

COUNTY BOARD OF EDUCATION APPORTIONS SCHOOL MONEY

At a meeting of the Board of Education Thursday, January 10, 1918, the following apportionment was made for teachers' salaries for a term of four months...

There will be another apportionment some time in February or March for the fifth month of school. The exact amount cannot be given until the State Board of Education has made its report to the County Board of Education.

GIRLS! HAVE A MASS OF BEAUTIFUL HAIR, SOFT, GLOSSY, WAVY

A Small Bottle Destroys Dandruff and Doubles Beauty of Your Hair

Within ten minutes after an application of Danderine you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A NERVOUS WRECK

From Three Years Suffering. Says Cardui Made Her Well.

Texas City, Tex.—In an interesting statement, Mrs. G. H. Schill, of this town, says: "For three years I suffered untold agony with my head. I was unable to do any of my work."

I just wanted to sleep all the time, for that was the only ease I could get, when I was asleep, I became a nervous wreck just from the awful suffering with my head.

I was so nervous that the least noise would make me jump out of my bed. I had no energy, and was unable to do anything. My son, a young boy, had to do all my household duties.

Nothing relieved me until I took Cardui. It did wonders for me."

Try Cardui for your troubles—made from medicinal ingredients recommended in medical books as being of benefit in female troubles, and 40 years of use has proven that the books are right. Begin taking Cardui today.

THE OLD HOME ROAD

Rushing down the country, pouring through the streets, Wherever runs the home road the heart beats sweet, The home road to honey, The laughter and the song, Away from the mills and money And the squabble of the throng.

Wherever runs the home road the best dreams are, The home road to music Of the old, sweet things, The mother and the babies, And the company of kings.

Winding through the brambles or running by a stream, Wherever runs the home road the next blooms dream, The home road to comfort And peace and to rest, The little arms that necklace And the roses of a breast.

The old road, the home road, the dear road again, Wherever runs the home road you meet real men.

The home road to supper And a story and to bed With blue eyes on a pillow And a curly head.

Our Population and Money The U. S. Treasury calculates that the population of the United States on January 1 was 105,006,000. This does not include the island possessions. The population has more than doubled since 1880.

The amount of money that ought to be in circulation is now equal to \$48.76 for each man, woman and child. This has nearly tripled since 1879, when it was only \$16.92 for each person.

An unknown percentage of the money which ought to be in circulation according to the Treasury books has probably been lost, destroyed, melted, burned or permanently hoarded so that it is not actually in circulation.

Schoolroom Air and Adenoids

It is a constant source of anxiety to parents nowadays that children of school age seem so susceptible to coryza (so-called "head colds"), sore throat, tonsillitis, enlarged tonsils and adenoids. They wonder why doctors are always discovering enlarged tonsils and adenoid growths and urging the need of operations.

One definite cause for this tendency of children to develop chronic disease of the nose and throat or unduly frequent acute nose and throat troubles, is unquestionably the foul air in the school room.

A great deal of study and observation in recent years has produced at least one very positive conclusion, namely, that excessive warmth is the principal feature which distinguishes foul or "stagnant" air in a room from fresh or pure air. As soon as the temperature of the air in a room rises above 70 degrees Fahrenheit, and often when it rises above 68 degrees, the symptoms caused by "bad air" manifest themselves in the occupants of

WANTED—MORE FRESH AIR. Keep the Temperature Below 70 Degrees and Keep Plenty of Fresh Air Circulating.

the room. These symptoms are familiar to every one who has to sit through a performance in the average city theater or hall: Drowsiness, dullness of intellect, yawning or desire to yawn, dull headache, fatigue, sometimes nausea or fainting.

In school children, especially the children between the ages of five and ten, wandering of attention and apparent unwillingness to study, are noticeable when the air becomes foul (too warm). Teachers, forgetting the regulations of temperature, are likely to attribute this to pure mischievousness or poor deportment.

Letter from Pison Jan. 31, 1918.—As the Courier seems to be very incomplete without a line from these parts I will dish out a few pointers.

I would say something about the present inclement weather, but as the ground hog is billed for a visit soon I will keep silent on the subject for fear the reptile might torpedo me without a moment's warning.

Mr. Charles Mason continues seriously ill at his home near Pison. Mr. Mason is a hard worker, and an honest man, and good citizen. We wish for him a speedy recovery.

I noticed a fellow recently glancing over the columns of one of the leading dailies, when he came to the memorable words of President Wilson that this country must be made safe for democracy, he threw the paper down with an oath saying the word democracy ruined the paper. This fellow knew just enough to think his words referred to the Democratic party. This is the latest one.

The knockers and fault finders are no doubt smiling over the continuous rough weather as they can go ahead with their chin music and never miss a note.

Well, there is one subject swept from the minds of the unfortunate fellow. This is the beautiful cotton that makes us clothes. When the price was low and getting lower, they lost much sleep abusing but since the price has been soaring in the skies they will go to town to find out the

EVER SALIVATED BY CALOMEL! HORRIBLE!

Calomel is Quicksilver and Acts Like Dynamite on Your Liver

Calomel loses you a day! You know what calomel is. It's mercury, quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel just remember that your druggist sells for a few cents a large bottle of Dodson's Liver Tonic, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and cannot give you a headache.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tonic starts your right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.

The familiar effects of foul air on the teacher, as noted in a great many instances, are nervousness, worn out feeling, anemia, poor appetite and unrefreshing sleep.

Open air schoolrooms are not for the rabble, but only for the more intelligent communities. It is going to take years of effort yet to impress upon school boards in the remote and unenlightened sections the value of open air instruction, both physically and mentally, and especially for delicate children. Yet fresh air is cheap enough everywhere, and the use of the cloth window screens for the windows of any schoolroom will keep the air fresh and sweet, yet not too cold for comfort, and at the same time exclude dust, rain, wind and snow. The muslin screen simply takes the place of the wire screens used in summer time. It admits plenty of soft light, and is a very cheap way to insure fresh air in any schoolroom. Teachers, in schools where it has been tried out, at first opposed, then endured, and finally became enthusiastic about the screens, for the children showed better general deportment, better scholarship and far less frequent "colds" and other illnesses.

A schoolroom may be fitted with cloth screens at a cost of about \$1.50 per window, and the fresh air itself keeps the circulation active and keeps the children and teacher comfortable with considerably less cold.

QUESTIONS AND ANSWERS.

An Old Trick. G. L. Brokshire. Upon leaving a bottle of urine stand for a few days a "brick-dust" looking substance settles to the bottom of the bottle. What is wrong with my kidneys?

Answer: The deposit you see settling to the bottom of the bottle of urine on standing is probably what is known as "phosphates and urates." This sediment is an indication of trouble in the alimentary tract. Again old Doctor Dief must come to the rescue, bringing along plenty of good drinking water and healthy foods. Warning: The only way to be sure that this is the condition is to have a good physician make at least four or five careful examinations of morning urine on separate days.
