

Much Activity At Holden's Beach

Many Business Places And Dwellings Under Construction In This Area Of Brunswick County

With the center road of the three leading to Holden Beach under construction and with asphalting of the paving being completed during the summer, unusual interest is now centered in that area.

A visit there this week found Blake Thompson, prominent High Point realtor, discussing plans for the building of three new duplex houses, each to have two apartments. Mr. Thompson, who already has two cottages at Holden's Beach, has other construction and development ideas in mind. With him was Pete Moffitt of the Moffitt Furniture Co., Inc.; E. B. McBee, High Point City Purchasing Agent; Joe Dobson and son, Dicky; J. B. McCall and O. D. Sheppard, all of High Point. Mr. Dobson owns a cot-

tage at the beach. J. W. Lancaster of Southport is completing a new store building on the highway near the beach and will build a home at the same place. John Holden of Supply is completing a very nice two story, two-apartment home. Luther Holden, also of Supply, is completing a pretty five room home.

John McNeill of the City Waterworks Department in Lumberton has just completed a six room and Reid Grantham of Red Springs is assembling material to construct a garage apartment building starting this week.

Porter Lowe of Law Gap, Va., will immediately begin construction of a home at Holden's. Mr. Robinson of Dunn has like plans.

S. E. Holden of Carolina Beach is making preparations to build two new cottages at Holden's Beach. Pete Moffitt, High Point furniture manufacturer, is also building a cottage.

Fishing parties are beginning to come in numerous from various points in the state. The intracoastal waterway running just back of the beach and the nearby Lockwoods Folly River Inlet both afford some choice inshore fishing to be had either with or without boats.

Auction Sale At Shallotte Point

Number Of Choice Lots Will Be Offered For Sale At Public Auction On May 15

Beautiful Shallotte Village Point with its many year round attractions to the public will have what will probably be the biggest auction sale of the year on May 15th.

100 choice building lots, all of them either facing on the hard surface or directly on the Shallotte river, will be sold at auction. This property is what is known as the Tripp land and most of it is waterfront, all on a high, dry bluff. One choice lot and many valuable prizes will be given away during the hours of the sale.

The property is now owned by W. H. Garner of Chatham county, father of John W. Garner, owner of the Anchor Hotel at the point. The elder Mr. Garner, like his son, is sold on the rapid-

WELFARE DEPT.

Last week we told how a person makes application to this office for an OAA or ADC grant and how that application is handled. Our responsibility is by no means over as soon as our client begins to receive the monthly check.

Let us look for a bit at the case of Mrs. Margaret Warren who is receiving an Aid to Dependent Children grant. Mrs. Warren has been receiving \$27 a month for eight months. Before that she received \$32 per month because there was an older child in the family who is now away from home.

At least every six months (every 12 months in the case of OAA grants) we make home visits to see how our clients are getting along. These visits are for the purpose of being sure that they are still eligible to receive their grants and to see whether or not there should be any change in the amounts.

When we made a regular visit to the home of Mrs. Warren we found that one of the four children still at home was in very poor health. Mrs. Warren said that the school nurse had sent home a note two months before stating that George should have

ly growing popularity of Shallotte Point as a resort community. Anxious to speed up this growth, he is putting the Tripp property up for sale as building lots. One sure result of this sale is that many fine new homes will spring up at the point during the next twelve months.

The place has been growing very rapidly since its hard surface road was built. Although it has a nice little hotel, many tourist cabins and other facilities, Shallotte Point has never been better to take care of its summer and fall visitors. In the winter, the facilities are also often badly taxed. Some big developments are expected to take place there when this fine property is offered to buyers next month.

True hail occurs only in warm weather. Cacadam surfaced roads are named after MacAdam, an 18th Century Scottish engineer. Papyrus, developed in Egypt was the world's first cheap and abundant writing paper. The density of air at sea level is about one eight-hundredth that of water.

The application for an increase was presented to the Welfare Board just as though it were a new case. They discussed it and granted the increase necessary to care for the extra needs.

You will see here that your Welfare Office tries not only to prove what a person has and needs, but we are also doing all in our power to help our clients improve their condition in every way possible.

HOUSE PARTY

With most of the guests students in various colleges, Mr. and Mrs. D. D. Bruton, of Chadbourn, were hosts and chaperones at a delightful house party at Holden Beach this week. The guests were, Clyde Culler, Walkertown; Milton Burnette, Cape Hatteras; David Sheppardson, Eldoroda, Arkansas; Harry Ward, Fayetteville; Miss Edna Jordan, Richbury, S. C.; Miss Lou McCallister, Hendersonville; Miss Marie Hicks, Wilson; and Edith Bruton, Chadbourn.

Potato Growers Plan Referendum

Marketing Agreement Will Be Subject Of Vote By Irish Potato Producers On April 27

Elroy King, chairman of the Brunswick Agricultural Conservation Association, stated that a referendum is to be held in Brunswick county on April 27 at which time Irish potato growers will cast their ballots at the county ACA office on a proposed marketing agreement and order. He also urged them to attend the meeting scheduled to discuss the proposed marketing agreement at Tabor City, Thursday, 15th at 8 o'clock in the school auditorium.

Chairman King said that all producers with potato acreage allotments have been mailed copies of the proposed marketing agreement and order, and additional copies may be obtained by producers who for some reason or another have failed to receive them. Every grower in Brunswick county, who is engaged in the production of potatoes for market is eligible to vote.

Chairman King pointed out that referendum is the most democratic way of determining the wishes of eligible voters on important issues of questions, and regardless of the opinion Brunswick county growers form on the potato program they should vote either "yes" or "no." "It's up to the growers," King said, "whether they really want a potato marketing agreement and order, and the referendum is the best way they can voice their wishes in the matter."

The U. S. Department of Agriculture, after a series of public meetings in North Carolina and Virginia, decided to recommend that a referendum be held. The date for the referendum in Virginia is the same as in North Carolina. "One of the chief benefits of a marketing agreement and order," Chairman King said, "is that it enables producers to uphold the quality of their potato shipments. Under this kind of a potato program, provision may be made for regulating the grade, size, and quality of potato shipments. The grade and size regulations would be initiated by a committee of North Carolina and Virginia potato producers and handlers."

"This kind of potato marketing," Chairman King said, "enables the growers to better help themselves, especially in periods of surplus production, by emphasizing the marketing of quality potatoes. It insures protection of markets for quality potatoes and helps promote trade and consumer acceptance of quality potatoes. Should the potato committee feel it necessary, it would recommend that culls and low grade potatoes be held off fresh markets. However, under the proposed program, no regulation of the marketing of U. S. No. 1 grade or better grade potatoes would be allowed.
