THE CREED OF SCIENCE

Superstition is not religion. Belief without evidence is not religion. Faith without facts is not religion. What is religion? To love justice, to long for the right, to love mercy, to pity the suffering, to assist the weak, to forget wrongs, and remember bene-fits-to love the truth, to be sincere to utter honest words, to love liberty to wage relentless war against slavery in all forms, to love wife and child and friends, to make a happy home, to love the beautiful in art, in nature, to cultivate the mind, to be familiar with the mighty thought that genius has expressed, the noble deeds of all the world, to cultivate courage and cheerfulness, to make others happy, to fill the life with the splendor of generous acts, the warmth of gen erous words, to discard error, to de stroy prejudice, to receive new truths with gladness, to cultivate hope, to see the calm beyond the storm, the dawn beyond the night, to do the best that can be done and then to be re signed-this is the religion of reason, the creed of science. This satisfies the brain and the heart. The creed of science is the best for all mankind, and there are but six words which need to be kept before the worship-er of this creed-TRUTH, LIBERTY, CONRAGE, LOVE, MERCY, PITY.

MEET AND TALK IT OVER

How many farmers in this section of the county have a clear idea as to the best method of securing country roads? Doubtless most of them have given the subject more or less se-rious thought, and 'f they would only get together occasionally and talk 't over some one would be able to advance a plan that would be practical and easy of solution. Let's have a meeting or two. A few of you farm ers get together and select a date and place and then tell us about it and we will announce it in advance in the paper and hustle up a big attend-There are but few things we ance. can do if we only make up our mine to succeed.
