I am particularly glad to speak to this audience of miners and their wives and children ,and especially to speak under the auspices of this great temperance society. In our country the happiness of al lthe rest of our people depends most of all upon the welfare fthe wage-worker and the welfare of he farmer. If we can secure the welfare of these two classes we can be reasonably certain that the community as a whole will prosper, And we must never forget that the chief factor in securing the welfare alike of wageworker and of farmer, as of everybody

Something more can be done by com ination and organization among ourselves in our private capacities as citizens, so long as this combination or organization is managed with wisdom and integrity, with instance upon the rights of those benefited and yet with just regard for the rights of others. No one society can do more to help the wage-worker than such a temper ance society as that which I am now addressing.
