We beg leave to inform our friend Darius, the Mede, that no man can befall good old Daniel Nov. 6, his face is turned toward Jerusalem. The Foushee-Wood that sprung up out of the brush of democracy Aug. 13th will be choked out by the heavy growth of English-Burrow timber Nov. 6. Umph! The speech of Rev. John Dennis delivered at Asheboro Saturday, has been highly complimented by both parties. Mr. Dennis is well known in our town and county. Seventeen years ago he was engineer at the mill here. Since then he has become a presiding Elder in the M. E. church. He lives at Troy, Montgomery county, and the nominees of the republican party to represent Randolph and Montgomery in the next general assembly. We can't see why an upright man should not have a voice in the law making body of the Old North State. The notion that ministers of the gospel should not engage in politics is without good reason, and the voice of a good man will not be heard is not true. The Bible tells us that one man can chase a thousand, and two can put ten thousand to flight. If this be true and the Word is true, there remaineth no hope for the democratic nominees of Randolph and Montgomery. Acoustic. Mr. and Mrs. J. M. Several of our good citizens attended the republican county convention at Ashboro Saturday. Wish for the readers of the Bulletin to tell us what this sudden call for Bryan stands for anyway? It is mysterious enough to be called a 16 to 1 puzzle. As Mr. Bryan is very hungry, and his mouth has been watering about ten years for pie. We think Teddy ought to be sympathetic enough to give him a small piece. If you wish to turn a democrat's stomach just mention free silver and he'll begin to back away. M. H. H. Morgan, W. R. Harris and J. C. Ragan attended the convention at Ashboro Saturday. Wellman Voyage to Pole. Walter Wellman, who was sent out to go to the north pole in an air ship, cabled the New York Herald from Hammerfest as follows: "I have decided not to attempt a voyage northward this year, on account of defects in the mechanical equipment of my airship. According to the announcement made last winter in anticipation of such possibilities, the expedition will continue next year. My party is now completing a great balloon house and other features of the plant and making experiments with a view to the campaign of 1907. This year will be one of preparation and the next one of action. "Our confidence of success in 1907 has been increased by this summer's work and by our weather observations. The motors work well and the balloon is in good condition, but the ear and mechanical equipment will be entirely rebuilt in Paris during the winter. The expedition will arrive here next May and will find everything ready. This year the whole summer has been consumed in building the plant. I shall return to Europe the middle of September, leaving a small party here to guard our headquarters. Are you troubled with piles? One application of Manzan will give you immediate relief. Enacting the Common Law. The Hepburn railroad rate act went into effect Tuesday without reducing the value of a single railroad security. The act will not to the end. It does nothing but enact the common law. Railroads under it must treat all comers absolutely alike. They cannot give the big firm or the big corporation any advantage over the little one. They cannot carry the man with a "pull" free and make the man without one pay his fare. If one firm has a siding every other firm with like demands must have a siding. If one man has to pay demurrage on cars every other man must pay it also. Railroad directors owning express company shares cannot, in the realm of "higher finance," as Mr. E. H. Harriman's counsel called it, swell the profits of the express company by making a favorable contract with the railroad. Neither can palace and sleeping car companies charge monopoly rates which mule passengers on one side with their contracts with the railroad of its fair price for hauling cars whose dead weight makes their movement costly. These and every railroad transaction are laid bare by public accounts, and under the common law a common carrier has no secrets. What has always been the law of the land in regard to railroads and all other common carriers has now become federal statute law in such shape that it can be enforced. This will injure none but those who have been violating their duties and evading their responsibilities as common carriers. Philadelphia Press. It is a well known medical fact that pine resin is most effective in the treatment of diseases of the bladder and kidneys. Sufferers from back ache and other troubles due to faulty action of the kidneys find relief in the use of Pine-ules. \$1.00 buys 30 days treatment. Sold by Asheboro Drug Co. It's a significant fact that the strongest animal of its size, the gorilla, also has the largest lungs. Powerful lungs means powerful creatures. How to keep the breathing organs right should be man's chiefest study. Like thousands of others, Mrs. Ora A. Stephens, of Port Williams, O., has learned how to do this. She writes: "Three bottles of Dr. King's New Discovery stopped my cough of two years and cured me of what my friends thought consumption. Oh, its grand for throat and lung troubles.
