On another page will be found an article taken from the "Evergreen," a magazine published by Dr. B. Craven and Reuben Brown, at Asheboro, in 1851. The older people of this section will remember this publication and the article in question. It is a tradition that has many believers; in fact, about the middle of last century, it was generally believed by the people living along Richland creek and many people spent time and much effort trying to locate the "kettle of silver." Whether the silver is really there or not the article is interesting in more ways than one. It gives some well nigh forgotten history, or tradition, and is well written and entertaining from start to finish. In our next issue we shall tell of facts which the editor has heard and the location of the old furnace and smelter.
