AN OLD EDITOR

The editor of a paper out in Okla. said: "Yes, it is true when I got hold of Grape-Nuts food it was worth more to me than a \$2000 doctor bill to me, for it made me a well man. I have gained 25 pounds in weight, my strength has returned tenfold, my brain power has been given back to me, and that is an absolute essential, for I am an editor and have been for 35 years."

Brooklyn, N. Y.—Preaching at the Irving Square Presbyterian Church, on the above theme, the pastor, the Rev. Ira W. Henderson, took for his text the following verse: "Remember the Sabbath day, to keep it holy."

Right now is the best season of the year to get rid of the blood, liver and kidney ailments that have been troubling you. You need building up now in order to stand the strain of the hot weather of summer.

THE JUNE COTTON REPORT

Area and Condition of the South's Great Staple—Comparison With Former Seasons.

New York, Special.—The Journal of Commerce has published its June cotton report covering acreage and condition.

Reports of the condition are exceedingly poor, indicating a very early start, compared with 1906 and 77.4 per cent in 1905.

Comparing with last year's acreage North Carolina's figures show 163.1 per cent, South Carolina 127 per cent, Georgia 101 per cent, Florida 102.1 per cent, Alabama 97.2 per cent, Mississippi 95 per cent, Texas 106.6 per cent, Arkansas 97.6 per cent, Tennessee 97.1 per cent, Missouri 89.6 per cent, Indian Territory 103 per cent, Oklahoma 116 per cent.

As already stated, the total acreage is 12 per cent over that planted last year. So far as the figures of condition are concerned, North Carolina is 80.2 against 76 last June, South Carolina, 77 against 81.6; Georgia, 75.1 against 55.7; Florida, 80.9 against 84.1; Alabama, 61.6 against 79.3; Mississippi 66.4, against 80.1; Louisiana 65 against 87.3; Texas 68 against 84.8; Arkansas 69.8 against 81; Tennessee, 71.7 against 72; Missouri 77, against 76; Indian Territory 70.6, against 79.6; Oklahoma 71.4, against 86.3.

The average condition of the entire cotton belt is 69.0 against 82.1 a year ago.

The season averages are nearly a month late and many correspondents refrain from committing themselves to estimates until the crop has advanced to further maturity.

Much of the seed has not yet sprouted, but where stands have been obtained they are generally poor. In regard to the condition the persistence of unfavorable weather has discouraged planters, a feeling which is reflected in the wide distribution of reports describing the outlook as the "worst in an experience of 40 to 50 years."

There is not an unusual scarcity of labor and grassy fields are by no means general.

Two Amendments are Offered. Norfolk, Special.—The supreme assembly of the uniform rank, Knights of Pythias, convened in annual session at Jamestown exposition.

The Less Incurred By the Increased Cost of Paper Will Be Felt Keenly by Those Least Able to Bear It.

In reference to the heavy advances in the cost of printing paper, the Statesville, N. C., Landmark, in its issue of May 23, says:

"Newspapers are catching it on the price of paper now. A good grade of paper, such as the Landmark is printed on, has been selling for years at an average of 2 1/2 cents a pound. Since January 1st the price has advanced to 3 cents and just where it will stop we don't know."

Some of the papers which have yearly contracts, especially the big dailies which buy in large lots, will suffer a little from the advance, but in North Carolina, for instance, the great majority of papers, don't buy over a three months' supply at a time and many of them buy only for a month or a paper which can afford it least are hit hardest, and the worst of it is the advance is a dead loss to them.

In the mercantile, manufacturing and almost all other businesses the price to the consumer is changed as prices fluctuate and in this way the retailer can take care of himself as a rule. But it is almost impossible for a newspaper to change an established subscription rate and almost as difficult to advance an advertising rate, once it is established. The average newspaper in this State, therefore, which finds the price of material or other things advanced, simply loses that much in profits and in most cases the profits are short enough at best."

68, BUT PERFECTLY WELL. The Happy Experience of a New Castle, Pa., Woman.

Mrs. John Mansell, 614 So. Jefferson St., New Castle, Pa., says: "For years I was running down with kidney trouble and finally got so bad I was given up. The urinary passages were painful, sometimes scanty and again very profuse. My back, feet and ankles ached dreadfully, and sometimes my whole body. My heart palpitated and I had smothering spells. A week's treatment with Wintersmith's Chill Tonic brought me a few boxes cured me. At 63 I am strong and well."

SULPHUR BRINGS HEALTH.

Purifies the Blood and Clears Up the Complexion.

Everybody needs to take Sulphur at this season. Nothing like it to purify the blood, clear up the complexion and remove that tired feeling.

How to Meet and Overcome Them. A Simple But Sure Treatment.

Early Spring, with its sudden and often violent changes of temperature; with its accompaniments of rain, dampness and fog; with its depressing and enervating influence; it is not only in itself the most treacherous and trying of seasons, but finds the average person in the physical condition least fitted to resist and overcome the influences at work.

While a late season is not always a bad season, good weather is much needed to improve the condition and the crops are that there will be a good demand for all the crops at profitable prices to the growers.

Comparing with last year's acreage North Carolina's figures show 163.1 per cent, South Carolina 127 per cent, Georgia 101 per cent, Florida 102.1 per cent, Alabama 97.2 per cent, Mississippi 95 per cent, Texas 106.6 per cent, Arkansas 97.6 per cent, Tennessee 97.1 per cent, Missouri 89.6 per cent, Indian Territory 103 per cent, Oklahoma 116 per cent.
