

LAST TO WEAR OUT
Lowest in Mileage Cost

THE next time you need a new tire or new tube, try a GILLETTE. They and tubes made the new improved way—the Gillette Chilled Rubber Process. Watch and see which tire or tube gives you the greatest service value. In tests of this kind—the only dependable method of determining merit—Gillette Tires and Tubes are invariably the last to wear out—lowest in mileage cost. The Gillette Chilled Rubber Process toughens rubber as it is extruded into shape. This process is a scientific fact. It is the reason why Gillette tires and tubes are so long wearing.

WEAK, RUN-DOWN

Carolina Lady Got So She Could Just Drag—'Cardul Built Me Up,' She Declares.

Kernersville, N. C.—In an interesting statement regarding Cardul, the Woman's Tonic, Mrs. Wesley Mabe, of near here, recently said: "I have known Cardul for years, but never knew its worth until a year or so ago. I was in a weakened, run-down condition. I became draggy—didn't eat or sleep to do any good; couldn't do anything without a great effort. I tried different remedies and medicines, yet I continued to drag.

"I decided to give Cardul a trial, and found it was just what I really needed. It made me feel much stronger soon after I began to use it. I began to eat more, and the nervous, weak feeling began to leave. Soon I was sleeping good.

"Cardul built me up as no other tonic ever did.

"I used Cardul with one daughter who was puny, felt bad and tired out all the time. It brought her right out, and soon she was as well as a girl could be. We think there is nothing like Cardul."

Do not allow yourself to become weak and run-down from womanly troubles. Take Cardul. You may find it just what you really need. For more than 40 years it has been used by thousands and thousands, and found just as Mrs. Mabe describes.

THE NEW MARVEL—
 PHOTOGRAPHY BY WIRE

(New York World.)

The successful demonstration yesterday of the transmission of a photograph by wire more than 1,000 miles between the editorial offices of The New York World and the St. Louis Post-Dispatch marks the addition of another marvel to the lengthening list of electrical mysteries.

For mysterious the new process is; as mysterious as the wireless and the telephone. It can be described. It cannot be explained. Even while doing man's bidding meekly, electricity baffles final analysis. Comparison is not explanation; telestereography may be likened to the telephone. As the human voice recorded in one instrument in St. Louis may echo from a like record in New York, so the new marvel reproduces at one end of the 1,000 mile wire the lineaments of a form or object traced at the other end.

Those who saw the demonstration felt that they looked on at the making of history; some of them could recall a similar Sunday afternoon—can it be only ten crowded years ago—when Glenn H. Curtiss came to the offices of The World after competing for its \$10,000 prize, the famous Albany-New York aeroplane flight that brought travel in the air a long step nearer fruition.

First an impossibility; then a toy; then a daily, accustomed and unregarded servant of man—the familiar cycle of invention—upon this course Mr. Belin's new marvel seems fairly launched by yesterday's demonstration. The scientists of the world will watch that development, and the promised next step of photography by wireless, with keenest interest.

From a Voter

The Republicans were elected Nov. 2, for two more years in Randolph County, but how did they get in? It was by stealing, lying and buying votes.

I have been told that the Republican candidates told the Republican women in the lower part of Randolph County that if they did not register that there would be a fine put on them.

The Republicans won the election by registering and voting the blind and "weak minded" men and women.

A man in my township who had voted a Democratic ticket for the past 40 years was hired this year to vote a Republican ticket.

Our taxes will be very low and our roads will be worked in the next two years—as they promised.
