

"DON'T MARRY HIM TO REFORM HIM"

Evangelist Johnson Gives Young Women Some Advice On Picking Husband

Greenville News.

"Marry a man who is a true Christian. Don't marry a man to reform him. Tell him you are not running a Keely Institute."

"Don't marry some one of different religious faith than yourself." Demand sound morals, sound mind and sound body of the man you intend to marry.

"Don't run away to get married. Have more respect than that for your parents."

"Don't marry a man far below or far above your station in life."

Such was some of the advice which Evangelist "Bob" Johnson gave to the unmarried young women of his audience last evening at the tent, corner of Perry avenue and Leach street.

Speaking with engaging frankness, and as a Christian worker with wide travel, observation, and experience in this world, Mr. Johnson deplored the fact that there were many mothers in Greenville who would not see to it that their daughter attended that service. He laid bare a number of tricks of the white-slaver, laying emphasis upon the necessity of proper home training and instruction by mothers to daughters relative to these fundamental facts. He unhesitatingly warned his hearers of the sin and existing conditions in Greenville and plead for Christian daughters, sisters, and mothers in the homes of the nation as the great need for the restoration of the nation's Christian ideals.

We are glad to learn that the Democratic Committee has rented that very fertile field out in the western section of Asheboro which has belonged to the county for several years and which has been neglected by the Republicans for as many years and that it is now under cultivation and a very beautiful crop is growing there which will assist wonderfully toward the upkeep of the inmates of

FALL GARDEN NOTES

Do not allow your garden to grow up in weeds and grass after the spring vegetables have matured. To have a satisfactory fall garden it is necessary to form plans now, to prepare any land not occupied, and to begin to plant seeds of certain vegetables for transplanting later. It should be remembered that practically all vegetables grown in the spring garden, and such vegetable seeds as were left over from spring plantings may be used in the fall.

A Few Suggestions

Planting of snap beans and corn should continue until about the middle of August. It requires only about seven weeks for snap beans to mature and killing frosts do not occur in the Piedmont until the last of October.

Satisfy or vegetable oyster may be planted now and will under favorable seasons produce good roots by the middle of November. Mammoth Sandwich Island is the best variety.

Preparations should be made now for the fall crop of Irish potatoes to be planted in July. Potatoes that have been kept in cold storage will sprout more readily than those from the spring crop. The most satisfactory variety for fall crop is the Lookout Mountain.

Preparations for rutabaga should be made for planting this crop in July to be harvested in the late fall. These turnips placed in banks covered with six or eight inches of soil will keep perfectly until late February.

Any parts of the garden which are not to be otherwise used should be plowed and planted in black-eyed peas or some other variety of peas that can be used dry during the winter.

Fall of Teapot Dome Scandal Now Advisor to Sinclair

Before he sailed for Europe Senator Smoot announced that he expected to return in time to start the investigation of the Teapot Dome oil leases on October 15.

In this connection it is interesting to cite the news of a special cable to the New York Times from Moscow which says: "H. F. Sinclair, head of the oil company bearing his name, arrived in Moscow today (July 1), accompanied by ex-Secretary Fall in an advisory capacity."

It was the secret lease given by the Secretary of the Interior, Albert B. Fall, to Mr. Sinclair's oil company, a subsidiary of the Standard Oil, upon the naval oil reserves in the Teapot Dome district of Wyoming, which resulted in the odorous Teapot Dome scandal. Soon thereafter Secretary Fall resigned from the Cabinet and now appears as the advisor of Sinclair in quest of new oil grants.

THIS YOUNGSTER A WONDER

Interesting to Speculate What He Will Be When He Has Grown to Manhood.

Jack Schwabenlund, twenty-four months old, of Philadelphia, appears to be able to put a large number of babies in the shade in certain accomplishments.

He has the backing of Dr. Lightner Witmer, head of the university psychological laboratory and clinic, too.

"He is the first two-year-old child," says Doctor Witmer, "successfully to complete the Witmer form board test at this clinic. Jack can count to 50, and he counted six objects with no error. He is able to read number symbols and can read combinations, such as eight plus four equals 12."

"He can read correctly all the letters of the alphabet, all marks of punctuation and can print several words. If words he knows are printed for him, he spells them out and pronounces them. His mother says he could read the letters of the alphabet at seventeen months."

"His memory is so fine that in many instances he seems as though he were reading passages when he is actually repeating them from memory."

HAVE SPIKES IN THEIR TAILS

How Birds Known as "Chimney Swifts" Are Enabled to Maintain Their Perches in Bricks.

Did you ever notice the chimney swallows streaming into chimneys as they finish their graceful speedy flying in the evening? Wonderfully quick on the wing are they, so quick indeed as to merit the proper name they bear, of Chimney Swifts! It is said, but no one has proved it, that their wings move alternately, not both at the same time. Hundreds of them go to roost in the same chimney and some must have wondered how they contrived to do it since there are no bars across inside of the bricks. Their feet are not made to roost upon as are those of chickens, they use them to cling to an upright surface. They prop themselves up from behind with their wonderful tail, of which every feather ends in a sharp, strong spike. They must need rest, too, for it has been estimated that in catching the flying mosquitoes and other flying insects on which they feed, the Chimney Swifts commonly fly a thousand miles a day!

Dangerous Ground.

She is one of Indianapolis' most talkative young women. And recently she became a bride. As she walked up the aisle at the church the evening of her wedding she was much excited. And the bridegroom kept saying to her in an undertone, "Walk slower; walk slower."

Later in the carriage he apologized to her for giving her advice at the church. She looked at him, a minute. "Oh, that was all right, dear," she said, "but you were near dangerous ground if you had only known it. I kept thinking at first that you were saying 'Talk slower,' and I was just getting ready to tell you what I thought of you, when we reached the altar."—Indianapolis News.

BRUTE!

Miss Oldguri—The lieutenant has captured my heart.

The Colonel—I will see to it, madam, that he is cited for bravery at the next review.

No Need for Alarm.

One night recently I read a thrilling ghost story. I kept thinking about it after I had gone to bed. To get the subject off my mind, I decided to get up and walk around. The house was dark, and upon reaching the dining room my blood ran cold at the sight before me. It turned out to be the dress form with a half-made light dress on it.—Exchange.

Corn Retained Fertility.

An Astec, N. M., woman has some old corn which was left in a cliff dwelling in New Mexico centuries ago. It had been buried in a leather basket, which was so old that when it was unwarmed the leather fell to pieces, but the corn appeared to be in good condition.

Pleasant for the Bride.

As a newly married couple were leaving the registry office at Doulgilly, Wales, the "predominant partner" was startled to hear a stentorian voice proclaiming "Beware of the Bride!" It was the town crier, announcing a union between the bride and the groom.

THE LAWN AND FLOWERS

Go over all flowering shrubs and vines and trim out all withered blooms and dead ones.

Follow sweet peas and similar spring flowering plants with vines (periwinkle), cosmos, lantana, verbena, and salvia; and for fall blooming, cosmos and chrysanthemums.

Shear privet hedges to force a more dense growth, preserve the form, and prevent the appearance of blooms. Preparatory to lawn-making in the fall, turn and harrow the ground at this time, and apply well decomposed stable manure, and plant broadcast in peas.

One thousand men and women gathered in a mob in New York, July 18th, and attempted to lynch James Gulette, a 20 year old negro, alleged to have attacked an 11 year old white girl.

MONUMENT AT DURHAM

Durham is preparing to stage a big celebration on October 12, when the Bennett place, taking in an area of 30 acres, will be officially accepted for the state of North Carolina as a memorial. A Civil War monument, costing not less than \$10,000, will be erected by Mrs. Morgan, widow of the late president of the Virginia-Carolina chemical company, who owned the property until she decided to make it a gift to the state.

LIGHTNING STRIKES SAME HOUSE TWICE

During a severe electrical storm some days ago, Bennie Jarrell was killed by lightning while standing by a screen door in his father's house in Warren county. A hole was burned through the screen. Mrs. Jarrell covered the hole with a piece of cloth, but on last Friday another bolt of lightning struck the same screen door and set fire to the cloth covering the hole.

The real reason for buying Columbias —they last longer

The largest laboratory, devoted to dry cell research, experiments continuously to make them "last longer." Columbia Hot Shot or Columbia Ignitors are "right" for your needs. That's why people have the habit of asking for Columbias.

Columbia Dry Batteries for all purposes are sold by hardware and general stores, electrical and auto supply shops, garages and implement dealers.

Columbia Dry Batteries —they last longer

Severe Indigestion

"I had very severe attacks of indigestion," writes Mr. M. H. Wade, a farmer, of R. F. D. 1, Weir, Miss. "I would suffer for months at a time. All I desired was a little bread and butter... consequently I suffered from weakness. I would try to eat, then the terrible suffering in my stomach! I took medicines, but did not get any better. The druggist recommended

Thedford's

BLACK-DRAUGHT

and I decided to try it, for, as I say, I had tried others for two or more years without any improvement in my health. I soon found the Black-Draught was acting on my liver and easing the terrible pain. "In two or three weeks, I found I could go back to eating. I only weighed 123. Now I weigh 147—eat anything I want to, and by taking Black-Draught I do not suffer. Have you tried Thedford's Black-Draught? If not, do so today. Over 8 million packages sold, a year. At dealers' "

666 quickly relieves Constipation, Biliousness, Headaches, Colds and Lagrippe.

4 vital things a good oil does

Flow. Good motor oil flows quickly to the place it's needed—spreads evenly over the surface—gets there without fail in spite of heat or cold extremes.

Work. It holds the metal surfaces absolutely apart, no matter what the pressure, heat or clearance.

Wear. Above all it keeps on working, day after day—keeps a firm oil cushion longer in spite of hard service, dilution and water condensation—burns clean when it does go—gives greater mileage.

Cost less. Good oil costs less per mile if reasonably priced. It goes further and saves motor trouble.

Polarine is such an oil. It gets quickly to the spot, spreads evenly at all working temperatures, does its work thoroughly, outwears oils of inferior quality, yet costs little more per gallon and much less per mile. Buy from the Polarine Chart at your dealer's and get every vital quality in this all-round motor oil.

STANDARD OIL COMPANY (New Jersey)

Say "Polarine"—not just a "quart of oil"

666 Cures Malaria, Chills and Fever, Dengue or Bilious Fever.

AJAX TIRES

LEADING motor car manufacturers use them as original equipment. They are also the choice of thousands of prominent car dealers.

AJAX CORD, ROAD KING, PARAGON

INGRAM & COMPANY Asheboro, N. C.

NORTH CAROLINA STATE COLLEGE OF AGRICULTURE AND ENGINEERING STATE COLLEGE STATION RALEIGH, N. C.

Technical Education at State College prepares its graduates for personal success and for leadership in industrial progress. The college offers

FOUR YEAR COURSES IN:

Agriculture—including General Agriculture and Specialized Courses in Farm Crops, Agricultural Engineering, Animal Husbandry and Dairying, Biology, Horticulture, Poultry Science, Soils, Veterinary Medicine, Vocational Education. Chemistry, Agricultural Chemistry, Textile Chemistry and Dyeing. Civil Engineering, Architecture and Highway Engineering. Electrical Engineering. Mechanical Engineering. Textile—Textile Engineering, Textile Manufacturing, Textile Chemistry and Dyeing. Agricultural Economics, Business Administration, Rural Life. General Science, Physics, Biology.

TWO YEAR COURSES IN:

Agriculture, Mechanical Arts, Textile Manufacturing. One Year Course in Auto Mechanics. Winter Course in Agriculture for Farmers. Summer Session for Teachers, for College Entrance and for College Credit. Resident equipment in all departments. Session 1922-1924 begins September 4. Entrance requirements for Freshman Class, 15 units—English, 3; History, 2; Mathematics, 5; Science, 1; Elective, 5. For catalog, illustrated circulars, and entrance blanks, write E. B. OWEN, Registrar.

FREE TO FARMERS

When you become a subscriber to the Southern Agriculturist you are entitled to an almost unlimited service of information and advice absolutely without charge.

Bring the problems of your home, your business or your community to us and they will receive the sympathetic study of editors and specialists who through years of experience have become expert in their solution. Their advice is yours for the asking.

400,000 farm families already take the "Giant of the South." If you do not, 50 cents a year or \$1 for three years will entitle you to this unparalelled free service in addition to an unbeatable paper twice a month.
