# TO PREVENT TOBACCO BLUE MOLD

## Use Du Pont "FERMATE"

Spray or dust regularly with "Fermate" fungicide and you keep blue mold out of your plant bed. Use once a week or after every rain. Here's what "Fermate" does for you:

- Prevents blue mold from starting or spreading.
- Gives you more sturdy, healthy plants.
- Plants make faster, more even growth after transplanting.

## Recommends Use Of Fertilizers

### County Agent A. S. Knowles Distributed Recommendations To All Fertilizer Dealers In Brunswick

Anxious that both fertilizer dealers and farmers have a better understanding of the type of fertilizer best suited to the various crops in Brunswick, County Agent A. S. Knowles has written a self explanatory letter to all fertilizer dealers in the county. With the letter he attached fertilizer recommendations that he makes to the farmers of Brunswick.

Both the letter and attached recommendations are published below:

"The total farm income is sure to be smaller in 1950 than in 1949. If farmers are to maintain even a fair income and a good standard of living, they must produce their crops and livestock more efficiently.

"One of the most efficient practices that farmers can follow is to use fertilizer wisely. By this is meant to use the fertilizer best suited to the particular crop and fertility of the land. You can render your customers outstanding service and aid in the economic life of the community and county by assisting them in choosing the best fertilizer for their crops.

"I am enclosing a list of fertilizer recommendations for Brunswick county. These analyses are considered by the North Carolina Experiment Station and the agricultural workers of Brunswick to be best adapted to our conditions

and should give good results when applied properly. Your assistance in helping to promote a better fertilizer program in Brunswick county will be greatly appreciated.

**Tobacco:**  
3-9-6—1000 to 1200 pounds per acre for average conditions.  
3-9-9—1000 to 1200 pounds per acre on potash deficient soils. (Where 3-9-9 is not available use 3-9-6 and apply 75 pounds sulfate of potash per acre at first cultivation.)  
2-10-6—1000 pounds per acre when grown on heavy soils.

5-5-20—Use as side dresser on lighter soils. 100 to 150 pounds per acre. May be helpful after extremely heavy rains that occur before June 15.

**Sweet Potatoes:**  
3-9-9 (with Borax)—800 to 1000 pounds per acre.

**Corn:**  
6-8-6 or 7-7-7 — 400 to 600 pounds per acre for average conditions at planting.

5-10-10 or 6-6-12—400 pounds per acre on potash deficient soils.

Side dressing—Use about 80 pounds of available nitrogen per acre in addition to amount applied at planting time. This can be supplied by 500 pounds nitrate of soda 400 pounds Calnitro (ANL) or 250 pounds of Ammonium nitrate.

14-0-14—Substitute 200 pounds for 200 pounds nitrate of soda or equivalent on soils that need more potash. Corn must have sufficient potash to have good quality and resist weevils.

**Cotton:**  
6-8-6—400 to 600 pounds per acre. Side dress with 100 pounds nitrate of soda on light soils at chopping time.

**Truck Crops and Garden:**  
6-8-6—1000 to 1200 pounds per acre.

5-10-10 or 6-6-12—Use on potash deficient soils. Side dress with nitrogen as needed.

**Soybeans:**  
0-14-14—200 to 400 pounds per acre.

**Pastures:**  
Seeding Time: 2-12-12 — 1000 pounds per acre.

**Top Dressing:** 2-12-12—200 to 400 pounds per acre on light soils or where clover is yellow.

0-9-27—200 to 400 pounds per acre (good clover and grass mixture)

0-10-20—200 to 400 pounds per acre (good clover and grass mixture)

0-14-14—200 to 400 pounds per acre (good clover and grass mixture)

**Peanuts:**  
Super Phosphate—400 to 600 pounds per acre at planting.

Murate of Potash—100 pounds per acre at planting.

0-14-7—500 pounds per acre at planting.

Landplaster as needed.

Farmers should have soil tested to determine amount of lime needed on land for various crops. Where lime has not been used for several years, it is usually safe to apply one ton per acre for all crops except tobacco. Never apply lime for tobacco without testing soil. Too much lime on this crop may cause it to disease badly. For pasture, apply two tons of lime or have soil tested.

## High Times

With the excitement of the championship games still around school we can hardly settle down to do any of our regular work. Everyone is still celebrating from the big affair, but who wouldn't be!

To start our news off we will

give you the highlights of our games played last week. Monday night Southport and Shallotte teams clashed at our local gym. A large crowd was present to witness the victories. Southport girls won and our boys did likewise.

Tuesday night our boys played Bolivia boys to break the tie for first place. Our boys played good ball and won to put them in first place to go to the tournament. Our Junior Varsity boys played Bolivia Junior Varsity and lost.

Thursday afternoon Southport boys went to Shallotte to play our first game in the tournament. We won with a score 41 to 36. Bobby Spencer was high score with Billy Doshier runner-up. Our girls played Shallotte girls Thursday night. The game was really close but finally we won with a score 41 to 36. Rebecca McRackan had high score while Catherine McRackan runnerup.

Friday night Southport boys played Leland boys for the championship. Leland gave a good fight but when the final whistle blew the score was 27 to 22 in Southport's favor. Bobby Spencer and G. W. Fisher tied for high score. This was really an exciting game.

Saturday night also was a big event for Southport because our girls played Bolivia for the Championship. When the whistle blew to end the game the score was tied 37 to 37. After a few minutes debate they decided to name co-champions, so gold basketballs and trophies are being awarded both teams.

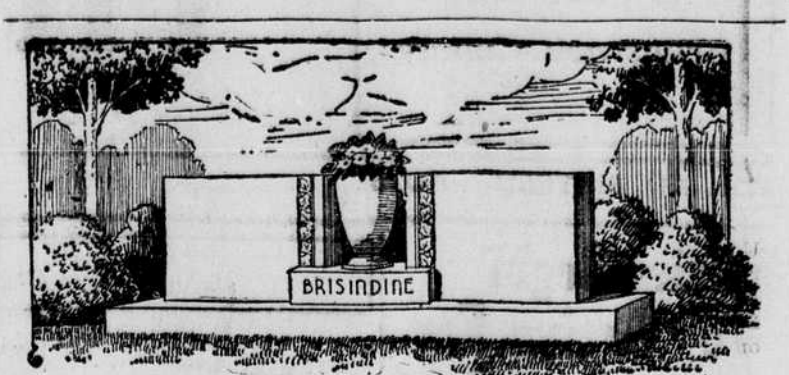

We want to congratulate our girls and boys on the excellent work and playing they did throughout the Brunswick county basketball season. We are very proud of their good play and fine sportsmanship and the two championship trophies which they brought from the finals with them. Good work, Teams, and here's our best wishes for many more victories during your life time. We also want to express our many thanks to Coach H. T. Sanders for his excellent coaching of both winning teams.

Seen Around: Stuart Arrington and Billy Doshier wearing a regular collection of basketballs around their necks. . . . As a result of the final games, many are still suffering from sore throats—but it was worth it. . . . Tommy Bowmer filling out his senior memory book. . . . Some

of the chemistry students helping decorate Mr. Robinson's car for the ball game with red and white strips of paper. . . . Stuart Arrington eating cherries while passing away time. . . . Nancy, Janice and Karen Swan getting quite a few laughs from the show Thursday night. . . . Peggy Arnold gabbing during bookkeeping. . . . Everyone enjoyed the idea of school getting out at 2:30 Thursday afternoon. . . . Bobby Spencer busy selling tickets for the ball games. . . . Danny Harrelson trying to study chemistry while being pestered by Harold Spencer. . . . Billy McDowell looking through magazines while Stud McKeithan is studying English. . . . Lib Lupton enjoying singing in glee club with all smiles. . . . Bernice Phelps tired after tournament games. . . . Harriett Corlette, Patricia Adams and many others having a sore throat from yelling at Monday night's game with Shallotte. . . . Bertram Burreis being quite and peaceful for a change. . . . Rebecca McRackan, Joan James, Linda Hickman and Gene Russ having the giggles while Peggy Arnold proceeds to finish her story. . . . Lena Ward looking through magazines while G. W. Fisher adds a few laughs. . . . Linda Hickman nursing a sore hand, and we hope it's well soon. . . . The teams talking about and hoping to yet play more games soon.

Well, folks, bye for now.

## FOR SHERIFF

Our county newspaper goes places every week that I haven't had time to reach yet, but I just want to tell my friends in every section of Brunswick county that I'll be seeing you before the Primary Election in May. Every day I am receiving new encouragement in my campaign, and if my friends will continue to flock to my support, I know that I have nothing to worry about except how to be a good sheriff.

### ED V. LEONARD

Candidate For Sheriff

## You Have a Vital Stake in Telephone Bargaining:

# It's YOUR money that pays telephone wages

### Southern Bell Wages and Working Conditions Already Are Among the Best — Any Increase in Wages Would Have To Be Paid By Telephone Customers — There Is No Other Way Wage Increases Can Be Paid

### For all of these benefits, the employee pays nothing—the Company pays all

Any way you look at it—wages, working conditions, pensions and benefits—telephone employees are doing all right. And that's the way we think it should be. It takes all these things to get and keep good people.

The telephone business is regulated in a way that Unions and most other businesses are not. Federal and State Commissions determine the rates we charge for service. Any increases in telephone wages would force us to ask for an increase in telephone rates.

## What About The Contract ?

- A pension with a minimum of \$100 a month, including Social Security, at age 65, and liberal provisions for earlier retirement.
- Sickness and accident benefits, up to a full year's pay, depending on length of service.
- Death benefits, up to one full year's wage, depending on length of service.
