HINTS TO Farm Folks

BY RUTH CURRENT

Mildew is a fungus growth that eventually "eats" into the fibers of cloth, causing serious and permanent damage. It thrives in a damp, warm, dark, and unventilated place, say textile chemists. Therefore if clothes are even slightly damp when put away, or if dampness reaches them in storage, a closed bag and hot summer weather make conditions ideal for its growth.

Clothes should be stored in a moisture-proof container so that dampness cannot reach them. Sunning and airing should be done after a long, rainy season. Rooms and closets, or wherever clothes are stored, should be cleaned and aired.

Clothes should be examined in midsummer to see if any mildew has started. If so, they should be removed immediately and brushed, sunned and dried outdoors before putting away again.

Sponging may remove a light surface growth on wool. Soap and water will remove very fresh mildew from washable material. Mild bleaches may be used on white fabric. If mildew has been left too long, however, there is no way of erasing its damage.

The kitchen is the busiest room in the American home, especially during summer canning season. It is also the most dangerous room, according to safety advisers. These accidents include falls, burns and scalds, collisions and bumps, cuts, bruises, and poisoning.

More than a four of these kitchen accidents are burns and scalds, with burns by steam and hot liquids the most frequent. Carelessness is often the cause of these burns. Simple precautions that will prevent many burns are: lifting the lid of kettles so that the steam escapes away from, rather than toward the worker; turning pot handles so that they do not extend over the edge of the stove; and using pot holders that are thick and dry.

M., now stationed in Bermuda.

SUFFERS BAD FALL

juries. Reports have it that Mr. Milliken was trying to kill a large rat in the hayloft and accidentally fell through an opening.

WASHINGTON—Secretary of Commerce Henry Wallace returned to his office for the first time since his bombshell foreign policy speech in New York Thursday. He faced a clash with the state department over carrying on his fight against Secretary of State Byrnes policies. There was speculation that Wallace might see the President soon. But he was not on the White House calling list for today.

NORFOLK, Va.—Twenty four Norwegian seamen were picked up in the Atlantic by rescue vessels after tanker Marit II broke in two 148 miles off the N. C. coast while enroute to east coast ports today. Planes and surface craft continued searching for 14 other members of the Norwegian crew. It seemed unlikely that additional survivors of the foundered 7,417 ton Marit would be found.

One gallon of a concentrated mixture of insecticide will cover as much as an acre of certain types of foliage.
