

Profit by Competition

When several fertilizer companies decide to extend their business into new sections, price cutting is apt to occur. Farmers are tempted by these reductions to buy even lower grade goods than the average. But the lower the grade, the less plant food one gets for a dollar.

Ask for one per cent. increase of Potash in place of each dollar per ton reduction. Instead of a price cut of three or four dollars you will get 25 or 33 per cent. more plant food for the same money.

Tell your dealer about this right away—the price cutting may come at any time.

We will sell Potash in any amount from 200 lbs. up. Write for prices.

Your Teeth Can be Extracted WITHOUT PAIN

Nervous people, who fear the dentist and allow their teeth to go without attention, are taking a frightful risk. Decayed teeth seriously impair the health of a human body. If you have held back because you fear the pain of extraction, your fears have been groundless. A good dentist can extract them with very little annoyance to you. At the same time the antiseptic solution he uses will heal the gums and cause your mouth to regain its normal condition.

20 Years Experience

Together with two post-graduate courses in dentistry have prepared me to do any of your work. Inlays, amalgam or cement fillings, plates of all kinds; any service that a capable dentist can render you.

Cooking Recipes.

"Baked Biscuits" Without an Oven

Mix and cut out as for baking in an oven. Have a spider well greased and hot. In this place the biscuit, greased on top; cover, and when they are half done, which can be judged by their puffness, turn each biscuit carefully and finish the baking without cover. One can bake biscuit in this way in less than half the time it takes to get an oven hot enough, and does away with the heat, as moderate baking is necessary, and but little heat is required. It can all be done over one hole of a cook stove or burner of gasoline. If the latter is used, it is well to place an asbestos mat under the pan, to prevent browning too quickly. This plan, I am sure, will please all who try it. A little baking powder, even if soda and sour milk are used, will make biscuit lighter, and make less shortening necessary.

Mock Cherry Pie.

Cranberries 1 cup, raisins 1 cup chop these together. Add of sugar 1 cup, water 1-2 cup, vanilla 1 tea spoon, a small lump of butter one egg, and a sprinkle with flour. Bake with two crusts.

Squash or Pumpkin Pie.

To 1 quart of good and fresh mashed squash or pumpkin add 1 cup, 1 egg, 1/2 cup sugar, 3-4 cup milk, and 1/2 teaspoon salt of pepper, nutmeg, and nutmeg. Beat well and add just milk enough to make a full pie.

Date Marmalade.

Stone 2 lbs dates, put them over fire in 1 pt water until hot, but not boiling, then add 1 lb granulated sugar, 1-4 lb. ground nutmeg, 1-4 teaspoon ground cinnamon, and a piece of butter size of a hickory nut. Cook well, stirring until thick, then place in cans as with other preserves. The children like this on crackers and bread; it makes a nice filling for cake, and is excellent for sandwiches.

Silver Drippings.

This has been used in our family for nearly 200 years: To 1-1 2 pt water add 4 lbs sugar and 1 small teaspoon "powdered extract." Place over the fire and boil 8 minutes (count from time it boils). The scum which comes on top must be removed. Strain through a thin cloth and it is ready to use. The powdered extract is made as follows: To 30 lbs pulverized sugar add 3 oz white flour, and 1 lb best powdered alum. This can be kept on hand and used.

Brigh'en Rural Life.

Every homestead, every country town, can profit by the example of the cities. They are cleaning up their slums, establishing parks and playgrounds, and going to large expense to improve and beautify. How seldom is this spirit seen in rural communities! Yet with a little effort, gumption and co-operation, how much more attractive farm, home and village may be made.—Farm and Home.

A Drag on Better Farming.

Agriculture and education trains to promote better farming are a popular feature with many railroads. Yet some of these same roads, through their high rates on pure bred live stock, are defeating the very ends they are working for. The requirement that an attendant accompany pure-bred stock and pay full presenger rates going and coming, often costs the shipper more than the freight, and frequently the two items exceed the value of the animal.

Roads operating north and west of Chicago have no such burdensome restrictions. The southwestern roads and those in the southern classification are the most serious offenders. This section of the country also stands in the greatest need of pure-bred sires, and their widespread use would bring large return to the railroads due to the production of more and better stock. Good feed and care will go a long way in improving stock and increasing profits, but it is only half. Improved stock is necessary to start with if you would get the best dollar out of the feed or of pasture.—Farm and Home.

Care of Farm Machinery.

Farm machinery should have proper care and attention. It is not uncommon to see mowers, hayrakes, plows and other farm machinery in the barn lot or in fence corners without any protection. The farmer who leaves any of his farm implements out of doors is losing money.

A recent farmer bulletin bearing on this subject has this to say: "A binder with average crops of 50 to 100 acres ought to last 20 to 30 years or longer. In that time but 1,000 to 2,000 acres would be harvested and it is certainly not unreasonable to expect that much from a machine. A good farm wagon ought to last 50 years; a steel roller almost a lifetime; a grain drill 25 years; a hay rake and hay tedder 25 years and a disk harrow 15 years."
