The many friends of Capt. Joe Ritter, conductor on the Randolph and Cumberland train whose death occurred at the hospital at Sanford last Thursday will be greatly grieved. The death of Capt. Ritter was result of a blow inflicted by Kidney Shephard. Capt Ritter spoke to Shephard about neglecting his work. The negro cursed Captain Ritter and picked up an iron and killed him.

Capt. Ritter is survived by his wife, three small children, his father, J. W. Ritter, two brothers and five sisters. On last Saturday one on the buildings at Oak Ridge, estimated value thereof being \$10,000 and built in 1881, was burned. Thirty-two students of Oak Ridge had homes in this dormitory building.

The High Point Enterprise says that while officers were hunting for violators of the prohibition law on last Sunday afternoon in the Freeman mill section on the Randolph and Guilford line burglars entered the home of Lee Modlin near Freeman Mills ransacking the house and escaping with a small amount of money. Officers attributed the burglary to spite work on the part of boot leggers, Modlin having reported them. Two large sized men are said to have been leaving the Modlin yard in a Ford closed roadster. It turned out that these two men were deputy sheriffs who had been looking for violators of the law.

CLEAN UP THE POTATO STORAGE HOUSE

Cured Potatoes Should be Profitable This Year.

Raleigh, N. C. Oct. 27.—Sweet potato storage houses properly handled should make money this year, as there is a decrease of about a hundred million bushels in the Irish potato crop, and also a decided decrease in the sweet potato crop, reports C. D. Matthews, Chief of the Division of Horticulture for the State College and Department of Agriculture.

In order to make money, however, Mr. Matthews says that the crop must be properly handled in the field, put in storage and cured according to approved methods. Many dollars are needlessly lost because the grower is not willing to learn from the experience of others but wants to experiment for himself on operations that have already been standardized.

"The storage house should be cleaned out and disinfected thoroughly in order to get rid of the numerous storage-rot germs left there from the previous crop," says Mr. Matthews. "A solution of formaldehyde made by mixing 1 pint of formalin (40 percent) in 10 to 15 gallons of water makes a good disinfectant with which to spray the interior of the house."

"The crates or containers should be purchased and delivered before the crop is dug in order to cause no delay at digging time. The standard bushel crate 12x12x15 is best for storage and shipment. A crate of the Owasso type should be used for storage while any durable, efficient, economical and attractive crate is all right for shipment."

"The crop should be harvested before frost as a frosted potato will not keep. Also, the potatoes should be mature before being harvested. To test for maturity cut the potato and if the juice turns greenish in color in about three minutes it is not mature."

"Where storage houses are not owned on the farm and storage space is available in the community houses, arrangements should be made to store the crop there as a cold winter can be expected and only those potatoes properly stored and cured will keep successfully."—F. H. JETER, Editor, N. C. Department of Agriculture.

SCHOOL CHILDREN INVITED TO ENTER NATION WIDE CONTEST

A nation wide competition for prizes among children's essays has been announced by A. T. Allen, Supt. of Education, in which all children of the high and secondary schools in the state of North Carolina have been invited to compete in a nation wide contest for \$10,000 in cash prizes and scholarships to Yale, Vassar and other universities and colleges. Mr. and Mrs. Francis P. Garvin, of New York, have made this donation in honor of their daughter, Patricia, and is intended to stimulate interest among high school pupils in the development of chemical science in this country. Six prizes of \$20 in gold are to be awarded in each state in the union and scholarships to Yale and Vassar will be given for the six best essays in the United States. These scholarships will carry with them tuition for four years in chemistry or chemical engineering and \$500 a year in cash. In addition to these awards many other scholarships will be offered through various universities and colleges. The contest has the endorsement of Dr. John T. Tignor, Commissioner of Education of the United States. Fifteen will be chosen from all walks of life to judge the essays.

Mr. Garvin is a wealthy New York man who was custodian of alien property under Mr. Wilson's administration after Mr. Mitchell Pomroy was appointed United States attorney and is now interested greatly in chemical corporations in developing chemistry in the United States.

Farmers of Eastern Carolina have seeded 7,500 acres of permanent pastures during the last two years as a direct result of the campaigns put on in this section during that time.

"Keep those tires up!"

—says the experienced Fleet Boss. And he's right, absolutely. His long experience has shown him that it wastes gasoline to run on under-inflated tires—that a loss of 15 or 20 pounds of air pressure in the tires can cost you as much as 1 to 1 1/2 miles per gallon, whereas an extra passenger cuts off only 1/10 to 1/5 of a mile.

Polarine is built around a practical experience of more than fifty years which has shown us a thousand and one things that affect the performance of a motor oil or fuel. You can trust it as thoroughly as you can trust the finest tire or motor car.
