Hello there!
Spring is really here. We took a trip to Greenfield and Orton Gardens Sunday and really enjoyed every minute of it. The beautiful flowers tend to heighten one's outlook on life.

There were tourists from many far-off places and we met folks from as far away as the state of Washington. There were several nice folks from Long Island, New York, too.

Have you been to Orton? Have you been to Brunswick Town? Have you dined at the famous Calabash? If you haven't, plan your weekend to include something of interest in our own Brunswick. The Little League is engaged in practice every afternoon after school. They are holding preliminary games at the Little League Field near Supply and these little ones are getting good and fast! Keep up the good work, boys, coaches and all the supporters these youngsters have.

Everyone is invited to the 4-H Dress Review and Talent

Show Thursday night. The 4-H Livestock judging team is getting in some practice sessions and we have hopes of winners this year.

We've had several mothers asking us about the measles vaccination. Well, we're certainly not an authority, but we've done some research on this and find it is very important to immunize all young children against German measles (rubella) so that the disease can be wiped out completely. The primary danger of rubella is to the fetus of pregnant women. If a woman has German measles during her pregnancy—especially during the early weeks—her child may have defects, such as deafness, mental retardation or blindness.

The seriousness of rubella became tragically known to thousands of American families during the 1964 epidemic. There were some 30,000 miscarriages and stillbirths, and there were crippling birth defects in more than 22,000 surviving infants.

So try to see that your child has the rubella vaccine shortly.

Mrs. Martha Northrop and children have returned to Atlanta, Ga., after visiting family and friends here for a few days.
See you next week!
