A VETERAN OF THE BLACK HAWK, MEXICAN AND THE CIVIL WARS.

CAPT. W. W. JACKSON.

Sufferings Were Protraciel and Severe -Tried Every Known Remedy Without Relief-Serious Stomach Trouble Cured by Three Bottles of Peruna !

Capt. W. W. Jackson, 705 G St., N. Washington, D. C., writes: "I am eighty-three years old, a veteran the Black Hawk, Mexican and the Civil Wars. I am by profession a physi-cian, but abandoned the same.

"Some years ago I was seriously affected with calarrh of the stomach. My sufferings were protracted and severe. I tried every known remedy without obtaining action." without obtaining relief.

"In desperation I began the use of your Peruna. 1 began to realize immediate though gradual improvement.

"After the use of three bottles every appearance of my complaint was removed, and I have no hesitation in recommend ing it as an infallible remedy for that dis-order."-W. W. Jackson. Address Dr. S. B. Hartman, President of The Hertman President

COLORADO HAS A SODA LAKE.

Remarkable Discovery Made in the Heart of San Luis Valley.

One of the most remarkable discoveries ever made in the region is that of a lake of liquid soda in the inaccessible desert between Crestone Col., and Hooper, in the San Luis valey. The lake is an acre and a quar ter in extent and lies at the bottom of a little basin valley in the desert. On its surface soda crystals have collected to a depth of eighteen inches the whole lake having the appearance of a body of ice with a hard snow covering.

A recent examination by the state school of mines shows that these cry

A VERY BAD POLICY will of God. Hence, you will see, one of the prime characteristics of the church triumph-OUR REGULAR SUNDAY SERMON. ant is perfect liberty. "Get religion," said Augustine, "and do as you please."

An Elegant Discourse by Rev. Wm. Young Chapman.

Brooklyn, N. Y .- Dr. William Young Chapman, pastor of the Lafayette Avenue Presbyterian Church, Buffalo, preached Sunday at both services in the Central Presbyterian Church, in the morning he had as his subject "Churchgoing Abolished." The text was from Revelation xx1:22: "And 1 saw up temple therein." Dr. Chapman said:

Among many things in this sublime apocalypse of St. John hard to be understood there is one thing that stands out with clearness and certainty, and that is the vision of the perfected church, the ideal society. It is the same church triamphant and perfect there that is militant and defective here. The same souls that struggle and suffer here are they that walk in white and wave palms of victory there. Here we see as in a glass darkly. There they see face to face. Here we know in part, there they know as they are known. John had given to him a divine horoscope, revealing the consummation and absolute perfection of the essential characteristics of the kingdom of God concentrated in the imperial capital of the universe-the city of God. By every sort of figure and sym-

hol are its glories set forth. And we lesen as much about it by what is said negatively as by what is said positive Thus we are told it has streets of gold and gates of pearl and a sea of glass and all the most costly and beau-tiful things of this world, while all that is disagreeable - pain, sickness, sorrow, sin, death-is wanting there. There is nothing to hurt or annoy, no night, no more sea, no temple. And it strikes us at first thought as very strange that there should be no temple, no central place of worship in a city which we are accustomed to think is altogether devoted to religion. And yet the text states a great truth which I want to treat broadly, and I believe the text contains easily the subjeet by which I have chosen to entitle discourse, "Churchgoing Abolished." The end being attained, the

means are discontinued. Hence there are no more churches, no times, nor places, nor forms; no liturgles, nor rituats; no ecclesiastical machinery such as we know here

And, surely, this must come as a welcome announcement to many a tired churchgoer in this world who finds his religious duties more or less irksome, and to many a non-churchgoer, who loes not feel quite comfortable in his reglect of formal religious exercises. Many there are who indulge an indifferent hope of heaven as a sort of ing "no temple therein." Mohammedan paradise, where they may enjoy an eternal holiday, basking

in the uncreated rays, drinking from and bathing in the waters of the fountain of life, eating the twelve manner of fruits and sailing on the glassy sea. But they would hardly be attracted to a place where this ceaseless round of ecclesiastical duties should go on forever. Imagine such a one enjoying the delights of that glorious city, counting the towers thereof, marking well her bulwarks and admiring her foundations of jasper and sapphire and chalcedony and sardius and emerald and

sardonyx and chrysolyte and heryl and shall we be ready for that society topaz and chrysoprasus and jacinth and amethyst, when suddenly there

stals are 37 per cent pure soda, purer than most of the commercial soda offered on the market. A Denver man E. M. Falke, has secured a lease of the land containing the lake and is now installing machinery which will convert the native crystals into market able form. There are 4,000 tons in sight.

The school of mines experts say that the soda is a creation of feld spar. The granite mases of the Sangre de Cristo range stand sentinel on two sides of the little valley. The feldspar in the granite, undergoins decomposition, collects in the lake basin, where it is held in check by an impervious clay, and proper conditions are furnished for concentration and evaporation.

Banks as Public Benefits.

Many people who deal with banks every day do not really understand the proper object and purpose of bank ing. Banks can not create money, but they can gather small sums which are distributed among the people and thus create an aggregate which can be made available for important business operations that previousy would have been impossible. Individuals, each possessing a few hundreds or a few thousands, invest it in stock in a bank, and thus a fund of \$50,000 or \$100,000 is established in a town or community as a great aid to the business activity and prosperity of its people. There is no more money in the community than there, in any case, there was previously, but it is in a form where it can be made to assist expression in a most elaborate cercmoin the successful conduct of five times nial. There were divers washings, as there were multifarious causes of unor ten times the amount of business than its actual sum stands for .- New Orleans Picayune.

Owl'z Devotion to Dead Mate. A remarkable instance of bird instinct and devotion is reported from Quaker Neck. Early last month Henry Brown, a farmer there, set several jump traps about his farm to catch prowlers, of whatever nature, that had been playing havoc with his flock of fowls. A day or two later he missed one of the traps. Bartus Trew, a neighboring farmer, discovered two owls in an apple tree. One, a large horned owl, was in evident distress, trying to shield and warm its mate. To a leg of the dead bird was hanging Brown's jump trap with chain at. tached .-- Philadelphia Record.

In 1904 we made 11,572 pounds from forty-six cows and got a net price of twenty-one cents per pound.-

A Sea Telescope.

A recent invention, the hydroscope enables a spectator at the sea's surface to view objects at the bottom of the sea. The inventor is an Italian Cavaliere Guiseppe Pino. The machine is constructed of steel, and in shape is like a huge telescope. Pointed downward into coral caverns or sunken ships, instead of upward at the sun or the stars, its complex system of lenses twelve in number, answers to the objective glass of a celestial telescope By the internal mirrors they produce a clear picture of the sea bottom, the rays of light passing up the tube to a sort of camera-obscura house at the top, which floats above the surface, and is capable of holding four persons.
