

### News From Doshier Memorial Hospital

Willie McDonald of Supply entered on Tuesday as a medical patient.

Amos Watkins of Bolivia entered as a medical patient on Tuesday.

Ivey Lee Hewett of Bolivia spent Tuesday until Monday as a surgical patient.

Otto Hickman of Southport entered as a medical patient on Tuesday.

Lorton Little of Freeland entered on Tuesday as a medical patient.

Mrs. Mary Thompson of Supply was a medical patient from Tuesday until Saturday.

Dr. Charles Witte of New York spent Tuesday until Wednesday as a medical patient.

Jack Worley of Southport was a medical patient from Tuesday until Wednesday.

Joe Ellis of Southport spent Wednesday until Monday as a medical patient.

Mrs. Alene Norris of Supply was a medical patient from Wednesday until Sunday.

Mrs. Jane Stanley of Shallotte entered on Wednesday as a medical patient.

Mrs. Rosie Ellen Robinson of Supply was a medical patient from Wednesday until Sunday.

Baby James A. Goff of Bolivia spent Thursday until Saturday as a medical patient.

Mrs. Annie Rose Rayborne of Southport entered as a medical patient on Friday.

Mrs. Audrey Dowling of Southport entered on Friday as a medical patient.

Baby Bonnie Lee Mercer of Winnabow was a medical patient from Friday until Monday.

Mrs. Ruby Lee Andrews of Supply entered on Friday as a medical patient.

Mrs. Lillian Shaw of Bolivia

entered as a medical patient on Friday.

Miss Definda Calsen of Winnabow entered on Friday as a surgical patient.

Miss Beverly Lewis of Southport entered as a medical patient on Friday.

I. A. Ainsley of Supply spent Friday until Sunday as a medical patient.

Miss Barbara Smith of Southport entered as a medical patient on Saturday.

Mrs. Jane Lambert of Concord entered on Saturday as a medical patient.

Lee Andrews of Shallotte was a medical patient from Sunday until Monday.

Mr. and Mrs. William Henry Singletary of Southport announce the birth of a son on Sunday.

Mr. and Mrs. Laidwood Inman of Supply announce the birth of a daughter on Sunday.

Mrs. Elsie Lottie of Shallotte entered on Monday as a medical patient.

Mrs. Jeanine Snipes of Wilmington entered as a medical patient on Monday.

**Colored Patients**

Mr. and Mrs. Henry Daniels of Supply announce the birth of a son on Thursday.

Hattie Moore of Southport entered on Friday as a medical patient.

Hardee Brooks of Bolivia entered as a medical patient on Friday.

Videar Hewett of Shallotte entered on Sunday as a medical patient.

### PERSONALS

Mr. and Mrs. Sam Newton and children have returned to their home in Hammond, Ind. after spending a week here with his parents, Mr. and Mrs. J. B. Aldridge.

Mr. and Mrs. John G. Hevener of Swoope, Va., Miss Johnnie Hevener and Marvin Hevener were weekend visitors of Mr. and Mrs. Charles E. Blake.

MR. AND MRS. HORACE S. WILKINS  
**Miss Mary Ann Russ Becomes Bride Of Horace S. Wilkins**

Miss Mary Ann Russ, daughter of Mr. and Mrs. William A. Russ, Sr., of Southport became the bride of Horace S. Wilkins, son of Mr. and Mrs. E. J. Wilkins of Whiteville, Sunday, April 22 at 3 p. m. in the Southport Baptist Church.

The double-ring ceremony was performed by the Rev. Mark Owens. Wedding music was presented by Mrs. A. E. Huntley, organist.

The bride was given in marriage by her oldest brother, William A. Russ, Jr. She wore a street-length dress of blue nylon over taffeta, with a short veil. She carried a white orchid nosegay.

Mrs. Ivey M. Gaskill, sister of the bride, was matron of honor and her sister's only attendant. She wore a street length dress of pale peach nylon over yellow taffeta with a short veil.

The groom chose as his best man Henry Wilkins, his brother. Ushers were Jack Russ and Gene Russ, brothers of the bride.

Following the ceremony a reception was held at the home of the bride.

The bride before her marriage was employed by Morace Stevedoring Corporation, Sunny Point Army Terminal, Southport. The groom is employed by the State Highway Patrol, stationed in Whiteville, where the couple will make their home.

Soldier Bay Church, 12:45-1:15 p. m.

### Rehearsal Party

On April 20, following the wedding rehearsal of Miss Patricia Ann Adams and Wiley Bland, Mesdames Tom Swain, Houston Hewett, Ennis Long and Cecil Tripp entertained at a party in the home of the later.

Receiving at the door were Mr. and Mrs. Tripp. Mrs. Houston Hewett of Ash directed guests to the candlelit dining room.

The table was covered with a white Irish linen cut-work cloth, centered with a five-branched silver candelabra holding white tapers. A center epergne was filled with pink tulips and roses, above which hovered delicate pink butterflies. From this arrangement, pink satin streamers cascaded to miniature nosegays of roses and tulle.

Mrs. Sam Carr of Rose Hill poured punch while Mrs. Wilfred Williamson of Shallotte served bridal cakes. Salted nuts, mints, and dainty open faced sandwiches were served from silver appointments.

In the foyer, a massive arrangement of dogwood and iris was used on the console. Elsewhere in the home, arrangements of roses and spring flowers were used.

### Perth Lighted Astronaut Way

Australia's city of Perth, which turned on its lamps for astronaut John Glenn, has long been known as a city of light.

On the night of February 20, Perth was glowing from streets, houses, and neon signs. Some residents rigged up sheets to reflect light upward. The beacon proved a welcome landmark to America's favorite airman.

But the city's more enduring reputation is based on sunlight rather than electricity. Perth averages nearly eight hours of sunshine daily to claim the title, "Sunniest City in Australia," says the National Geographic Society.

Bathing beaches fringe the Swan river within the city limits, and ocean beaches rim a surf-slapped coast near by. Sea breezes from the Indian ocean 12 miles away give Perth a Mediterranean climate.

At the foot of the city's front lawn, a graceful bend of the swan forms a quiet bay. An early Dutch explorer named the river after its black swans, which until then had been considered mythical birds.

Perth boasts some 50 parks and gardens. Rustic bridges lead to gardens banked in early summer with blue Leschenaultia and red-and-green kangaroo paws, the state flower of Western Australia.

Another method of alleviating the world's food deficit is to increase food production in the developed countries, especially the U. S. and Canada. At present, some of these countries produce enough food for their own people and still have embarrassing surpluses.

If these countries allowed farmers to produce at full capacity, they could significantly increase food production, Dr. Stemberger says. There would be, however, a great problem in distribution of this food to the deficit areas. There would also be the problems of payment and relations between various food exporting nations.

"Some of my azalea plants are getting a little 'leggy.' Would you prune them?"

As a general rule, azalea plants require very little pruning. This usually consists of cutting out dead twigs and heading back long shoots which have become "leggy." If the plants need pruning, do it now. If you wait until later in the growing season, cutting back long shoots will interfere with flower bud formation for next year.

"Some of my azalea plants are not growing as they should, although I have them in good location and have given them good care. Do you have suggestions?"

There are two primary reasons for azalea plant decline: setting plants too deep and nematodes. When setting, the ball of soil around the roots should be even with the surrounding soil. When this is accomplished, mulch with pine straw.

If nematodes are a problem, drench the soil around the plants with Nema-gon. Use this material according to instructions on the container.

Keep a sharp look-out for spider mites and lace bugs. These are sucking insects that cause the leaves to take on a mottled grayish cast. Considerable damage may be caused before they are discovered. Spray or dust

with malathion, at weekly intervals, until you clean up the infestation.

I read something interesting today in my Science News Letter: "Turnips Yield New Insecticide." Research workers at the University of Wisconsin have extracted a compound from the turnip which has been found to be as active as many insecticides now in use. It has been effective against houseflies, aphids, Mexican bean beetles, German cockroaches and mites. They call it two-phenylisothiocyanate.

Don't you quit eating turnips now, because, obviously, the compound does not affect man when consumed.

Some of the other compounds used effectively as insecticides and which are derived from plant sources are: Roenone from the Derris root; Pyrethrum from a daisy and Sabidilla from seed of a plant of the lily family.

MISS EVELYN S. PIGOTT of Freeport, Texas, enlisted in the Waves last month. She is the daughter of Mr. and Mrs. Glenn Pigott of Freeport and graduated from Cameron High School, in Texas in 1961 with honors. She is formerly from Southport.

### Food Shortage Stalks World

While some men work feverishly to reach the moon, hunger still stalks two-thirds of the people on earth.

And despite the efforts of countless scientists, the food shortage is likely to continue far into the future, says Dr. A. P. Stemberger, an agricultural economist at State College.

Dr. Stemberger believes there is at least four methods by which the world's food situation can be improved:

Adoption of better farming practices, especially by farmers in food-deficit areas;

Making more modern equipment available to farmers in underdeveloped areas;

Birth control; and

Increasing food production in developed countries, such as the United States, and making it available to other nations.

While Dr. Stemberger believes these methods would improve the world food situation, he is not optimistic about them being adopted fast enough to greatly increase food supplies in the near future.

Here's why:

Increased use of fertilizers, insecticides and better seeds by farmers in underdeveloped countries would result in greater harvests. But adoption of these practices comes very slowly in areas where most farmers are illiterate and bound by age-old traditions.

Making modern equipment available to farmers in backward areas also has its limitations, says Dr. Stemberger. The equipment, in most instances, will have to come from the outside. Farmers will have to learn to use it, and teachers are scarce in the undeveloped countries.

Then, too, if the new equipment displaces farm labor, serious employment problems may arise because few off-farm jobs are available.

Stemberger says several barriers prevent large scale birth control measures from being used in food-deficit areas. Chief among them are lack of education, social attitudes, religion and lack of cheap, relatively effective meth-

**Migraine Headaches**  
By DR. ROGER W. PRICE

Migraine is a chronic condition of nervous origin. It is characterized by severe headaches, vomiting and disorders of vision. The attack usually begins with a feeling of depression, heaviness over the eyes, and fatigue. Most frequently it begins at the base of the skull and radiates to the forehead.

CHIROPRACTIC success in handling of migraine headaches arise from spinal nerve pressure which is considered the cause of migraine. Freeing this spinal nerve irritation and pressure, the body is able to restore you to health. Be sure to consult your CHIROPRACTOR to obtain your desired relief and correction of MIGRAINE HEADACHE.

**CANDIDATE FOR HOUSE OF REPRESENTATIVES**

I want to make it clear that I am not running for or with any political faction or organization; nor for personal gain or to further my career. My only purpose in making this race is to try to do some things for Brunswick County and my fellow citizens which I feel have been long neglected. With your cooperation and support I promise to see if there isn't something we can do to speed up the progress and development of our area.
