to tread.-Pope. A mind quite vacant is a mind dis-

tressed .- Cowper. He gives twice who gives quickly. -Goldsmith.

Fifteen acres of lumber yards were burned at Saco and Biddeford, Maine If things were done twice, all would be wise.-German.

#### Start at the Bottom.

Two boys left home with just enough money to take them through college, after which they must depend entirely upon their own efforts. They attacked the collegiate problems successfully, passed to graduation, received their diplomas from the faculty, also, commendatory letters to a large ship-building firm with which they desired employment. Ushered into the waiting room of the head of the firm the first was given an audience. He presented his letters. "What can you do," said the man

'I would like some sort of a clerkship."
"Well sir, I will take your name and address; and if we have anything

of the kind open will correspond with As he passed out, he said to his companion, "You can go in and leave your address."

The other presented himself and "What can you do?" was asked. "I can do anything that a green

hand can do," was the reply. The magnate touched a bell which called a superintendent. "We want a man to sort scrapiron," replied the superintendent.

And the college student went to sorting scrap-iron. One week passed, and the president asked, "How is the new man

getting on?" "Oh," said the boss, "he did his work so well, and never watched the clock, that I put him over the gang." In one year the man had reached the head of the department, and an advisory position with the management, at a salary represented by four figures, while his whilem friend was still out of employment and seeking a

## MARCH OF SCIENCE

The President Addresses the **Tuberculosis Congress** 

## PRAISES GREAT ACHIEVEMENTS

Great Meeting of Scientists Adjourns to Assemble Next at Rome-President Speaks.

Washington, D. C., Special.-The International Tuberculosis Congress which has been in session here closed Saturday to meet next in Rome.

One of the most pleasant surpirses of the closing scenes of the congress was the appearance for the first time during its proceedings of President Roosevelt. In a characteristic address President Roosevelt paid a notable tribute to the assemblage of so many scientists of intenational reputation. The President spoke in part as fel-

"It is difficult for us to realize the

extraordinary changes, the extraordinary progress, in certain lines of soeial endeavor during the last two or three generations; and in no other manifestation of human activity have the changes been quito so far-reaching as in the ability to grapple with disease. It is not so very long, measuring time by history, since the attitude of man towards a disease such as that of consumption was one of helpless acquiescence in what he considered to be the mandates of a supernatural power. It is but a short time since even the most gifted members of the medical profession knew as little as any layman of the real cause of a disease like this, and therefore necessarily of the remedies to be invoked to overcome it.

"Take, for instance, the work that the United States government is now doing in Panama. The Isthmus of Panama, which was a by-word for fatal disease, has become well-nigh a sanatorium; and it has become so because the investigations of certain medical men which enabled them to find out the real causes of certain diseases, especially yellow fever and malarial fever, and to take measures to overcome them. The older doctors here when they were medical students would have treated the sugrestion of regarding mosquitos as the prime source of diseass like that as a subject of mirth. These utterly unexpected results have followed patient laborious, dangerous and extraordinary skillful work that has enabled the cause of the disease to be found and the diseases themselves to be combatted with extraordinary suc-

"At this moment in the middle of be great continent of Arfrica there is he sleeping sickness, a disease which f it had been known to our ancestors spoken of as the black death was spoken of in the middle ages-as a scourge of God, possibly as something connected with a comet, or some simlar explanation would have been advanced. We all know that it is due to the carrying of a small and deadly blood parasite by a species of biting

"And the chance to control that disease lies in the work of just such nen as, and indeed, of some of the men who, are assembled here. You who have come here, however, have ome to combat not a scourge confined to the tropies, but what is on the whole the most terrible scourge of the people throughout the world. But few years ago hardly an intelligent ffort was made or could be made to war against this peculiarly deadly enemy of the human race. The chance successfully to conduct that war arose when the greatest experts in the medical world turned their trained intelligence to the task. It remains for them to find out just what can be done.

"I feel that no gathering could take place fraught with greater hope for the welfare of the people at large than this. I thank you all, men and women of this country, and you, our guests, for what you have done and are doing. On behalf of the nation greet you, and I hope you will understand how much we have appreciated your coming here.""

#### Tennessean's Brutal Crime. Bristol, Tenn., Special.-A special

from Johnson City says: L. A. Bayless, a magistrate attacked his brother-in-law, Berney Bayless, while the latter was asleep in bed at his home in this city and almost literally chopped his head off with an axe. He then attacked Bayless' wife, fatally wounding her. Turning the weapon upon his own wife, who was in the house, he struck her several blows inflicting probably fatal injuries. Bayless was arrested and half an hour later was found dead in his cell, having hanged himself.

## Young Man Killed at Oil Mill.

Vienna, Ga., Special. - Millard Sheppard, the night foreman at the Vienna Cotton Oil Company, was eaught in a belt at the mill early Saturday morning and instantly kill ed. The body was badly mangled, one arm being torn from the frame and nearly every bone being broken Young Sheppard was a member of prominent Dooley county family and had a large circle of friends here.

## Cost of Thaw Trial.

New York, Special.-The total cost to New York county of the prosecution of Harry K. Thaw for the shooting of Stanford White has been \$54 .-837, according to papers submitted by District Attorney Jerome to Justice Mills at Newburgh. The purpose of influence. Mr. Jerome's application to Justice Mills was to have the approaching trial on the question of Thaw's mental condition transferred from Westchester to Now York county.
