ADMINISTRATRIX'S NOTICE

ADMINISTRATOR'S NOTICE-

GIL MADE EARTH ROADS.

New Product Which Will Keep Dirt

Highways Hard and Smooth Now it is possible to make smooth soulevards out of rough country roads st a comparatively small cost, at a comparatively small cost. Pro-reacted rainy weather may prevail or regular "gully washers" may come, but the roads treated by the new pro-cess will keep hard and smooth even though mud is knee deep in the ditches and in the fields. A prominent oil com-pany asserts it has solved the probiem. The general manager of the fuel oil department of that company in New York city states that for several New York city states that for several years his company has been making tests to perfect an oil which would serve the same purpose on the earth roads in the country and small towns as the asphalt road oil does on the macadamized boulevards. In April the company placed on the market the standard macadamized asphalt binder oil for earth roads. Tests have been standard macadamized asphalt binder oil for earth roads. Tests have been made in different parts of the United States, and the general manager says it has been thoroughly demonstrated to be a complete success. To show his confidence in the oil, arrangements have been completed to bud a small section of road at Independence. Mo.

The process of making good roads with this new brand of road oil is very should. First the road must be ployy thinks. First the road must be ployy.

simple. First the road must be plow-ei thoroughly and then run over sev-eral times with a harrow, after which it should be rounded with a grader

it should be rounded with a grader and dragged to make it hard. After this it is ready for the road oil.
"The cost of this process is far less than the rock or macadamized roads, of course," said the manager. "It will cost from \$500 to \$600 a mile to thor-

cost from \$500 to \$000 a mile to thor-oughly oil an earth road the first time. The cost after that is far less each year to keep it oiled.

"It is expered that this new process will revolutionize road building. We receive thousands of letters from all parts of the country asking for com-plete details. The demand has been af strong it has been necessary to have writted matter prepared on the sub-erritted matter prepared on the subprinted matter prepared on the sub-ject. The good roads movement is spreading rapidly. It is one of the most striking evidences of continued and substantial prosperity. Good roads enhance the value of property and the pleasure of living in the community."

CONCRETE BLOCKS FOR ROADS

Only the Wheel Track is Paved, Re-ducing Cost of Construction.
Orlando H. H. Dickson of Jackson-ville, Fla.. one of the most active champions of good roads in Duval county for many years, has received word from his attorney at Washington that a patent has been gliowed on his that a patent has been allowed on his concrete block for constructing roads The authorities at the patent office at first refused him a patent because the method was, they thought, in conflict with other similar roads that had been with other similar roads that had been patented, but Mr. Dickson employed a first class attorney, who fought the matter through to a successful issue. The road as patented consists of heavy concrete blocks in shape not un-

like common T rails laid on their sides except that they are much larger and only three or four feet in length. They have a mortise on one end and a tenon on the reverse end and so are a tenon on the reverse end and so are locked together, making them a continuous road, but easily repaired if broken, as one block can be taken out and another one inserted in a few moments' time. The groove is large enough to easily carry an automobile tire, and such a road can be built with a double track at less cost than ordinary first class country roads cost. Mr. Dickson is in correspondence with several manufacturers of machinery for concrete work, who assure him for concrete work, who assure him that a machine can be constructed to turn out several bundred blocks in a day at small cost for labor. A short piece of the road is now in use between Jacksonville and Apoka and has been tested enough to prove its com-plete adaptability as a first class road for farm vehicles or automobiles.

Crushed Coral For Roads.

General Carlos Garcia-Velez, minis-ter from Cuba to the United States, who has been traveling in the west to promote reciprocity sentiment, says that Cuba boasts of more than 1,300 miles of the most excellent macadam roads in the world.

"We used crushed coral in our roads in Cuba," said he, "and there is no better medium for road building known. It is practically impervious to water and when rolled smooth pre-serves for many years its continuity. Our government has expended \$15,000,000 in the past three years in this tinue until we have a perfect system

The good roads movement is an economic movement, a thing that somewhere and at some time touches

Good Roads Would Help Everybody.

somewhere and at some time touches the "pocket nerve" of every producer and every consumer in the land, a fac-tor as indispensable as anyigable in-land waterways to the fundamental settlement of all freight rate questions. A real and stable macadam highrone between Denver, Kansas City and Chicago, for instance, would be of more benefit to the economic development of Colorado than forty successful appeals to the interstate commerce commission

Good Road Campaign.

The chamber of commerce of Wichita Falls, Tex., has engaged in a campaign of education on good roads subjects. It is sending out speakers with stereopticon exhibits to lec-ture in county schoolhouses on the advantages of improved roads and to secure signatures to a potition to the county commissioners to call an elec-tion to vote on a \$100,000 bond issue for the construction of good roads in the precinct or district.

ARRAIGNS REPUBLICANS

Congressman Webb Pleads For Economy in National Administration.

Washington, D. C., April 11. Protesting against the growing ex-travagance in government and plead-ing for economical administration of the affairs of this country, Re-presentative Yates Webb, of the Charlotte district, said in a speech in the House while the saval appro printion bill was under consideration. "This bill carries the enormous sum of \$129 000,000 for the navy. With it the State government of North Carolina could be run and maintained for forty-three years, and yet this is an annual appropriation for the navy. Is it not an awful commen-tary on our Christian nation that \$7 of every \$10 collected as revenues to run the government are spent for war, either past, present, or pros-While discussing the reckless ex

travagance in government expendi-tures, Mr. Webb emphasized the fact that there are thousands of peoole out of work today who must help pay these heavy burdens, and to whom the high cost of living is already a serious question. The speaker inserted in the Congressional Record press dispatches from North Carolina, New England and various textile centers, showing that many corton mill plants are idle. In this cotton mill plants are idle. In this connection Mr. Webb said: "I call attention to the cotton-mill industry in the United States

at the present time.

"Mr. Chairman, the Republican party has been in complete control of the National Government for twelve years, and at the end of that time we find the cotton-mill business a worse condition than for many years past. What is the matter?

all curtailing; men out of employment; nothing for the women and children to do, though all need money to buy the necessaries of life, and the cost of living is still going

ontinue to suffer.
"The people asked the party for

bread; they have been given a stone.
Do you not think we had better have
a change by electing a Democratic
Congress this fall and a Democratic

President next time?

for such a party?"

GREAT VICTORIES FOR DEMO-CRATS.

dental election, Governor Glenn replied to a reporter of the News & Drink up a dollar? I'd better throw Observer in Raleigh this week: "I have been in 37 States since my term as governor expired and have talked to all classes of men, Republicans and Democrats, and it seems to be the universal opinion that the Democrats will carry the next House of Representatives, and that the chances are more than good, that they will elect the next president. There is great dissatisfaction toward:

"Gaston county, Norta Car-There is great dissatt sfaction toward Taft's administration on the ground that he has broken all the party's pledges, that his administration has that he has broken all the party's pledges, that his administration has been guilty of the greatest amount of extravagance, and that there are more charges of shaded than had existed for many years. After going into Ohio and talking to leading citizens there, I was convinced that Harmon will be renominated and elected governor and that in this event he will be the logical candidate on the Democratic ticket for president, I tis almost a certainty that he would carry the Ohio electoral vote. The Republicans in Ohio are badly divided, Garfield standing with Roosevelt-Pinchot element and Ellis standing with Taft. In the event that Harmon does not carry Ohio the other most talked of men are Gaysor, of New York, and Marshall, of Indiana, both of whom at this time are particularly strong."

GLENN IN NEW YORK

Stalwart Champion of Prohibition Pours

For more than an hour at Carnegie Hall yesterday afternoon ex-Gov-ernor Robert B. Glenn, of North Carolina, laid himself out to banish the Beast, the Rum Beast, and the United Church choir of New York, banked 40 strong on the stage, and the Lotus Glee Club helped him on, while a crowded house encouraged him by joining in the churuses of songs as uncompromising as this:

"Born in the wedlock of passion

and drink, Sin set and sick ere they learn how

to think, Damued to defeat from the cradle's

white brink, Wnat shall become of our children?"

Governor Glenn was the leading attraction at a meeting in the inter-est of local option for the cities. "I have not always been an absolute testaler," said he. "I am ashamed to say that I used to lay it to St. lege friends, two are in the grave, three are in insure regions and two are a disgrace to the name of North Carolina, all through that

demon.
"I've heard the moans and groans and shricks of agony going up to Almighty God from the asylums and and shrieks or agony going up to crats in the house on monuay or learned that 33½ per cent, of the victims are there through drink; I've visited the old soldiers' homes and for Vice President Sherman for Vice President Sherman to the control of the speaker of the House live visited the old soldiers' homes "The high protective tariff of the Republican party is gradually destroying that great industry. Mills are closed down everywhere, few, if sany, are running on full time, nearly sheltered there are there from this any, are running on full time, nearly sheltered there are there from this meeting to defeat the measure. Mr. same curse.
"Because I have seen these things.

ment; nothing for the women and children to do, though all need money to buy the necessaries of life, and the cost of living is still going in. What is a poor man going to do?

"The Republicans promised in the last campaign that they would revise the tariff. The people trusted them and elected them again; but, it! instead of revising the tariff downward and leasening the east of living, they actually raised it at the command of the greedy trusts, who furfished the money to put the party in power and the people must continue to suffer.

"New York, whose forefathers"

"Because I have set als I have fall have felt these things, I have dedicated the measure of life, damning evil (Applause). If the set in the twing the rest of my life to fighting that terrible, damning evil! (Applause). If the rest of law, disease instead of law, disease instead of law, disease instead of health, rags instead of colthes, how dare you, how can so to parts of Texas—I think that country is full of speculators and bad water.

Mexico for emigration and no the Empire State and for the great. Mexico last that country is full of speculators and bad water.

Mexico for emigration and no the water! I took a trip to Mexico last that our tongues parched and swelled up until we could hardly talk. be abolished.
"New York, whose forefathers

stood with Washington at Valley Forge for freedom, who stood at Yorktown; New York, who furnish ed the bravest that confronted the South from '61 to '65—how long "Let us make the vote against the Republican party unanimous, for it has betrayed the people. In their last tariff bill they tax automobiles only 40 per cent and the poor man's blankets over 100 per cent. Dismonds they tax just 10 per cent, right to vote for local option, in five while the poor man is taxed over 100 per cent on his woolen clothes land shawls for his wife.

"How can a laboring man vote for such a party?"

South from '61 to '65—how long will its freemen submit to being governed and controlled by the whiskey ring through the legislature keep its hands about your throats? Because they know that if they give you the while the poor man is taxed over 100 years there won't be a saloon in New York State, and I believe New York itself would be found right in line.

'How can a laboring man vote 103,000 for liquor, in 1907 went 45,-103,000 for liquor, in 1907 went 45,000 for God, all through the progress of local option. That's all you want right here, and you'll call me back once more before I die to the control of the contr celebrate with you the victory of a salconless State.

Asked what he thought about the chances for Democratic success in the next election and also the presidental election, Governor Glenn replied to a reporter of the News & Dript or State.

List Takers for 1910.
