A GOOD ROADS BOOM.

Present Impulses Toward Their Building Never Equalled.

There has been manifested in the several States of the East and South, the past year, an impulse toward the construction and maintenance of good roads, that has never been equalled in the past and that is likely to grow as the years come and go. In almost every one of the older commonwealths there has been an awakening to the economic value of such improvement. Perhaps the multiplication of automobiles has been one of the impelling causes of this larger movement but the farmers and all others interested in local transportation have caught its spirit, and have come to realize that business as well as pleasure would be promoted by the establishment of those conditions toward which it tends. When a husbandman masters the simple calculation that because a span of horses can draw twice as much over a good road as a poor one he is therefore getting twice as much service at no additional expense, he is pretty sure to give his approval and support to the enterprise.

Almost every State along the Atlantic slope has taken action within the past year looking to the betterment of its highways. Although Massachusetts has been a leader in this respect for a number of years, the new distribution of a percentage of the appropriation made for this purpose among the small towns is bound to show material improvement in a very short time. It will not give all sections such roads as the highway commission construct for demonstration purposes, yet it will inevitably raise the general standard and stimulate local interest to a larger extent in this form of improvement. New Hampshire has projected a decided advance in this respect to build three trunk highways through the State. New York has bonded herself for millions for a like purpose and the result will doubtless promote her internal interests to a greater extent than her barge canal and at a much earlier date. By much pressure the Governor of Pennsylvania succeeded in having authority given by the recent Legislature for the construction of a great highway between the principal cities of the State, representing the eastern and western halves. With her comparatively limited resources, Maryland has appropriated millions for this purpose and in conjunction with West Virginia has arranged for a highway that will be a revelation to the people of those States.

Similar action, even if on a less extended scale, might be instanced in other States, but, comparatively speaking, Georgia seems to have girded up her loins for the most significant advance in the whole sisterhood.

Accidentally Shoots Brother.

While "Breaking" Gun Frank Holton Accidentally Wounds his Brother, John Holton.

John Holton, the 11-year-old son of District Attorney A. E. Holton, was accidentally shot about 8 o'clock Friday morning by his 16-year-old brother, Frank. The entire load took effect in the boy's limb below the knee and penetrated the flesh so deep that Dr. John Bynum, who attended the boy, decided it would be unwise to attempt to remove any of the shot.

The boys were at the farm of their father, five miles south of Centerville, where the district attorney and his family reside. They had gone down to the farm for a little hunt. The gun is a single-barrel breechloader, and it appears that Frank was "breaking" it when it unexpectedly fired. John was standing just behind Frank at the time.

Mr. and Mrs. Holton had also gone to the farm with the boys, and Mrs. Holton was returning home when overtaken by a messenger and notified of the shooting. She drove back to the farm in her buggy and brought the wounded boy home. The boy is suffering considerable pain from the shot wounds.

It will at least be several weeks before the boy will be able to walk.

Young Holton is a cousin of Chas. L. Holton of this city.

Miss Bryan for Congress.

Ruth Bryan Leavitt, daughter of William Jennings Bryan, has announced her candidacy for the nomination for Congress from the First District of Colorado. She has dreams of making the nation's legislative halls, where her father once sat, ring with her melodious voice.

Former Senator Patterson has given his promise that if the Democratic party of the State shall nominate a woman for Congress he would use his influence for her. Mr. Bryan has given his consent.

Mrs. Leavitt is president of the Jane Jefferson Club.

Double Track Work Commences.

[Charlotte Observer.]

The work on the double-tracking of the Southern railway from Harrisburg to Charlotte has already begun. A force of hands has already been assigned to the job from Harrisburg to Newell and active operations will commence at once. Sundry lots of ties and machinery has already been put in place, including a big steam shovel and determined efforts will be made to complete the contract by the first of the new year.

Men's Clothes vs. Women's.

When a man is dressed completely he wears ten articles, including his socks and necktie. A woman wears nineteen different articles in her hair alone. A woman wears at least fifty-seven different articles and is compelled to keep track of them. A woman spends one-third of her time in dressing and undressing; a man about twenty-minutes each day.

The Milky Way.

The reason that the stars in the Milky Way seem so close together is because we look at them edgewise. They really are not closer together than in other parts of the heavens, but there are, indeed, billions of them, and most of them are supposed to be surrounded by planets. Their color depends on their degree of heat. Very hot stars are blue, but there are also red and green and pale yellow ones. The real color of our sun, they tell us, is blue, its red and yellow hue being due to our atmosphere.

GREAT STORM RAGING.

Key West Badly Wrecked—Much Damage to Property.

Key West, Fla., Oct. 11.—As the result of the hurricane which struck the southern coast of Florida this morning, Key West tonight is a mass of wreckage and the damage done to property is estimated at \$2,000,000. Martial law was proclaimed by the mayor at 6 o'clock, and the Key West Guards are patrolling the city.

The United States government has been asked to dispatch troops here without delay to assist in patrolling the storm-swept area.

Chaos reigns on every hand, and few people remain in their homes, hundreds of which have either been wrecked or damaged. It is impossible to say at this hour whether there has been loss of life, but it is feared that many lives have been claimed along the coast.

It is known that many have received more or less serious injury, and reports are current that several lives have been lost. But these have not been verified. The storm reached its height at 1 o'clock this afternoon, when the wind reached an estimated velocity of 100 miles an hour. There was a hard steady blow from 8 a. m. to 3 p. m., when the wind began to die down, and by 6 o'clock the center of the hurricane had passed this point.

While the hurricane is the worst that Key West has ever experienced, the local weather observer announced tonight that the indications are that the entire coast of Florida will suffer terribly tonight.

Of 10 local vessels in the harbor this morning, but five remain at anchor, the others either having gone to sea or been washed upon the beaches. The streets along the water front are a mass of wreckage.

Brick as well as frame buildings throughout the city suffered alike from the fury of the heavy wind, and many miraculous escapes from death or serious injury have been reported.

Besides the several scores of residences either totally wrecked or blown from their pillars, nine factories were partially destroyed, including the Havana-American Martinez, Nicholas, Ruy Lopez, Mantel Lopez, Fleitas Torres, Cortez and Wolf cigar manufactories.

No. 1 and No. 3 engine houses of the city fire department were destroyed, the firemen narrowly escaped, but several of the horses being killed. The top of the First National bank was blown off, the postoffice damaged and two running gears of the government coal station were wrecked.

Every telephone and electric light pole on DuVal street, the principal thoroughfare of the city, were blown down.

Corn is Still King.

Corn may be "off" a few million bushels this year, but it will remain the king crop all the same. Farmers in recent years have been holding back great quantities in their bins, but the wiser ones last Spring sold at the topnotch prices. They have learned from actual experiences, and the Government bulletins to the enormous extent that corn can shrink in storage.—Phila. Press

Are Your Kidneys Sick?

If you want to get well and stay well you must make the kidneys well. The kidneys are the most important organs in the body: they do the most work and as a consequence get out of order quickest.

You cannot run a great piece of machinery without attention of some kind. Neither can you expect to have good health if you fail to look after your Kidney Machinery.

The blood passes through the kidneys thousands of times a day, as often as through the heart, and this is going on every minute of our lives.

If the kidneys are well they filter just so much blood, but if they are sick or weak from any cause they leave the poison in the blood, and this poison poisons the entire system.

When you consider their great work and the ease with which they become deranged, can you wonder at ill-health, and sickness?

Can you wonder at the alarming increase and prevalence of kidney trouble?
