Telephone Folks really did a job in '47

In spite of the continued scarcity of materials and equipment and in the face of rising costs all along the line, Southern Bell went right ahead in 1947 improving and expanding your telephone service. It was a year of humming activity as telephone folks went all out to bring you better telephone service.

There's still a tremendous job to be done. More buildings and vast quantities of equipment are needed to further improve and expand the service. If telephone earnings are such as will attract the necessary new capital to pay for continued construction, you can look forward to further progress in meeting your telephone needs in '48.
