Full Power and ALL the other gasoline qualities

GASOLINE has to be balanced to give you the full, A rounded performance that you're entitled to.

"Standard," the balanced gasoline, gives you full, ample power because it had just the correct proportion of high-boiling constituents ("fractions", as the refinery men call them). Too much of them would make your motor hard to start and slow to accelerate. Too little would lower your power and mileage and you'd have to use a rich, wasteful mixture to get satisfactory results.

"Standard" has the right percentage of these highboiling fractions. And it has the correct percentage of low, and intermediate fractions for instant starting Made In The Carolinas and snappy pick-dus. Over fifty years of experience are built into every gallon you buy. Try it out this Fall-see for yourself.
