

Waccamaw Federation Annual Banquet

Nakina Takes Top Honors

The Nakina chapter of the Waccamaw Federation of the Future Farmers of America took top honors at the annual banquet held last Thursday night at the Fair Bluff school cafeteria. The overall banner was awarded to the Nakina chapter for having the highest number of points for all contests for the 1961-62 school year. Winners in individual contests were, in the order of banner and \$15; \$10 and \$5: Tool identification — Nakina, Elizabethtown and Waccamaw. Public speaking—Nakina, Williams and Evergreen. Parliamentary procedure—Nakina, Hallsboro and Whiteville. Land judging—Bladenboro, Nakina and Williams. Dairy cattle—Bladenboro, Bostwick and Nakina. Beef and swine—Whiteville and Hallsboro tied for first place, banner each and \$12.50 each; Williams. Joseph P. Gore, Agriculture teacher at Williams school, was named advisor to the Federation for the 1962-63 year. Engraved plaques were presented to three county business firms for outstanding service to the Federation for the current year ending. They are: Marks tractor company, Waccamaw tractor company and the Waccamaw Bank and Trust company. Forest

Hall and Henry Wyche, accepted the trophies for the two latter firms in the order named. Ronald Hayes of the Federation and James W. Gore, Agriculture teacher at Nakina, is the retiring advisor for the organization. Jim Rabon, Agriculture teacher at the Fair Bluff school, represented his group as host for the meeting. The Clarkton high school orchestra rendered a series of popular selections as the main entertainment feature.

WACCAMAW FEDERATION OFFICERS of the Future Farmers of America pose for photo-graph following taking of oath at annual banquet held at Fair Bluff high school cafeteria last Thursday night. They are, left to right, Charles Strickland, Tabor City, secretary; J. E. Stevens, Nakina, treasurer; Junior Norris, Williams, president; Billy Galloway, Hallsboro, sentinel; George Benton, Whiteville, reporter; Joseph P. Gore, Agriculture teacher at Williams, Advisor.—(Staff Photo By Clemmons.)

other plants, produce spores. These spores germinate and attack the plant tissues. If the leaf is protected by a fungicide the spores are killed before they have a chance to enter the tissues. Once the diseases gain entrance, they are more difficult to control. These simple examples should serve to show how important it is to keep your plants protected at all times. Many people seem to think that one or two spraying during the growing season are all that are necessary. On the contrary, this battle against insects and diseases is never-ending. For this reason, it is best to follow a regular spray program for all of your ornamentals, fruits and vegetables. There are many effective spray chemicals available—some for sucking insects, other for insects that chew food and some combination materials which are effective against both types. Your county agent will have a supply of spray calendars for the different crops or can get them for you.

Be Wise—Advertise

Modern vs. Antique

By DR. ROGER W. PRICE

Modern Chiropractic treatment is one unique procedure by which nerve interference is relieved by various methods. There is no pounding, back breaking, jumping up and down or any of the various contortions supposedly involved in the chiropractic treatment of years ago. The Modern Chiropractic treatment in many cases gives an almost immediate sensation of relaxation and relief from pain.

The Modern Chiropractic treatment table is an ingenious arrangement of cushions and springs to afford maximum relaxation to the patient. Scientific Chiropractic treatment involves no pain to the patient whatever, but rather the patient usually feels much less tension and ease from pain. Your Modern up-to-date Chiropractor specializes in conditions of the nerves, bones, joints and muscles.

FOR BOARD OF EDUCATION

Since our public schools will not advance beyond the leadership of our national and local leaders, I believe the character of the candidate should be considered. My public activities are not as numerous as some, however, I believe my age and background is an asset to the office I seek, I am thirty three years old, a graduate of Shallotte High School, had one year in college, a member of the Methodist Church, Sunday School teacher for more than ten years, a member of the Shallotte Lions Club, a farmer and have had business experience and am an employee of Cape Fear Wood Corporation.

O. K. BELLAMY

The Farming Guide

(By A. S. KNOWLES, County Agent)

More than one-third of the usual Brunswick County corn acres have been diverted to the grain program for 1962. Those planting corn can realize much more by fertilizing and managing those acres in a manner that will produce 100 bushels per acre or more. It will take 30 bushels per acre to break even with corn valued at \$1.12 per bushel. Using this same value, a 75 bushel yield will return a net of \$38 a 100 bushel yield will net \$59.50, and a 125 bushel yield will net \$81. An additional amount of money can be earned when the corn is stored on the farm in metal bins. Brunswick County farmers need corn to feed hogs and beef cattle. Big yields can be produced by planting one of the adopted hybrids, applying 350 pounds of fertilizer at planting time, side dressing with 100 to 125 pounds of nitrogen at lay-by time, and control weeds and insects by soil treatment. Vrey little cultivation

is needed when weeds and grass are controlled. If wireworms are a problem, and you have to reset, put in transplanting water 4 ounces of 25 percent Diazinon E. C. to 50 gallons water. This is a new material, but is giving good control so far. Do you need quick grazing? If you do, the answer may be met by planting millet or sudangrass. You can plant either Starr or Gahl I variety at the rate of 6 to 10 pounds of seed per acre in rows. It will require 20 to 25 pounds if broadcast. Fertilize with 400 pounds of 8-8-8 at planting time, and at lay-by time use 30 to 60 pounds of nitrogen when 6 inches high and again after each grazing. Rotate grazing from field to field. The Land-Grant College, such as N. C. State College in Raleigh, had its beginning when President Lincoln signed a bill creating the U. S. Department of Agriculture on May 15, 1862. During the past 100 years American Agriculture has experienced unusual and outstanding growth. When the bill was signed one farmer was able to produce enough food and fiber for five people. Now one worker can produce enough for 26 people. The farm efficiency is still surging upward.

the nymph stages are usually the most destructive although the adult stage may also be destructive. In the case of fungus diseases, it is necessary to keep the plants protected at all times. These diseases, represented by various leaf spots of roses, apples and many

Garden Time

Spraying or dusting to protect plants from the ravages of insect and disease pests is the best insurance you have against damage.

A good slogan: use the right materials, at the right time, properly mixed; and do a thorough job of covering all parts of the plant, especially the undersides of the leaves to control sucking insects such as aphids, red spiders and lace bugs.

All insects have a life history or cycle. That is, they undergo changes which may occur in four stages: Egg, larva, pupa and adult. Or, in three stages: Egg, nymph and adult. The larva and

KINDNESS

The habit of saying kind words reacts on the heart and makes it kinder. It crowds out, steadily and surely, bitterness and sarcasm, slander and cynicism, and substitutes graciousness and charm. There is a great power in kind words, and there is boundless opportunity for their use in each life. "And be ye kind one to another, even as God for Christ's sake hath forgiven you." (Eph. 4:32)

S. BUNN FRINK CANDIDATE FOR STATE SENATOR

I have served in the Senate of North Carolina four terms and I am now serving as Representative from Brunswick County.

While serving in the General Assembly of North Carolina I have, among many other things, sponsored and worked diligently for the following:

- (1) Removal of tolls from Cape Fear River Bridge (accomplished).
- (2) Establishment of deep water port facilities in Southport (\$500,000 approved and now ready to be spent).
- (3) Establishment and operation of ferry service between Southport and Carolina Beach (has now been recommended by a committee of the State Highway Commission and Governor Sanford).
- (4) All-Seashore Highway system from Virginia to South Carolina (many hearings held and the prospects are promising).
- (5) Improvements, widening and establishment of U. S. Highway #17 as a four-lane highway from Virginia to South Carolina line (many hearings held and in many instances work in progress).
- (6) Deepening and cleaning out Waccamaw River in order to properly drain many thousands of acres of land in Brunswick and Columbus Counties. (Several hearings have been held with the Army Engineers. Prospects are good).
- (7) Deepening, widening and maintaining Shallotte and Lockwood's Folly Inlets.
- (8) Planting of oysters and promoting oyster industry (thousands of bushels have already been planted).
- (9) To secure money from the State and Federal Governments for building and construction of school facilities such as classrooms and athletic buildings, and thereby save the local taxpayers the expense of same.
- (10) For an educational system in our County and State second to none.

The foregoing are a few of the important matters for which I have worked hard and diligently, and if I am elected I shall continue my efforts in behalf of them. Please go to the secure the above named worthy projects. I have been doing my best and wish to assure you that I shall continue, but to do so I must have your help.
