

TELL IT TO OTHERS.

Resources and Advantages of North Carolina Ought to be Advertised.

No State in the Union possesses such a variety of soils and climate as North Carolina, from the tidal regions where the palmetto and the long-leaf pine grow, to the mountain section where the white pine and the fir tree flourish. It is said that there is in North Carolina every variety of climate to be found between Florida and Maine. In the east we have a subtropical country and as the elevation rises westward to the mountains the altitudes of the Appalachian range furnish a climate like that bordering on Canada. Hence it might be observed that the various elevations from the Atlantic rice growing country to the back wheat area in the Blue Ridge embraces every agricultural product that grows in the South and every agricultural product peculiar to any other portion of the United States, North or South, with the exception of the strictly tropical fruits, although there are very few of any of the fruits that do not find ideal adaptation somewhere in North Carolina.

Naturally, therefore, the agricultural resources of North Carolina and the possibilities for fluid and horticultural products cannot be equalled anywhere in America. The same can be said of the State's mineral resources, for geology, mineralogy and crystallography demonstrate that more gems and more minerals are found in the State than in any other portion of the United States. The forests of North Carolina also produce practically every wood to be found east of the Mississippi river, while the rivers and streams from the mountains and Piedmont regions furnish unlimited power, so that with the State's natural advantages and ideal climate there is no wonder that North Carolina is close to the top as a manufacturing State. All these advantages and the possibilities and opportunities in a State of such magnificent resources in more than one particular ought to be advertised in a manner worthy of the best State in the United States of America.

It is gratifying that to some extent the State is again to be advertised, in a way, at the Ohio Valley Exposition, which opens August 29th, at Cincinnati. The Star already has carried the news from Raleigh that the State's exhibits for the exposition are being shipped to Cincinnati. Many of the exhibits already have been forwarded and they will soon be followed by Curator Brimley, of the State Museum, under whose direction the North Carolina exhibit will be made. It is said that the State will have quite a fine exhibit, embracing the State's chief agricultural and horticultural products, minerals, gems, timber and fisheries products. The fisheries exhibit, it is said, will be the only one from the Southern States, and while it represents a business of \$2,000,000, it will demonstrate the great development of which the fisheries industry is capable.

The North Carolina exhibits have never failed to attract marvelous attention at the various expositions and no doubt they have attracted millions of capital and many settlers to the State. We believe, however, that they should be accompanied by a systematic scheme for advertising every part of this wonderful State. Attractive advertising matter, giving the particulars and describing the different sections of the State, together with their adaptabilities and possibilities in every line of industry, should be distributed by the thousands. There is nothing like handing out to exposition visitors some kind of advertising device that is so attractive and in such shape that the recipient will want to stick it in his pocket and carry it home with him. It will be found that money spent in artistic advertising of North Carolina, will beat the ordinary printed matter that might be glanced at but invariably is fed to the winds.

This matter of properly advertising North Carolina should be one of the first things to be taken up at the January meeting of the General Assembly. It is a matter worthy of the most earnest consideration and deliberate action.

The Home Coming week at Lexington this week, is quite an event in that enterprising town and the large crowds attending have had a most pleasant time.

News From the University.

I feel that the people of Randolph county ought to know more about the workings of the University of North Carolina. Owing to the fact that Guilford College gets the larger part of our boys, the county is not so much interested in the state institution as it should be. We have six young men here this year from Old Randolph, and it is our earnest purpose to add more every succeeding year. I believe an excellent plan to do this is through the Asheboro Courier.

This week I would like to tell you something about the religious advantages of our institution. I say this because it is a state institution, founded and perpetuated for the benefit of every boy in North Carolina, whether he is rich or poor. I know that in certain sections of Randolph the people are prejudiced to the church schools. They claim that a young man should go to his church school in order that he may be surrounded by the best environments. Do not understand from this that I am trying to pull down church school. I know that they have their place in our educational system. But I do want you to consider the University from a religious viewpoint. We have a strong Y. M. C. A. here. It is a student organization in which every boy has an opportunity to do some kind of religious work, and if he does not desire to take a part, he will get the influence from others who are carrying on the work. Prayer meetings which are conducted by students, are held every week. We also have a meeting on Tuesday night of every week, at which some member of our efficient faculty addresses us on

Preventive Treatment for Oat and Wheat Smut

Bulletin 212 of the North Carolina Agricultural Experiment Station by Dr. F. L. Stevens which has just appeared from the press gives full directions for preventing the various smuts of oats and wheat. These are due to little living parasitic plants which grow within the wheat and oat plants. They cause large loss, cutting down the yield of grain often as much as 20 per cent, or even 30 per cent, while stinking smut of wheat does much greater damage by injuring the milling quality of the grain. The formalin treatment which is thoroughly effective and costs almost nothing, is described and recommended for oat smut. The same treatment is even more effective than the ordinary blue-stone treatment for the stinking smut in wheat. The loss smut of wheat can be prevented by a modified hot water treatment, coupled with separate growth of seed in a protected seed plant. Director C. B. Williams, West Raleigh, N. C. states that these diseases cost one thousand upon thousands of dollars a loss every year to the oat and wheat crops of the State and that this bulletin was prepared especially to give farmers at this time the latest and most effective means of combating these diseases. He states that a copy of this bulletin may be secured by any resident of North Carolina free of cost upon application to him.

Ralph Johnson, the famous actor, while making a flight at Denver, Colorado, fell 500 feet and was instantly killed last Thursday.

The jurors for November term of Superior Court, were drawn, a list of whom appears elsewhere.

United States Senator A. S. Clay, of Georgia, died at Atlanta last Saturday after a long illness. Senator Clay was 67 years of age and was serving his third term in the Senate.

The new census gives Indiana a population of 2,700,876.

The Next Legislature.

The Democratic victory is about complete. Not only to congressmen, the state ticket and well nigh all the county officers, but the legislature is democratic by a largely increased majority. In the lower houses of the general assembly it appears that gains have been made in Alamance, Caswell, Caldwell, Catawba, Cherokee, Davidson, Forsyth, Jackson, Macon, Orange, Person, Stanly, Washington and Wayne. In the Senate there is a gain of one in Rockingham and one in Buncombe and it may be two in the Fifth district, but it will take the official vote to decide, while the possible loss may gain the 39th district. In the House the Democrats are sure of 102 and in the Senate 45, with the chances good for more in both House and Senate.

Condition of U. S. Banks.

The following dispatch was sent out from Washington some days ago pertaining to the condition of the banks of the United States: From a canvass as to the condition of banks in the United States, national and private, conducted by the comptroller of the currency, for June 30, 1910, it was found, according to the report made public, that the capital of the banks amounted to \$1,879,000, an increase of \$80,000,000, and individual deposits \$15,283,400,000, an increase of \$4,247,900,000 over last year. The information acquired is for the benefit of the National Monetary Commission and it is claimed furnishes the most valuable statistics ever collected by the comptroller of the currency.

NORTH CAROLINA NEWS.

Work has begun on the Stateville Air Line from Stateville to Mt. Airy via Elkin.

The town of Webster, in Jackson county, was partly destroyed by fire last Sunday night.

Mr. A. G. McKay, a railroad clerk, at Lumberton, committed suicide Thursday night.

Ada Bryant, a colored woman who was recently injured in an automobile accident, at Raleigh, is dead.

High Point and Thomasville are resuming their fight for a new county seat with High Point as the county seat.

Governor Brown, of Georgia, has appointed former Governor J. M. Terrell United States Senator to succeed the late A. S. Clay.

Charles H. Armfield, a prominent lawyer of Statesville, died Monday night of this week. He had been ill several months of bright disease. He was a brother of Gen. J. F. Armfield who recently died. Another brother Mr. J. B. Armfield, a leading lawyer of Statesville. He was private secretary to Governor Scales and at time of his death was a member board of directors of the State Hospital Morganton.

Dr. T. R. Little Dead.

Dr. T. R. Little, one of the brightest young physicians in the State died suddenly at his home in Greensboro, November 15th, aged about 36 years. His death is believed to have been caused by asthma with probably complications of the lungs. One report states that his death was caused by an over dose of morphine and one account says that it was believed he committed suicide.

Marriage of Miss Etha Ridg.

Miss Etha Ridg was married last Wednesday, at noon, in the West Market M. E. church, in Greensboro, to Mr. C. Wister Stockard of that place. Miss Ridg is the eldest daughter of the late W. J. Ridg, who lived in Cedar Grove township, this county before he moved to Greensboro and is a most handsome and estimable young lady. Mr. Stockard is a son of Dr. J. K. Stockard, who at one time lived at Liberty, and is a young man of fine character and attainments. Their many friends wish them a long and happy life.

What Will Congress Do Next Year?

The Democrats have a working majority in the next House of Representatives of nearly sixty. The members elected do not meet until December 1911, unless there is a special call session. It is believed, however, that when the sixty-second session of Congress convenes, that the Democrats in the House will pass a tariff bill in the House that will put the question up to the Republican senate—such a tariff bill as will lower duties on the necessities of life would bring much relief to the people. Such action on the part of the Democrats would not only be good politics, but it would be in the interest of the masses as against the classes.

THINK THIS OVER.

This Offer Should Gain the Confidence of the Most Skeptical. We pay for all the medicine used during the trial, if our remedy fails to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. That's a mighty broad statement, but we mean every word of it. Could anything be more fair for you? A most scientific, common-sense treatment is Rexall Orderlies, which are eaten like candy. Their active principle is a recent scientific discovery that is odorless, colorless and tasteless; very pronounced, gentle and pleasant in action, and particularly agreeable in every way. This ingredient does not cause diarrhoea, nausea, flatulence, griping or any inconvenience whatever. Rexall Orderlies are particularly good for children, aged and delicate persons. If you suffer from chronic or habitual constipation, or the associate or dependent chronic ailments, we urge you to try Rexall Orderlies at our risk. Remember you can get them only at our store. 12 tablets 10 cents; 26 tablets 25 cents—The Rexall Store.

some vital question of student life. These meetings are very helpful to all who will take a part in them.

Under the auspices of the Y. M. C. A. a Bible study class is carried on. Every Sunday at 12:30 o'clock these classes meet in every building on the campus. A text book is used, and a leader selected by the Y. M. C. A. has charge of each class. Three courses are given for study. First, the Life of Christ, who is the one great model for us all to follow, is given for study. Second, the life of Paul is one that every student gets something out of. The study of his life of service in all of its simplicity, appeals very strongly to the young man who is preparing himself for a life of usefulness. Then lastly, the life of the Old Testament characters ought to thrill every serious student of history. It deals with early workings of God with men. We have four hundred students enrolled in these courses of usefulness and power.

For fear that I will become tedious, I will pass on to another phase of our work here, which is worthy of much praise. There are eight Sunday Schools in the country surrounding Chapel Hill. These schools range from three to six miles distance. Men walk out to these schools every Sunday and teach their classes. They are interested in the work and are doing more toward the advancement of the surrounding community

life than any other force in college. Not only the campus life is surrounded by religious influence but the town is a quiet religious place. There are four church denominations in the town, namely, the Methodist, the Baptist, the Presbyterian, and the Episcopalian. All these furnish excellent preachers, who fill their respective pulpits twice every Sunday. All these churches have thriving Sunday Schools. Now I hope that you will consider these simple statements from a student of the University and a native of Randolph, who desires a larger representation from his county. I have given you the religious advantages, as I see them, and urge that all the young men of Randolph who intend to enter college soon will look into the advantages of the University of North Carolina.

Next week I hope to tell you something about the poor boy, who comes to the University. Guy B. Phillips.

John Rader, who confessed to burning the warehouse of the Newton Hosiery Mill last year, was sentenced to two years in the penitentiary by Judge Pell last Saturday. This is the case, it will be remembered, in which Rader claimed he burned the building at the instigation of D. J. Carpenter, the owner. Mr. Carpenter was acquitted of complicity in the act.

Mr. Vancannon's Prize Corn.

Mr. J. B. Vancannon, of West End, Moore county recently raised 149 1-2 bushels of good shelled corn on one acre of land. Mr. Vancannon worked under the direction of the Farm Demonstrator for his county and, so far as heard from, has won the prize. This year he made his crop on sandy land that had been in rye followed by peas, and broken deep in November. The soil was good and everything was favorable for a good crop. The corn was planted four feet three inches apart, twelve inches in the row. Eight tons of stable manure was broadcasted in the fall and spring and 500 pounds of 16 per cent acid, 500 pounds of kaffir, 300 pounds of oat seed meal and 100 pounds of nitrate of soda were put on at different times. Cultivation was shallow, being done with a spring toothed barrow and the ground was gone over seven times. The actual cost was about \$40.00 while the crop gathered amounted to 139 1-2 bushels of good sound corn besides the rye and peas taken off before. Mr. Vancannon is an old Randolph man, who moved to Moore county some fifteen or twenty years ago.

The annual conference of the M. E. church, South, convenes in Winston-Salem today, and the annual conference of the M. P. church also meets today in Kernersville.

Some Republicans who cannot see beyond the point of their noses are already predicting a panic because of Democratic success. They seem to enjoy a panic regularly every ten years under Republican administrations. We should think they would have enough of the Roosevelt panic during which four times as many National banks failed than during the so called Cleveland panic which was inherited from Harrison's administration and was cured by Cleveland when he secured repeal of wildcat silver certificate Republican financial legislation. The financial losses and the number of unemployed during the Roosevelt panic were enormous compared with the depression under Cleveland's administration. In North Carolina alone last year the number of unemployed was 36,000, and this is four years since the panic began, leaving some of it ill effects to this very day. Republicans certainly should quit howling about panics and hard times in view of the Republican panic records, with which all ought to be familiar by this time.—Wilmington Star.

It is now believed that Miss Josephine Hood, of Asheville, who married Lord Douglas four years ago and mysteriously disappeared, has been located in Idaho.

The corn crop in Randolph is the best yield in years.
