**New Garage To Open Next Week**

Opening up his new garage on Monday, July 14th, Dalmas Hewett adds another fine building to the rapidly growing number of business structures in Shallotte. His new building, built of brick, adjoins and is a part of his brick service station built a number of years ago. With his opening Mr. Hewett will have about triple his former space. Already serving the public with a fine general store and

filling station, he plans with the added facilities afforded by his new building to go more extensively into the handling of auto parts, repairing and servicing of cars.  
The traveler's tree of Madagascar and Reunion beats at the top leaves in long sheaths in which collect water.  
In 1896 there were only 17 1/2 tons of aluminum produced in the world and it cost \$8 a pound.  
About three-fourths of all rubber consumed in the United States goes into tires and tubes.  
The Pacific has more islands than all the other oceans and seas together.

The Solomon Islands are estimated to include more than 10,000 islands and islets.  
California produces 63 percent of all asparagus packed in the United States.  
The United States used 343 times more power in 1935 than in 1850.

—PRESENTS THE—

**NEW FARMALL CUB TRACTOR**

ON DEMONSTRATION

**Friday, July 11th, from 2 till 5 P. M.**

At Castle Hayne—9 Miles North of Wilmington At D. Swartz Farm On Highway No. 117.

- For all operations on farms of 40 crop acres or less—and truck gardens.
- For special operations on truck farms.
- For large farms that need an extra tractor.

That's the Farmall Cub, the first tractor in history that's built right and priced right for a great new market in tractor ownership.

The Cub is the newest member of the famous FARM-ALL FAMILY. It brings the advantages of the FARM-ALL SYSTEM OF FARMING to the small, family farm.

It's a Cub in size, but "a BEAR for work." You get big-Farmall quality and design, plus scaled-down, small tractor economy.

**FARMALL CUB FOR PLANTING CORN**—Of interest to farmers growing corn is the new Cub-172 planter with corn hopper and fertilizer attachment, shown above drilling corn. A similar planter is available for planting cotton and other row crops in the South.

**FARMALL CUB FOR PLOWING**—International Harvester's new Farmall Cub tractor offers the small-tractor farmer the advantage of complete, low-cost mechanization. It is designed to handle all field and garden crop operations. The above view shows a Cub-193 moldboard plow turning a 12-inch furrow.

The **FARMALL CUB**, despite its small size, is built by identical standards of materials and workmanship found in the company's largest Tractors, THE FARMALL CUB weighs 1,200 pounds, has approximately 9 1-4 horsepower on the belt and 8 on the drawbar.

Utilization of the Farmall Cub will make modern farm tractor power profitable in farming small crops acreages.

A Full Line of Implements For Use With This New Tractor.

Moldboard Plow · Disk Plow · Harrow Plow.  
Disk Harrow · Mower · Planters and Cultivators

All Designed For Quick Change and Easy Operation
