

### Public Hearing On Game Laws

Meeting To Discuss Proposed Changes Will Be Held In Elizabethtown

David L. Gore, wildlife protector of Brunswick County, announced that the Wildlife Resources Commission will hold a series of public hearings in each of the Commission's nine districts to give sportsmen an opportunity to express their opinions regarding the 1961-1962 hunting and trapping regulations. Gause said that the Commission met in Raleigh May 10, to establish a set of proposed regulations that will be presented at the hearings. Gause urged that local sportsmen attend the District 4 hearing scheduled for 7:30 p. m. at the Court House in Elizabethtown on May 30. Up for consideration this year, Gause said, is a proposal that the squirrel season be opened statewide on October 16, and close January 1. In Brunswick County the season open about the same date as last year. The Commission proposes essentially the same season on bear as last year, October 16 through January 1, with minor local exceptions, and the same dates would generally apply to the deer season. Requests for consideration of an open season on antlerless deer in certain localities should be made to the Commission by August 11 so that public hearings

### Tar Heel Cotton Producers Fight With New Weapons

North Carolina cotton growers are going after their old enemy, the boll weevil, with new ammunition this summer. Entomologists at North Carolina State college have developed a new cotton insect control program which promises to be cheaper, simpler and more effective than past programs. Growers are reported to be enthusiastic in their acceptance of the program. Farm leaders are urging its adoption. "If growers will adopt this program, I am convinced we can double our state cotton yield without changing another practice," said Dr. Walter J. Mistic, the State college scientist who headed research on the program. The new program is designed to prevent weevils where past programs have been designed to kill weevils. Four early treatments are used to prevent reproduction by over-wintered weevils. Four later treatments ward off migratory weevils. The four early treatments start when cotton reaches the eight-leaf stage and continue at five-day intervals. The later treatments start on July 24 and continue at five-day intervals. Application dates, which were chosen after studying the weevil's life cycle for years, are the same for the entire state. No new insecticides or equipment are involved. In fact, only 10 insecticides are now recommended where 30 have been recommended in the past. Recommended insecticides will control boll weevils, boll worms and aphids—all the pests that plague cotton growers. Costs are about \$15 per acre or about one-half the cost of treatments recommended last year. Insecticides or mixtures recommended are aldrin-DDT, HCB-DDT, dieldrin-DDT, endrin, guthion-DDT, heptachlor-DDT, malathion-DDT, methylparathion-DDT, sevin, and toxaphene-DDT. Dr. Mistic says these materials are equally effective against boll worms and susceptible boll weevils. He says guthion-DDT, sevin, and toxaphene-DDT are more effective against migrating boll weevils, however. With any of the 10 insecticides, dosage and rate of application are the same for each of the eight treatments, again making for simplicity. Six gallons of spray or 15 pounds of dust per acre are recommended for each treatment. Farmers interested in more complete information on the new cotton insect control program can get it from a free publication soon to be available from county agricultural agents.

### School Daze

By JUDY GORE

TESTS, TESTS, TESTS, we have never seen so many tests before. We hope everyone passes with flying colors. The FFA and the FHA went to the beach last Thursday. Everyone who went had a very good time. The eighth graders will have their graduation, Friday morning. They are very thrilled and we are sure they will look like kings and queens. The seniors had their baccalaureate, Sunday night. All the seniors looked very dignified and all the marshals looked keen. The seniors will graduate, Friday night. The juniors are planning a trip to the beach, next Monday. Bet they will enjoy it. On-the-grapevine—Thelma does pretty good at Myrtle Beach. Everyone is getting good suntans. Why do we have to have tests? Summer vacation will be great. See you next week.—(JG).

### Mrs. Mazie Best Dies Wednesday

Mrs. Mazie Vivian Best, of 17 S. 9th St., Wilmington, died at home Wednesday. She was a native of Brunswick County, and was the daughter of the late John Frederick and Annie Elizabeth Outlaw Swain. She was a member of Temple Baptist Church, from which final rites were held Friday at 2 p. m. by the Revs. E. C. Painter and James O. Morgan, with burial in Lebanon Baptist Church Cemetery near Winnabow.

She is survived by her husband, William Herbert Best, Sr.; three sons, William Herbert, Jr., Richard Clyde and Wilbur Lee Best, all of Wilmington; three daughters, Vivian Louise and Mary Louise Best, both of Wilmington and Mrs. James R. Bennett, North Augusta, S. C.; two brothers, George Swain of Brunswick County and Erkins Swain, Chatham County; five sisters, Mrs. Charlie Sellers of Winnabow, Mrs. Paul Brown, Leland, Mrs. Marvin Robbins, Wilmington, Mrs. Naomi Sellers of Supply and Mrs. Edith Earp of Winnabow and six grandchildren.

### Bolton Native Gets New Post

Jim Jones has been named Promotional Director for the outdoor drama, "Horn In The West," Herman W. Wilcox, executive vice president announced here today.

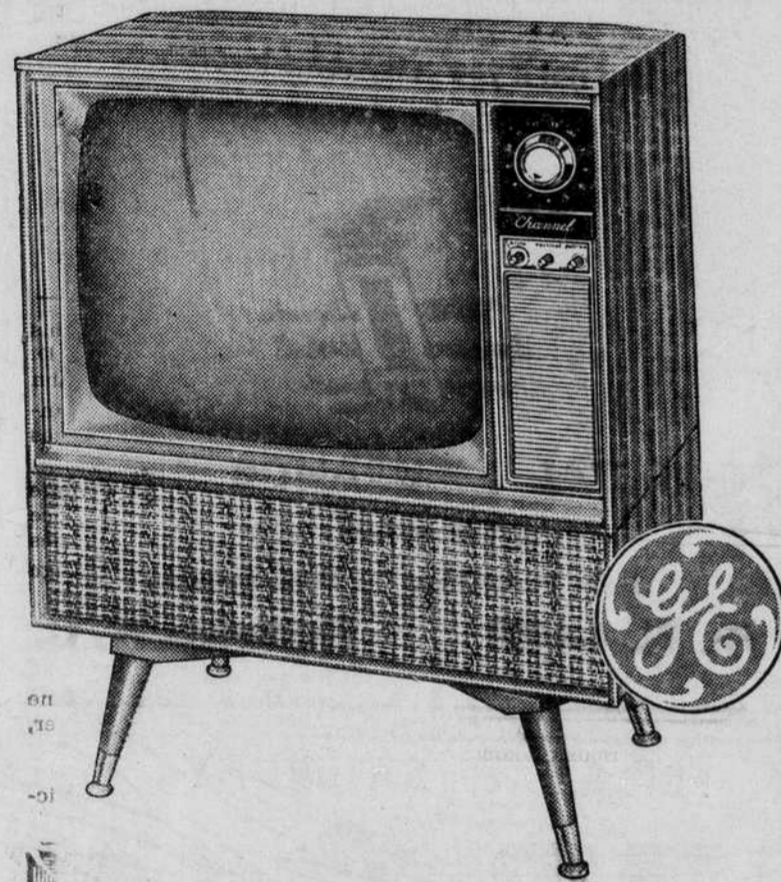

The appointment is to a newly created position established to promote and publicize the famous outdoor drama which is presented growth of seedlings. "The use of most liquid or slurry treatments causes a rapid expansion of the seed coat," says Wells, "which causes skin slippage in the planter." Skin slippage is particularly severe on large-seeded varieties, he warns. It may result in exposed, non-protected areas through which bacteria may enter and cause seed decay. "Until more data is available on liquid and slurry treatments of peanuts, we recommend dust treatment with thiram 50 or 75 per cent," says Wells.

ed nightly except Mondays during July and August. Jones, a professor at Appalachian State Teachers College in Boone, has been active in promotion and publicity work for the past seven years. He worked in athletic publicity in High Point for two years and has been director of athletic publicity at Appalachian for the past four years. He served as publicity director for District 26 of the National Association of Intercollegiate Athletics during the past academic year. District 26 is composed of the NAAIA member col-

leges in the two Carolinas. A native of Bolton in southeastern North Carolina, Jones received the BA degree from Elon College and the MA degree from East Carolina College. He has done further graduate work at Appalachian State Teachers College and the University of North Carolina. He is the son of Mrs. Z. V. Jones of Bolton. Jones is already working on promotional plans with the show director, David French, and will join the company in a full time capacity on June 1.

on the subject can be held during the week of September 4. The rabbit season would be opened November 23 and close February 15 except in Alleghany, Ashe, Avery, Mitchell, Watauga and Yancey counties where the season would end January 31. The statewide bag limit on rabbits would be five daily, ten in possession and 75 for the season. The quail season is proposed for November 23 through February 15 except in Alleghany, Ashe, Mitchell, and Watauga counties where it would close December 16. The wild turkey season would open November 23 and extend through February 15 except that in and west of Stokes, Yadkin, Iredell, Lincoln, and Gaston counties, and in Anson, Beaufort, Carteret, Montgomery, and Richmond counties there would be no open season. Gause said that in general the hunting and trapping regulations regarding the taking of game and furbearing animals would be about the same as for last season.

### Peanut Growers Issued Warning

Peanut producers should think twice before using liquid and slurry treatments on their Virginia-type peanut seed. That's the advice of J. C. Wells, plant pathology specialist for the N. C. State college agricultural extension service. He's had many inquiries lately about this type of treatment. "Sufficient research information is not available to make specific recommendations about use of liquid and slurry treatments," says Wells. Mercurial fungicides involved in the use of liquid or slurry treatments may be toxic to peanuts, he says. They might delay seed emergence and reduce

### With The Men In Service

Army PFC Irreal Jones, whose wife, Sarah, lives in Apalachicola, Fla., participated in Exercise Spring Tonic, a V Corps field training exercise in Germany which ended April 27. Spring Tonic was designed to test the ability of signal units to provide fast, efficient field communications between V Corps headquarters and other corps units under simulated combat conditions. Jones, son of Mrs. Sadie L. Jones, Bolivia, is a radio relay and carrier operator in Darmstadt. He entered the Army in June 1960 and completed basic training at Fort Benning, Ga. The 21-year-old soldier attended Brunswick County Training High School, Southport, N. C.
