and Practical, He Became Surveyor at Sixteen.

George Washington was fond of mathematics, and, having mastered arithmetic under Mr. Williams, the boy's practical mind soon developed in him a genius for its practical use. After he finished school he spent much time at Mount Vernon and Belvoir. He studied persistently at home and practiced land surveying on Lord Thomas Fairfax's extensive acres not far from

At the age of sixteen George Washfacton was appointed to the office of public surveyor, a position well consid-sted as both bonorable and lucrative. Young Washington was sent out to survey some backwoods land, and survey some backwoods land, and while at work there he boarded with a widow who had seven big, strong sons, all fond of athletic sports. Aft-er the day's work was done these young men gathered each evening on the plot of ground before the door to try their skill at running, jumping and wrestling to see, as they termed it. "which was the best man." In run-ping and imming. Genere, Washington "which was the best man." In run-ning and jumping George Washington always took the lead, but at wrestling his companions boasted many years later that they had often inid the Father of His Country on his back.
