white coal" and the largest earth dam in the world was constructed near Columbia in creating Lake Murray.

There are adequate facilities providing power throughout the the two states and this abundance assures attractive rates.

That's the Purpose of The Carolinas, Inc.—"TO TELL THE WCRLD"

The CAROLINAS

The newspapers of North and South Carolina have donated the space for this and a series of advertisements which will appear for the purpose of bringing facts about the Carolinas before their people, that they may be better informed as to the resources, history and industrial importance of the Carolinas, and that they may know how they can assist in the broad movement to advertise to the world the advantages of this favored section.
