WASHINGTON LETTER.

Importance News of the Capital-President's Message-Economical Measures.

(Rr G. H. Tavenner, Special Washington Co positioner of the Courrier.)

Washington, Dec. 13.—The Aldrich currency system is near enough to be taken seriously by the country. The Aldrich monetary commission is holding daily sessions. Banks favorable to the scheme are brigging what pressure they can on the members of both parties to get them to view the Aldrichidea favorably. A million dollar fund is being raised to finance a campaign in ing raised to fluance a campaign in

ing raised to the proposition.

Ex-Seaster addrice professes to beheve that he will be able to rush a bill inaugurating the "Central Reserve association" through at this session of Congress. The fact his idea is boked upon with distance and distance by the small backers and distance to the small backers and and slarm by the small bankers and the people of the country does not discourage him. He has passed jok-er-laten to iff oills for the trusts in er-laden the fit office for the ep-the past in the very tooth of the op-position of the entire country. Ap-parently he thinks he can do the disposed of and the in improvements. same thing with the currency plan, which he feels would be a fitting which he recas would be a litting crowning glory to his achievement as a stateman. But he may be disappointed, as he is reckoning without the progressive Democrats and Republicans in both Houses who stand ready to begin a campaign of advantage of the record.

This is one of the concealed jok-ers in the Aldrich plan. To mis-lead the public, Mr. Aldrich pro-poses that the central association, as he calls it, shall discount for banks he calls it, shall discount for banks any commercial paper properly en-dorsed by the district association to which the bank belongs. In his public discussions he mentions no other form of discounts than com-merical paper. But there is in reality this added provision: That the central association shall discount the district obligation of any bank. the central association shall discount the direct obligation of any bank, upon a certificate from the district association that the bank seeking this discount has deposited with the association securities estisfactory to the association, which will be domi-nated by Wall street banks.

The refits the banks on make on

The profits the banks can make on The profits the banks can make on straight commercial paper, which has a value of its own, are restricted to legitmate profits. But corpora-tion securities have chiefly a manu-factured value, and the Aldrich plan would enable banks loaded down with undirectal convince. with undigested securities, put out from Wali street, to draw good mon-ey from the Central association by drossiting these securities with the local association. This is distinctly an Aldricherque proposition.

The ual docket of the December of the Randolph Superior occupied all of last week. Numerous cases of the State against minor offenders were settled, the offenders finding in every case that Judge Daniels was a merciful man.

The grand jury made its report Friday and disbanded. Several bills of indictment were presented and the county offices and home were examined into and reported on.

The county offices were reported as being well kept and orderly. The jul was reported unsafe and unsaintray and the graed jury recommended the safe of the jul and old courtbouse property, the proceeds to go to the creetion of a new and nuclera jul in the rear of the new court-

One feature of the Aldrich currony plan which has been largely overlooked, is so characteristic of the author that it may discredit the whole program. It virtually permits the central reserve association to discount railroad and other corporation scourities.

posed route.

The defeat of the proposition in The defeat of the proposition in Randolph county came from several causes—chief among these being that the Randolph people have an inherent distaste for issuing bonds and that especially when they do not see clearly the results of such action. In Guilford county the township of High Point wated the issue, for High Point wants another issue, for High Point wants another railroad. The other townships did not seem to think so well of the pro-

bouse property, the proceeds to go to the creation of a new and medera jud in the rear of the new courtmone.
