

Woman's Club Meets At Ash

Mrs. W. M. Matthews Hostess at Regular Monthly Meeting Held Last Week—List of New Officers Is Announced

The Ash Home Demonstration Club met with Mrs. W. M. Matthews last week for the regular monthly meeting. The president called the club to order. After the usual procedure, the president collected all reports of the years work. The club women were well pleased with the years report. Following are a list of new officials elected for the coming year:

Mrs. B. M. Crawford, president; Mrs. J. A. Purvis, vice-president; Mrs. James Purvis, secretary; Mrs. Lois Fornay Duval, treasurer; Mrs. D. B. Long and Mrs. W. M. Matthews, food leaders; Mrs. Olivia Simmons and Mrs. James Purvis, clothing leaders; Mrs. J. A. Purvis, house furnishing leader; Mrs. Edna Long, management leader; Mrs. B. M. Crawford, home beautification leader; Mrs. Ruby Babson, garden leader.

The president suggested to the club women that they try to make one garment each for an orphan child and send them to the Thomasville Baptist Orphanage as a gift from our club. The suggestion was met with hearty approval by the women and as a result twelve lovely dresses, in different sizes and matching panties, have already been made and sent on to the orphanage.

The president gave a very interesting lecture on living unselfish lives and helping those who are less fortunate than we. She pointed out that true happiness does not come by personal gain, but by living useful helpful lives. She urged the women to be more patient, more self sacrificing and do away with selfish motives. She read several interesting articles in connection with the discussion. The meeting was then turned over to the food leader, who gave a demonstration on making corn chowder. This proved to be a very tempting and tasty dish.

Miss Marion Smith was present at the meeting and gave many helpful suggestions for the coming year's work.

There were ten members present and one visitor, Mrs. Smith from Fayetteville, who is the mother of our home agent. The club was honored at having her as a visitor.

Our club is making splendid progress and the women are taking a keen interest in the work. Members feel that the progress made is due to the home agent and the club president, along with the splendid cooperation of the club women.

Previous to this, the most northern Atlantic point from which the species has been reported was Ormand Beach, Florida, in 1902, Ormand being some three hundred and fifty miles south of the mouth of the Cape Fear river, which is in latitude approximating 34 degrees N. The most northern Pacific record for the species is Cape Inubo, Japan, in latitude 25 degrees 39 minutes N. According to Dr. E. W. Gudger, this is the 78th recorded specimen, the 77th having been recorded by him recently from Acapulco, Mexico.

"The Gulf Stream is probably responsible for carrying the great fish so far north of the previously known northern limit of the Atlantic.

"Two deep cuts in the side of the body, probably resulting from contact with a vessel's propeller, appeared to be the cause of the fish's death."
